For courses in Introductory Psychology The most learner-centered and assessment-driven brief text available Throughout Psychology: An Exploration , 4th Edition, Sandra Ciccarelli and J. Noland White employ a learner-centered, assessment-driven approach that maximizes student engagement, and helps educators keep students on track. In this brief text, the authors draw students into the discipline by showing how psychology relates to their own lives. Clear learning objectives, based on the recommended APA undergraduate learning outcomes, guide students through the material. And assessment tied to these learning objectives lets students check their understanding, while allowing instructors to monitor class progress and intervene when necessary to bolster student performance. Available to package with Psychology: An Exploration, 4th Edition, MyLab(TM) Psychology is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. MyLab Psychology is ideal for courses requiring robust assessments. Note You are purchasing a standalone product; MyLab does not come packaged with this content. This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Helping students become scientifically literate. Psychological Science: Modeling Scientific Literacy helps students view psychology as a practical, modern science—and gives them the tools to better understand their world. Organized around a scientific literacy model, the text's content and features encourage scientific inquiry, prompting students to ask a series of scientific-minded questions about each topic. All aspects of the book—the topics covered, learning objectives, quizzes, even the modular format—have been developed to enable students to categorize the overwhelming amount of information they encounter, and to ignite their interest in psychological science. To ensure that scientific literacy is at the core, content and features are organized around a scientific literacy model asking students: o What do we know about this? o How can science help to explain this? o Can we critically evaluate the evidence? o Why is this relevant? Teaching & Learning Experience Personalize Learning – The new MyPsychLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking – Features have been carefully chosen to reinforce the development of complex thinking skills. Engage Students – Substantial end-of-chapter materials and the new MyPsychLab Video Series provide an interactive educational experience for students. YouTube links direct students to highly relevant and engaging video content. Explore Research – Research methodology is included and explored throughout the text to improve students' scientific literacy skills. Understand Culture and Diversity - A Biopsychosocial Perspectives feature reminds students that behavior is affected by biology, individual thoughts and experiences, and social and cultural factors. Support Instructors - An Annotated Instructor's Edition, Test Bank (both print and computerized), Interactive PowerPoints, and the new MyPsychLab Video Series are just some of the resources available which provide instructors with the ultimate supplements package. Oltmanns and Emery bring both the science and the personal aspects of abnormal psychology to life with a focus on evidence-based practice and emerging research. By emphasizing that abnormal psychology is not about them, it's about all of us. Using extensive case studies, they present the most cutting edge information on abnormal psychology by covering methods and treatment in context. Organized around the way students learn, this ground breaking text integrates the biological, psychological, and social perspectives in one concurrent story. With a focus on critical thinking, Oltmanns and Emery prepare students for the DSM-V and beyond by addressing key issues and concepts that will remain, even as diagnostic criteria change.

"Before, I was seldom able to use multimedia in my classroom because our department has a small budget. Due to this exciting new tool, I now have access to every imaginable resource needed to teach and administer a psychology course!" "Teresa R. Stalvey, Behavioral Science Instructor, North Florida Community College" "The fact that the student names are automatically entered into the grade book is a relief. Being able to check when a student logged in eliminates a few arguments. No more copying syllabi! It's all there for them. I've easily posted class notes, reminders of tests and dates for assignments." "Mary-Ellen O'Sullivan, Psychology Department, Southern Connecticut State University" "You have finally organized all the materials that have been stand-alone items for many years." "Fred Whitford, Montana State University" "This has been the best decision I've made on a textbook. Thanks again for introducing me to this concept." "Kathy Manuel, Psychology Department, Bossier Parish Community College"

For courses in Introductory Psychology Help students become scientifically literate. An Introduction to Psychological Science helps students view psychology as a practical, modern science--and gives them the tools to better understand our world. Throughout the second edition, authors Krause, Corts, Smith and Dolderman continue to emphasize scientific literacy: the ability not only to define scientific terminology, but also to understand how it functions, to evaluate it critically, and to apply it to personal and societal matters. In addition to helping students master key course objectives, learning how to think scientifically will enable students to categorize the overwhelming amount of

information they encounter, as well as ignite their interest in psychological science. An Introduction to Psychological Science, 2ce is also available via REVEL(tm), an immersive learning experience designed for the way today's students read, think, and learn.
