FARMER GLASS

Education as a Science Springer

In this book I have collected many reports on the properties of bamboo. Since I started bamboo research in 1974, I have collected many publications on bamboo. However, in contacts with other researchers I became aware of the fact that several of these publications were unknown to them. Consequently their activities in research or in bamboo projects had to start at a lower level than if they had known some of these publications. Therefore, I discussed the need for a book like this with several colleagues, and I decided to start writing. In this book I present data on properties, as published by researchers. Certainly it is not complete; e.g. the proceedings of the bamboo workshop in Cochin in November 1988 are not included; they arrived just too late to be taken into account. On the other hand, in writing this preface I realize I have forgotten my own thesis. I do apologize to any colleague whose relevant report is not taken into account as well. I like to express my feelings of respect to the board of my faculty: they allowed me to spend so much time on this book, and they gave a considerable financial support for the printing costs.

Comparative Dispute Resolution University of Illinois Press

"The Third Edition of Philosophical Foundations of Adult Education presents seven theoretical approaches to adult education: liberal, progressive, behaviorist, humanist, radical/critical, analytic, and postmodern. The book gives the historical grounding as well as the basic principles for each approach. In this edition each chapter has been revised and brought up to date. The chapter on radical adult education incorporates recent developments in radical education, phenomenology, feminist educational theory, and critical social theory. The book contains an entirely new chapter on postmodern adult education."

The Birth of the Clinic University of Pennsylvania Press

The general objective of this book is to contribute to the debate on, as well as to the development and implementation of, EU social policies and social policies in EU countries, particularly the growing emphasis in these policies on "activation" and "participation" rather than income provision.

Providing Keys to the Rhetoric of Professional Communities Krieger Publishing Company
 With the growth of practitioner research, this book leads the way by addressing key issues faced by 'insider researchers' - those doing research projects in the organizations and communities in which they themselves work, or where they are already familiar with the setting. The authors explore the implications of these research contexts, and discuss approaches and methodologies that researchers in these contexts might adopt, with a particular focus on ethics - one of the key concerns for students undertaking a research project of this type.

Philosophical Foundations of Adult Education John Wiley & Sons

Designed by two MIT professors, this authoritative text transcends the limitations and ambiguities of traditional treatments to develop a deep understanding of the fundamentals of thermodynamics and its energy-related applications. Basic concepts and applications are discussed in complete detail, with attention to generality, rigorous definitions, and logical consistency. More than 300 solved problems span a wide range of realistic energy systems and processes.

Developing Learning and Participation in Schools Springer Science & Business Media
 Italy's residents are a migratory people. Since 1800 well over 27 million left home, but over half also returned home again. As cosmopolitans, exiles, and 'workers of the world' they transformed their homeland and many of the countries where they worked or settled abroad. But did they form a diaspora? Migrants maintained firm ties to native villages, cities and families. Few felt much loyalty to a larger nation of Italians. Rather than form a 'nation unbound,' the transnational lives of Italy's migrants kept alive international regional cultures that challenged the hegemony of national states

around the world. This ambitious and theoretically innovative overview examines the social, cultural and economic integration of Italian migrants. It explores their complex yet distinctive identity and their relationship with their homeland taking a comprehensive approach.

Operations Management For Mbas, 3Rd Ed Policy Press

This book focuses on the specific traits and nature of entrepreneurial human capital and the extent to which it can be stimulated by entrepreneurship education - especially when these activities combine collaborative practices and innovation. It includes a comprehensive collection of articles on how entrepreneurship education can be structured, providing theoretical reflections as well as empirical evidence. As such it contributes to the ongoing debate on the teachability of entrepreneurial skills and the role of innovation and collaboration in the design of educational programs that aim to spread entrepreneurial human capital.

Politics and Poverty in Modern America Springer Nature

The successful preservation of an historic building, complex or city depends on the continued use and daily care that come with it. The possibility of continued use depends on the adaptation of the building to modern standards and practice of living, requiring changes in constructional or structural features. Conservation engineering is the process of understanding, interpreting and managing the architectural heritage to safely deliver it to posterity, enhancing private or public utility vis a vis minimum loss of fabric and significance. These two objectives are sometimes conflicting. With increasing global interest in conservation engineering it is essential to open the debate on more inclusive definitions of significance and on more articulated concepts of safety by use of acceptable and reliable technologies, integrating further the activity of all the professions involved in conservation.

