BSC for Investment Support of Port and
...Ports are becoming increasingly
regional in their dynamics, which
represents a new development from
their traditional local function, namely as
industrial complexes. For instance, the
port of Hong Kong owes its wealth to its
natural site and its geographical position
of a transit harbor for southern
China.Port Terminals | The Geography of
Transport SystemsTool for Regional
Development This type of coastal
industrialization produced industrial
complexes around areas that relied on
shipping for profits. The industrial policy
in Japan therefore began to focus on
these four major industrial belts. The
development and maintenance of ports
also began to reflect this emphasis on
