*Victims' Rights: A Documentary and Reference Guide* Crime Victims: An Introduction to Victimology The Routledge Handbook on Victims' Issues in Criminal Justice is a comprehensive and authoritative handbook on current issues, with a distinctive emphasis on the delivery of suitable and effective services. The editor provides an introduction and conclusion to the handbook, synthesizing original contributions from current leaders in the field, surveying victims' rights in the United States, victim participation in the criminal justice system, victims' welfare and needs, and most notably the services that have been developed in response. A section on special populations in the United States brings focus to current and emerging issues faced within the country, while a section covering international and transnational victimization explores globalization and the implications of other legal traditions and systems. This handbook addresses the crucial and complex topic of victims' issues, examining both societal and governmental reactions to victims' concerns and acquainting readers with the issues that discord may cause, and how they affect the provision of services. This book will serve as an essential reference for academics and practitioners working with crime victims, as well as for students taking courses in victimology, criminology, sociology, and related subjects. A practical and applied introduction to criminal justice Introduction to Criminal Justice: Practice and Process shows you how to think practically about the criminal justice system by offering you a proven, problem-based approach to learning. Bestselling authors Kenneth J. Peak and Tamara D. Madensen draw on their many years of combined practitioner and academic experience to explain the importance of criminal justice and show how key trends, emerging issues, historical background, and practical lessons can be applied in the field. New to the Third Edition: An emphasis on constitutional policing, legitimacy, and procedural justice stresses the importance for police to develop a "guardian" mindset over a "soldier" mindset. New discussions of contemporary criminological theories—such as social structure theories, social process theories, social conflict theories, feminist theories, and environmental criminology theories—provide you with a concise explanation on why people commit crimes and how to prevent them in the modern world. An in-depth view of three particularly challenging problems and policy issues—terrorism, the mentally ill population, and illegal immigration—demonstrate how today's society and the criminal justice system are affected by these issues and what can be done to address the problems. New examples and case studies of ethical dilemmas illustrate today's climate of distrust, dissension, and dysfunction to encourage you to think critically about what is considered "ethical". New video interviews with criminal justice professionals offer you career advice, provide you with insights into a variety of career paths, and discuss challenges and misconceptions of each profession. *Women and Crime* SAGE

Although violent crime in the United States has declined over the past five years, certain groups appear to remain at disproportionately high risk for violent victimization. In the United States, people with developmental disabilities—such as mental retardation, autism, cerebral palsy, epilepsy, and severe learning disabilities may be included in this group. While the scientific evidence is scanty, a handful of studies from the United States, Canada, Australia, and Great Britain consistently find high rates of violence and abuse affecting people with these kinds of disabilities. A number of social and demographic trends are converging that may worsen the situation considerably over the next several years. The prevalence of developmental disabilities has increased in low-income populations, due to a number of factors, such as poor prenatal nutrition, lack of access to health care or better perinatal care for some fragile babies, and increases in child abuse and substance

abuse during pregnancy. For example, a recent report of the California State Council on Developmental Disabilities found that during the past decade, while the state population increased by 20 percent, the number of persons with developmental disabilities in California increased by 52 percent and the population segment with mild mental retardation doubled. Because of a growing concern among parents and advocates regarding possible high rates of crime victimization among persons with developmental disabilities, Congress, through the Crime Victims with Disabilities Awareness Act of 1998, requested that the National Research Council of the National Academy of Sciences conduct a study to increase knowledge and information about crimes against individuals with developmental disabilities that will be useful in developing new strategies to reduce the incidence of crimes against those individuals. Crime Victims with Developmental Disabilities summarizes the workshop and addresses the following issues: (1) the nature and extent of crimes against individuals with developmental disabilities; (2) the risk factors associated with victimization of individuals with developmental disabilities; (3) the manner in which the justice system responds to crimes against individuals with disabilities; and (4) the means by which states may establish and maintain a centralized computer database on the incidence of crimes against individuals with disabilities within a state.

This book offers unparalleled insight into the ways in which hate crime affects individuals and communities across the world. Drawing from the testimonies of more than 2,000 victims of hate crime, the book identifies the physical, emotional and community-level harms associated with hate crimes and key implications for justice in the context of punitive, restorative, rehabilitative and educative interventions. Hate crime constitutes one of the biggest global challenges of our time and blights the lives of millions of people across the world. Within this context the book generates important new knowledge on victims' experiences and expectations, and uses its compelling evidence-base to identify fresh ways of understanding, researching and responding to hate crime. It also documents the sensitivities associated with undertaking complex fieldwork of this nature, and in doing so offers an authentic account of the very necessary – and sometimes unconventional – steps which are fundamental to the process of engaging with 'hard-to-reach' communities.

'Focusing on key issues, themes and concepts within victimology, this edited collection provides an accessible and comprehensive critical analysis of crucial areas within victimisation. The main theories are related to, and integrated with, empirical research in an engaging style.' - Dr Anette Ballinger, Keele University 'This book achieves the rare feat of helping its readers without patronising them. The aids to the reader - tables, boxes, glossaries, questions, and suggestions for further reading - will prove genuinely helpful to students and their teachers, but they appear within a text that is theoretically informed as well as comprehensive and up to date in its coverage. It deserves to be widely read and used in the teaching of criminology, victimology, and criminal justice' - Professor David Smith, University of Lancaster, UK. Organized around the intersecting social divisions of class, race, age and gender, the book provides an engaging and authoritative overview of the nature of victimisation in society. In addition to a review of the major theoretical developments in relation to understanding aspects of victimization in society, individual chapters explore the political and social context of victimisation and the historical, comparative and contemporary research and scholarly work on it. Each chapter includes the following: - Background and glossary - Theory, research and policy review - 'Thinking critically about...' sections - Reflections and future research directions - Summary and conclusions - Annotated bibliography Victims, Crime and Society is the essential text on victims for students of criminology, criminal justice, community safety, youth justice and related areas.

