J.T. Ellison's pulse-pounding new psychological thriller examines the tenuous bonds of friendship, the power of lies and the desperate lengths people will go to in order to protect their secrets. Goode girls don't lie... Perched atop a hill in the tiny town of Marchburg, Virginia, The Goode School is a prestigious prep school known as a Silent Ivy. The boarding school of choice for daughters of the rich and influential, it accepts only the best and the brightest. Its elite status, long-held traditions and honor code are ideal for preparing exceptional young women for brilliant futures at Ivy League universities and beyond. But a stranger has come to Goode, and this ivy has turned poisonous. In a world where appearances are everything, as long as students pretend to follow the rules, no one questions the cruelties of the secret societies or the dubious behavior of the privileged young women who expect to get away with murder. When a popular student is found dead, the truth cannot be ignored. Rumors suggest she was struggling with a secret that drove her to suicide. But look closely...because there are truths and there are lies, and then there is everything that really happened.

Don't miss It's One of Us, the next page-turning thriller from New York Times bestselling author J.T. Ellison!

The construct "quality of life (QoL)", since the 1980s, when it was introduced, is being used mainly in the context of health problems. Areas of one's life that contribute to QoL are good physical and mental health, efficient cognitive functioning, social support, being able to meet the requirements of professional life, positive emotions, etc (Power, 2003). Work on subjective well-being (SWB), on the other hand, was developed in the context of healthy everyday life; it also has a history of more than 30 years. During this 30-year period factors that have an impact on SWB, such as SES, gender, health, age, and religiosity have been identified (Diener, 2000). A third independent line of research pertains to what has been called Positive Psychology (Seligman & Csikszentmihalyi, 2000), that is, an emphasis on human strengths, such as optimism, hope, wisdom, positive emotions, resilience, etc., which contribute to positive functioning in life. Recently, SWB has been associated to human strengths and to the movement of positive psychology but this did not happen for QoL, possibly because of its emphasis on people with health problems. However, QoL can be conceived of as a generic term that pertains to all people, healthy or not. In this sense, it is closely related to SWB defined as happiness (Diener, 2000). Also, QoL encompasses positive emotions that go beyond happiness and has the advantage that it can be applied to many different domains of life such as interpersonal relations, health-related situations, and professional and educational strivings. Moreover, the mechanism(s) that underpin QoL and SWB can be studied in relation to people's goals and strengths of character, that is, from a positive psychological perspective. Such a perspective can reveal the specificities of "quality" in the various domains of life and, specifically, the positive emotions and strengths that contribute to a happier, healthier, and more successful life, even in face of adversity. Therefore, despite the differences among the three theoretical traditions, namely QoL, SWB, and positive psychology, it is possible to find the common ground they share and each of them can benefit from notions developed in the others. The aim of the present book is to bring together these three traditions, show the interactions of variables emphasized by them, and give an integrative perspective from the positive psychology point of view. It also aims to extend the range of life situations in which one can look for quality and which go beyond the traditional emphasis of QoL on health problems. Thus, the content of the proposed book covers different age populations (from children to older adults), healthy and people facing health problems as well as people facing problems in their interpersonal lives or in their pursuits. It also discusses factors that contribute to marital satisfaction, well being in the school context, and things that people value and cherish. The chapters refer to notions such as happiness, interest, resilience, wisdom, hope, altruism, optimism, and spirituality/religiosity that represent unique human strengths. Finally, it emphasizes the role of goals and motivation that connect SWB with self-regulation and managing of one's life priorities. To conclude, the chapters included in the proposed edited book aim at bringing to the fore new theoretical developments and research on QoL, SWB, and positive psychology that bridges previously distinct theoretical traditions. The proposed book covers a broad range of topics, addresses different theoretical interests and paves the way for a more integrative approach. Finally, it brings together an international set of authors, from USA, Europe, Australia, and Asia.