A Consultancy Report, October 1992 Taylor & Francis

This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference - in both conceptual and legal terms - that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which - in accordance with the programmatic approach of Marco Biagi - will also feed the debate at the national level.

Montessori Examined Cambridge Scholars Publishing

"This is the most sophisticated study of welfare rights organizing to date. It engages with grassroots and high politics, social history and social thought. . . . While other books focus on ideas, structures, movement history, or poor women, Kornbluh does it all with insight and verve."--Eileen Boris, University of California, Santa Barbara

Mechanical Properties of Bamboo Springer

MBAs in the workforce today are facing issues in such areas as supply chain management, the balanced scorecard, and yield management. This informative book arms them with a much-needed introduction to operations management and explains how to deal with the challenges in these areas. It guides them through all the basics including core competency, mass customization, benchmarking, business process design, and enterprise resource planning (ERP). All the while, it emphasizes the critical role that operations management will play in all the career paths that they choose.· The Nature of Operations· Strategy, Operations, and Global Competitiveness· Process Planning and Design· Six Sigma for Process and Quality Improvement· Capacity and Location Planning· Schedule Management· Supply Chain Management· Supplement. The Beer Game· Inventory Management· Enterprise Resource Planning· Lean Management· Project Management
 8th International Conference, ABZ 2021, Ulm, Germany, June 9-11, 2021, Proceedings CRC Press

The six-volume set LNCS 8579-8584 constitutes the refereed proceedings of the 14th International Conference on Computational Science and Its Applications, ICCSA 2014, held in Guimarães, Portugal, in June/July 2014. The 347 revised papers presented in 30 workshops and a special track were carefully reviewed and selected from 1167. The 289 papers presented in the workshops cover various areas in computational science ranging from computational science technologies to specific areas of computational science such as computational geometry and security.

Unconventional Machining Processes Edward Elgar Publishing

Microgrid Energy Management Operations Management For Mbas, 3Rd Ed John Wiley & Sons
Structural Analysis of Historical Constructions Springer Science & Business Media

The scope of this book is based on the keynote lectures delivered during the Inter national Symposium on Anisotropic Behaviour of Damaged Materials ABDM, held in Krakow-Przegorza, Poland, September 9-11, 2002. The Symposium was organized by the Solid Mechanics Division of the Institute of Mechanics and Machine Design - Cracow University of Technology, under auspices of the Dean of the Faculty of Mechanical Engineering, Cracow University of Technology, Prof. S. Michalowski. The Co-organizers of the ABDM Symposium were: • Martin-Luther-Universität Halle-Wittenberg, • Centre of Excellence for Advanced Materials and Structures AMAS at the Institute of Fundamental Technological Research of the Polish Academy of Sciences, Warsaw, • Committee of Mechanics of the Polish Academy of Sciences, Warsaw. Ten chapters of this book in their present form essentially exceed lectures delivered at the Symposium. They should rather be read as not only author's recent achievements in the field, but also the state of art and synthesis done by the leaders in the mechanics community. The mixed formula of the Symposium, namely: the invited lectures and presentations of the original papers by the participants was used. 23 original papers, published in the Symposium Proceedings on CD, exhaust the full scope of the ABDM Symposium. The present book provides a survey of various damage models focusing on the damage response in anisotropic materials as well as damage-induced anisotropy.

