LILIAN CARR

Welcome to Mighty Prober Co.,Ltd. Automatic Wafer Prober Tel SystemThe Wafer Prober Networking System PN-300 utilizes a database to facilitate data access from other system and provides an environment that enables the user to edit data and handle processing. The system achieves wide-ranging compatibility by adopting standard hardware and operating system.Test system Precio™ Series - tel.comThe TS2000 and TS3000 are the probe systems which can be configured with ambient to hot chucks up to 300°C. The TS2000-SE and TS3000-SE can be configured at extended temperature ranges from -60°C to +300°C and where TS2000-SE is the advanced probe system equipped with automated single wafer loader for convenient wafer swap at any temperature.Automated Probe Station | Automated Probe System

...The WDF™ series is a fully automatic dicing frame prober capable of flexibly probing with standard wafers and devices on a dicing frame. In the semiconductor test market, various product forms such as thin wafers, advanced packages with TSV's, diced wafers, KGD application, strip frame devices require frame probing.Test system WDF™ Series - Tokyo Electron Ltd.The MPI Advanced Semiconductor Test Division is providing a wide range of engineering probe systems & Probe Staions addressing the specific requirements of various market segments and applications such as Device Characterization for modeling, Failure Analysis, Design Verification, IC engineering, Wafer Level Reliability as well special requirements for MEMS, High Power, RF and mmW device testing.Probe Stations | Wafer Probing Stations | Wafer Probe ...Home>Prober>System>TEL> Prober; Options; Repair; Parts; P.M Contract; System; TSK; TEL; 2000 Series; 4090u Series; TEL. TEL P-8XL AUTOMATIC WAFER PROBER CONFIGURATION. 200mm gold chuck; Top loader; Acumen OCR;

RS232 interface with cable; PZZ-R12.12-6 and higher software revisions; Automatic probe-to-pad alignment; Wide Area Probe Polisher (WAPP ...Welcome to Mighty Prober Co.,Ltd.150 mm Systems. The MPS150 is an easy to use, yet highly-precise manual probe platform for wafers and substrates up to 150 mm. Pre-configured application-focused probing solutions are available with everything you need to achieve accurate measurement results in the shortest time, with maximum confidence.Probe Systems - Wafer Probe Stations/Systems for ...TEL manufactures a range of wafer prober products with advanced functions to suit various requirements. TEL focuses on providing the highest quality products to ensure maximum performance. EquipNet carries a range of used TEL probes, including the P12XL Wafer Prober, the P8XL Wafer Prober, and much more.Used Probers | Buy & Sell | EquipNetFully Automatic Wafer Probers. Fast, reliable and economical automatic probing systems for wafers from 100 mm to 450 mm.Wafer Probers | Wafer Probing Equipment |

Semiconductor ...New and Refurbished Prober Sales & Parts . Wafer probers are used to test integrated circuits by aligning a set of microscopic contacts or pads with needle like probes in a probe card, The card is held in place while the wafer, vacuum-mounted on a wafer chuck, is moved into electrical contact. Wafer Probers: Used, Surplus, Refurbished Semiconductor ...TEL provides a series of reliable solutions to the increasing number of probing demands. Precio™ XL is the latest 300mm fully automated wafer prober developed based on TEL Precio™ series. The Precio™ XL realizes high productivity, contact performance, cleanliness improvement, and short delivery time with a concept to further reduce test costs. Tokyo Electron Tel Wafer Test system Precio XL The Pegasus™ A200 is an automatic production 200 mm wafer prober, delivering advanced automation for high volume probing applications requiring special handling, such as GaN, GaAs, saw frames and thin wafers. This probe station offers dual-end, parallel processing of wafers and optimizes wafer handling for maximum throughput. Automatic production wafer prober - A200 - Wentworth ...SemiProbe produce a full range of semiautomatic wafer probe equipment based on their Modular Probe System For Life (PS4L) platform, allowing users to configure a semiconductor probe station according to their exact requirements. Semiautomatic Wafer Probe Equipment | Semiconductor Wafer ...A wafer prober is a machine (Automatic test equipment) used to test integrated circuits. For electrical testing a set of microscopic contacts or probes called a probe card are held in place whilst the wafer, vacuum-mounted on a wafer chuck, is moved into electrical contact. Wafer testing - Wikipedia TEL moved ahead with what is probably the world's first truly automatic prober, built on the foundation of the old Cobilt 4400. But it was a dramatically different machine. The rest is history and TEL remains among the top wafer Prober suppliers today. TEL - Model TMC 4400-A Wafer Prober -

ChipHistory.org Rotalab provides semi-automated probe systems with probing capabilities ranging from 50 mm to 450 mm wafers/substrates. Our wafer prober systems are integrated with state-of-the-art technology to allow you to work efficiently and effectively in your research and industrial applications. Semi-Automatic Probe Stations | Rotalab Scientific Instruments Automatic Test Equipment such as Micropositioners, Analytical Wafer Probers, Automatic Wafer Probers, Probe, Automatic Test, SMD Handlers, Memory Test Systems, Discrete Component Test Systems, DIP Handlers, Digital Test Systems from Used, Surplus, Refurbished Semiconductor Manufacturing Equipment, Parts, Accessories and Supplies For Sale, Auctioned and Wanted.