"Depression runs in families." Above all, the goal of this book is to come to some conclusions about the meaning of that simple assertion, which has a far from simple explanation of meaning. This book is designed to address some of the gaps in previous research on depressive disorders in the family context: the sheer numbers of people with affective disorders marks them as our most common psychiatric problem.

How do we vote with our dollars, not just to make ourselves feel good, but to make a real difference? Wallet Activism challenges you to rethink your financial power so can feel confident spending, earning, and saving money in ways that align with your values. While we call the American system a democracy, capitalism is the far more powerful force in our lives. The greatest power we have—especially when political leaders won't move quickly enough—is how we use our money: where we shop, what we buy, where we live, what institutions we entrust with our money, who we work for, and where we donate determines the trajectory of our society and our planet. While our votes and voices are essential, too, Wallet Activism helps you use your money for real impact. It can feel overwhelming to determine "the right way" to spend: a choice that might seem beneficial to the environment may have unintended consequences that hurt people. And marketers are constantly

lying to you, making it hard to know what choice is best. Wallet Activism empowers us to vote with our wallets by making sense of all the information coming at us, and teaching us to cultivate a more holistic mindset that considers the complex, interrelated ecosystems of people and the planet together, not as opposing forces. From Tanja Hester, Our Next Life blogger and author of *Work Optional*, comes the mindset-shifting guide to help you put your money where your values are. Wallet Activism is not a list of dos and don'ts that will soon become outdated, nor does it call for anti-consumerist perfection. Instead, it goes beyond simple purchasing decisions to explore: The impacts a financial decision can have across society and the environment How to create a personal spending philosophy based on your values Practical questions to quickly assess the "goodness" of a product or an entity you may buy from The ethics of earning money, choosing what foods to eat, employing others, investing responsibly, choosing where to live, and giving money away For anyone interested in leaving the world better than you found it, Wallet Activism helps you build habits that will make your money matter.

An “incandescent....redefining biography of a major poet whose reputation continues to ascend” (Booklist, starred review)—Wallace Stevens, perhaps the most important American poet of the twentieth century. Wallace Stevens (1879-1955) lived a richly imaginative life that he expressed in his poems. “A biography that is both deliciously readable and profoundly knowledgeable” (Library Journal, starred review), *The Whole Harmonium* presents Stevens within the living context of his times and as the creator of a poetry that continues to shape how we understand and define ourselves. A lawyer who rose to become an insurance-company vice president, Stevens composed brilliant poems on long walks to work and at other stolen moments. He endured an increasingly unhappy marriage, and yet he had his Dionysian side, reveling in long fishing (and drinking) trips to the sun-drenched tropics of Key West. He was at once both the Connecticut businessman and the hidalgo lover of all things Latin. His first book of poems, *Harmonium*, published when he was forty-four, drew on his profound understanding of Modernism to create a distinctive and inimitable American idiom. Over time he became acquainted with peers such as Robert Frost and William Carlos Williams, but his personal style remained unique. The

complexity of Stevens’s poetry rests on emotional, philosophical, and linguistic tensions that thread their way intricately through his poems, both early and late. And while he can be challenging to understand, Stevens has proven time and again to be one of the most richly rewarding poets to read. Biographer and poet Paul Mariani’s *The Whole Harmonium* “is an excellent, superb, thrilling story of a mind....unpacking poems in language that is nearly as eloquent as the poet’s, and as clear as faithfulness allows” (The New Yorker).

Trailblazers Who Lead Simon and Schuster

Unlike many books about adult literacy, which focus on abstract concepts related to test scores, this volume develops an understanding of literacy through the engaging life stories of twelve adults from diverse backgrounds living in the United States. In the process of coming to know these adults, we learn, contrary to commonly held assumptions and beliefs about literacy, that adults with limited literacy skills work hard and long, make limited use of public resources, can use technology when shown, and have pride and self-respect. In addition to all of the scientific information and policy implications yielded by this research study, this is foremost a compelling story of human struggle and survival. Readers will find themselves caring about these adults, feeling angry about their underemployment and their pain, and excited about their triumphs.