In recent years far more attention has been paid to victims of crime both in terms of awareness of the effect of crime upon their lives, and in changes that have been made to the criminal justice system to improve their rights and treatment. This process seems set to continue, with legislative plans announced to rebalance the criminal justice system in favour of the victim. This latest book in the Cambridge Criminal Justice Series brings together leading authorities in the field to review the role of the victim in the criminal justice system in the context of these developments.

"Profoundly necessary." —Michelle Alexander, New York Times columnist and author of *The New Jim Crow* In the eloquent tradition of Bryan Stevenson's *Just Mercy*, an award-winning leader in the movement to end mass incarceration takes on the vexing problem of violent crime. Although over half the people incarcerated in America today have committed violent offenses, the focus of reformers has been almost entirely on nonviolent and drug offenses. Danielle Sered's brilliant and groundbreaking *Until We Reckon* steers directly and unapologetically into the question of violence, offering approaches that will help end mass incarceration and increase safety. Widely recognized as one of the leading proponents of a restorative approach to violent crime, Sered asks us to reconsider the purposes of incarceration and argues persuasively that the needs of survivors of violent crime are better met by asking people who commit violence to accept responsibility for their actions and make amends in ways that are meaningful to those they have hurt—none of which happens in the context of a criminal trial or a prison sentence. Sered launched and directs *Common Justice*, one of the few organizations offering alternatives to incarceration for people who commit serious violent crime and which has produced immensely promising results. Critically, Sered argues that the reckoning owed is not only on the part of those who have committed violence, but also by our nation's overreliance on incarceration to produce safety—at great cost to communities, survivors, racial equity, and the very fabric of our democracy.

This second edition of the *Handbook of Victims and Victimology* presents a comprehensively revised and updated set of essays, bringing together internationally recognised scholars and practitioners to offer substantial research informed overviews within their specialist fields of investigation. This handbook is divided into five parts, with each part addressing a different theme within victimology: Part I offers a scene-setting exploration of new developments in the field, enduring issues that remain relatively unchanged and the gaps and traps within the contemporary victimological agenda. Part II examines of the complex dimensions to victim experiences as structured by gender, age, ethnicity, sexuality and intersectionality. Part III reflects on the problems and possibilities of formulating policy responses in the light of the changing appreciation of the nature and extent of victimhood. Part IV focused on the value of a comparative lens and the problems and possibilities of victim policies when seen through this lens, explored along three geographical axes: Europe, Australia and Asia. Part V considers other ways of thinking about who counts as a victim and what counts as victimhood and extends the boundaries of the victimological imagination outward. Building on the success of the previous edition, this book provides an international focus on cutting-edge issues in the field of victimology. Including brand new chapters on intersectionality, child victims, sexuality, hate crime and crimes of the powerful, this handbook is essential reading for students and academics studying victims and victimology and an essential reference tool for those working within the victim support environment.

Victims of crime may experience a wide variety of traumas that result in physical, sexual, financial, psychological, emotional, and/or social consequences. While the types of trauma can vary greatly and include lesser-known forms such as vicarious and secondary trauma, identifying and recognizing victims can be complicated. Throughout this book, experts and professionals from academia and the fields of criminal justice, social work, and mental health acknowledge victims historically overlooked by society, political movements, the media, and/or the criminal justice system - we acknowledge the invisible victims. *Invisible Victims and the Pursuit of Justice: Analyzing Frequently Victimized Yet Rarely Discussed Populations* pioneers the assertion that our view of victims needs to be more inclusive by exploring invisible victims that are rarely, if ever, a focus of discussions in traditional victimology textbooks. To educate the reader and begin working toward positive change, each chapter identifies an invisible victim and provides the background, controversies, issues, solutions, and areas of future research. It is crucial to identify these gaps in the field as some of the most victimized populations remain absent from important dialogue on crime victims. This book is appropriate for a wide range of readership including but not limited to criminologists, victim service providers, psychologists, sociologists, social workers, advocate groups, law enforcement, lawyers, defense attorneys, criminal justice practitioners, academicians, researchers, and students studying criminology, criminal justice, victimology, social work, psychology, and social justice.

*Women and Crime: A Text/Reader*, part of the text/reader series in criminology and criminal justice, incorporates contemporary and classic readings (some including policy implications) accompanied by student-friendly authored text. This unique format provides a theoretical framework and context for students. The comprehensive coverage of the book includes the history and theories of female offending, offenders and their crimes, processing and sentencing of female offenders, women in prison, women and victimization, women and work in the criminal justice system, juveniles and crime, and international crime. Race and diversity will be an underlying theme throughout the text. *Sexual Assault* Cengage Learning

Most discourses on victims in international criminal justice take the subject of victims for granted, as an identity and category existing exogenously to the judicial process. This book takes a different approach. Through a close reading of the institutional practices of one particular court, it demonstrates how court practices produce the subjectivity of the victim, a subjectivity that is profoundly of law and endogenous to the enterprise of international criminal justice. Furthermore, by situating these figurations within the larger aspirations of the court, the book shows how victims have come to constitute and represent the link between international criminal law and the enterprise of transitional justice. The book takes as its primary example the Extraordinary Chambers in the Courts of Cambodia (ECCC), or the Khmer Rouge Tribunal as it is also called. Focusing on the representation of victims in crimes against humanity, victim participation and photographic images, the book engages with a range of debates and scholarship in law, feminist theory and cultural legal theory. Furthermore, by paying attention to a broader range of institutional practices, *Figuring Victims* makes an innovative scholarly contribution to the debates on the roles and purposes of international criminal justice.
