The Filed Rate Doctrine Macmillan

This text covers both basic science and clinical aspects of the cornea and associated external diseases. In this edition the editors have incorporated relevant basic science information into the clinical science chapters. It also contains an expanded surgery section - especially refractive surgery. Emphasis on the third edition is on clinical information (the basic science has been incorporated into the clinical chapters). The clinical section has been expanded by ten per cent to reflect changes in the field.

THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that analyze, interpret and apply the filed-rate doctrine. * * * Section 206 defines FERC's authority when an existing rate is found unjust, unreasonable, unduly discriminatory, or preferential. 16 U.S.C. § 824e. This includes two main tools at FERC's disposal. First, Section 206(a) authorizes FERC to "fix" rates prospectively, after it concludes that a rate is inappropriate upon a complaint by a market participant or on FERC's own impetus. See *id.* § 824e(a); *Xcel*, 815 F.3d at 950. Second, Section 206(b) permits FERC to order refunds where the previous rate was unfairly high, effectively setting the rate as of the date that the Section 206 proceeding began -

either when FERC instituted an investigation or the date of the complaint, if instigated by a third party. 16 U.S.C. § 824e(b). However, no concomitant authority exists to retroactively correct rates that were too low. See *Fed. Power Comm'n v. Sierra Pac. Power Co.*, 350 U.S. 348, 353, 76 S.Ct. 368, 100 L.Ed. 388 (1956) (noting that "[the Section 206] power is limited to prescribing the rate 'to be thereafter observed' and thus can effect no change prior to the date of the order"). This rule against retroactive rate increases precludes FERC from ordering remedies that accomplish a higher rate for a past period. In turn, the filed-rate doctrine requires market participants to abide by the rates set: "utilities are forbidden to charge any rate other than the one on

file with the Commission." *W. Deptford Energy, LLC v. Fed. Energy Regulatory Comm'n*, 766 F.3d 10, 12 (D.C. Cir. 2014). The "rule against retroactive ratemaking" and the filed-rate doctrine may thus be understood as "corollar[ies]" that make static the rates paid for energy, once established. *NSTAR Elec. & Gas Corp. v. Fed. Energy Regulatory Comm'n*, 481 F.3d 794, 800 (D.C. Cir. 2007). See also *Ark. La. Gas Co. v. Hall*, 453 U.S. 571, 577, 101 S.Ct. 2925, 69 L.Ed.2d 856 (1981) (explaining the development of the filed-rate doctrine in the context of the Natural Gas Act). * * * *Verso Corp. v. FERC*, 898 F. 3d 1 (DC Cir. 2018) Amish Quiltmaker Unruly in Law The Haynes Manuals N. America, Incorporated

This paper discusses commodity prices might serve as a useful leading indicator of inflation, based on the relative importance of flexible auction markets for the determination of these prices. They thus may have a tendency to respond relatively quickly, especially in response to monetary disturbances. Estimation of alternative commodity-price indexes, in which the weights are chosen so as to minimize the residual variance in aggregate inflation regressions, was not fully successful. The commodity prices do have a useful role to play as an aid in predicting inflation, so long as one is careful to interpret the relationships qualitatively and in the context of more general macroeconomic developments. The ratio of consumer to commodity price movements' changes

over time, and the relative price of commodities undergoes long sustained swings; nonetheless, the qualitative linkages are quite evident in the data. Perhaps most importantly, turning points in commodity-price inflation frequently precede turning points in consumer-price inflation for the large industrial countries as a group.
