 Almond Production Manual
 Sample costs to establish an almond orchard and produce almonds under micro sprinkler irrigation in the Northern San Joaquin Valley are presented in this study. This study is intended as a guide only. It can be used to help guide production decisions, estimate potential returns, prepare budgets and evaluate production loans.

SAMPLE COSTS TO ESTABLISH AN ORCHARD AND PRODUCE ALMONDS
 Almond production. World

almond production has been estimated to be about 334,000 tons (average from 1992 to 1996) of shelled product. The main producing country is the United States, which accounts for 68% of the world production. Almond production is the major focus of contemporary almond production. In order to provide a balanced supply of nutrients, it is necessary to consider the nutrients removed with the crop in the previous year and also estimate other losses that occur within the production system. Various trials have explored the export of nutrients from harvested fruit.