Active Social Policies in the EU SAGE Publications

This book contains the proceedings of the Seventh National Conference of the Italian Systems Society. The title, Systemics of Incompleteness and Quasi-Systems, aims to underline the need for Systemics and Systems Science to deal with the concepts of incompleteness and quasiness. Classical models of Systemics are intended to represent comprehensive aspects of phenomena and processes. They consider the phenomena in their temporal and spatial completeness. In these cases, possible incompleteness in the modelling is assumed to have a provisional or practical nature, which is still under study, and because there is no theoretical reason why the modelling cannot be complete. In principle, this is a matter of non-complex phenomena, to be considered using the concepts of the First Systemics. When dealing with emergence, there are phenomena which must be modelled by systems having multiple models, depending on the aspects being taken into consideration. Here, incompleteness in the modelling is intrinsic, theoretically relating changes in properties, structures, and status of system. Rather than consider the same system parametrically changing over time, we consider sequences of systems coherently. We consider contexts and processes for which modelling is incomplete, being related to only some properties, as well as those for which such modelling is theoretically incomplete—as in the case of processes of emergence and for approaches considered by the Second Systemics. In this regard, we consider here the generic concept of quasi explicating such incompleteness. The concept of quasi is used in various disciplines including quasi-crystals, quasi-particles, quasi-electric fields, and quasi-periodicity. In general, the concept of quasiness for systems concerns their continuous structural changes which are always meta-stable, waiting for events to collapse over other configurations and possible forms of stability; whose equivalence depends on the type of phenomenon under study. Interest in the concept of quasiness is not related to its meaning of rough approximation, but because it indicates an incompleteness which is structurally sufficient to accommodate processes of emergence and sustain coherence or generate new, equivalent or non-equivalent, levels. The conference was devoted to identifying, discussing and understanding possible interrelationships of theoretical disciplinary improvements, recognised as having prospective fundamental roles for a new Quasi-Systemics. The latter should be able to deal with problems related to complexity in more general and realistic ways, when a system is not always a system and not always the same system. In this context, the inter-

disciplinarity should consist, for instance, of a constructionist, incomplete, non-ideological, multiple, contradiction-tolerant, Systemics, always in progress, and in its turn, emergent.

Power, Persuasion and Manipulation in Specialised Genres Courier Corporation

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.

Index for Inclusion Routledge

A wide range of topics in the area of mechanics of materials and structures are covered in this volume, ranging from analysis to design. There is no special emphasis on a specific area of research. The first section of the book deals with topics on the mechanics and damage of concrete. It also includes two papers on granular packing structure changes and cumulative damage in polymers. In the second part more theoretical topics in mechanics are discussed, such as shell theory and nonlinear elasticity. The following section discusses areas dealing primarily with plasticity, viscoelasticity, and viscoplasticity. These include such topics as dynamic and cyclic plasticity. In the final section the subject is structural dynamics, including seismic analysis, composite frames and nonlinear analysis of bridges. The volume is compiled in honor of Professor Maciej P. Bieniek who has served as a teacher and researcher at several universities, and who has made many significant contributions in the evaluation, rehabilitation, and design of infrastructures.

Physics, Astronomy and Engineering. Critical Problems in the History of Science and Society Routledge

This collection seeks to define the emerging field of "ubiquitous learning," an educational paradigm made possible in part by the omnipresence of digital media, supporting new modes of knowledge creation, communication, and access. As new media empower practically anyone to produce and disseminate knowledge, learning can now occur at any time and any place. The essays in this volume present key concepts, contextual factors, and current practices in this new field.

Contributors are Simon J. Appleford, Patrick Berry, Jack Brighton, Bertram C. Bruce, Amber Buck, Nicholas C. Burbules, Orville Vernon Burton, Timothy Cash, Bill Cope, Alan Craig, Lisa Bouillion Diaz, Elizabeth M. Delacruz, Steve Downey, Guy Garnett, Steven E. Gump, Gail E. Pianfetti, Paul Prior, Fazal Rizvi, Mei-Li Shih, Janine Solberg, Joseph Squier, Kona Taylor, Sharon Tettegah, Michael Twidale, Edee Norman Wiziecki, and Hanna Zhong.

The Italian Labour Relations in a Global Economy Springer

This book constitutes the proceedings of the 8th International Conference on Rigorous State-Based Methods, ABZ 2021, which was planned to take place in Ulm, Germany, during June 6-11, 2021. The conference changed to an online format due to the COVID-19 pandemic. The 6 full and 8 short papers included in this volume were carefully reviewed and selected from 18 submissions. The proceedings also include 3 PhD symposium contributions. They deal with state-based and machine-based formal methods, mainly Abstract State Machines (ASM), Alloy, B, TLA+, VDM, and Z.

Labour Law and Industrial Relations in Recessionary Times Peter Lang GmbH, Internationaler Verlag Der Wissenschaften

This volume focuses on the study of linguistic manipulation, persuasion and power in the written texts of professional communication, bringing forth studies on the language of various specialised fields such as law and arbitration, engineering, economics, advertising, business, politics, medicine, social work, education and the media.
