In the presidential election of 2008 America seemed ready to elevate a woman to the presidency or vice presidency and—with Hillary Clinton and Sarah Palin—was on the verge of actually doing so. Words like inevitable and phenomenon were in the air and the

political and cultural stars seemed to be aligned. Why didn't it happen? What will it take to make it happen soon? In a probing analysis sure to ignite controversy, acclaimed White House correspondent Anne Kornblut argues that the optimists are blind to formidable obstacles that still stand in the way of any woman who aims for America's highest political offices. And she makes clear exactly which strategies and common assumptions will need to change if a woman intends to break

through the "highest, hardest glass ceiling" of all. Delving deep inside the Clinton and Palin campaigns, Kornblut reveals: • the strategists' mishandling of their candidates as women by failing to strike the right balance between femininity and toughness • Clinton's weathering of a series of stinging gender-based attacks, until accusations of "pimping out" her daughter, Chelsea, finally brought her to tears • that Barack Obama was celebrated for his "historic" win in Iowa, even though

it was not the first time an African American had won a caucus, but few noticed when Clinton became the first woman to win a primary in New Hampshire

- that Palin was chosen solely by men, none of whom had experience in running women for office

Drawing from exclusive interviews with prominent women in both parties, Kornblut pinpoints where politically ambitious American women have gone wrong and what it will take to put them on track to the ultimate prize: the presidency. Former secretary of state Condoleezza Rice asserts: "We crossed the bar on African Americans some time ago. I'm not quite sure we've crossed it on women." House Speaker Nancy Pelosi remarks on the "suit of armor" women must don to survive the sexism and viciousness of politics. Homeland Security Director Janet Napolitano confronts the false rumors that she is a lesbian and reveals what an invigorating "kick in the pants" it is to be in politics. And California gubernatorial candidate Meg Whitman, the former head of eBay, compares politics to business: "It feels to me, thus far, as less of a meritocracy and more of a popularity contest. More of a little bit of an old boys'

club." Kornblut identifies the surprising realities of gender politics, such as the harsh treatment female candidates often receive from women voters, the gap between the United States and other countries when it comes to the electability of women, the "mommy penalty" that handicaps women candidates with young children, and the special appeal that women with law enforcement backgrounds have with voters. Notes from the Cracked Ceiling reveals that the highly touted new era of gender-equal politics never got as far as was commonly perceived and is now in full retreat. It is essential reading for anyone who cares about politics and the limits for women that persist.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning

In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and

learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

These hearing transcripts present testimony to the Senate Committee on Agriculture regarding the School Lunch and Breakfast Programs. Statements were made by several senators, the president of the American School Food Service Association (Connecticut); a school food service program director (Florida); the director of nutrition and education for the American School Food Service Association (Virginia); the director of the Children's Nutrition Research Center (Texas); the vice president of Food Operations at Disneyland Resort and Concept Development (California); and an assistant professor of clinical dietetics and nutrition, University of Pittsburgh (Pennsylvania).

Witnesses maintained that the Nutrition Education and Training Program needs funding to maintain its current service level. It is necessary to modify the School Lunch Program to encourage student

participation, make it easier for schools to qualify, and to reduce the administrative burden. Testimony also indicated that breakfast programs are vital to student nutrition, academic performance, and school attendance. School food service has become more efficient and more consumer-oriented, has expanded to supply meals to new audiences, and has increased the flexibility of service delivery. However, it is necessary to integrate food service within the educational day to enhance student nutrition knowledge and practice. Offering food choices may reduce food waste. The solution to major childhood nutritional problems is to apply current information to improve children's diets and to support nutrition research. An appendix to the transcripts contains additional statements, letters, and materials submitted. (KB)

Based on Stanford University psychologist  
Kelly McGonigal's wildly popular course  
"The Science of Willpower," The Willpower  
Instinct is the first book to explain the

science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, *The Willpower Instinct* explains exactly what willpower is, how it works, and why it matters. For example, readers will learn:

- Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep.
- Willpower is not an unlimited resource. Too much self-control can actually be bad for your health.
- Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower
- Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control.
- Giving up control is sometimes the only way to gain self-control.
- Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models. In the groundbreaking tradition of *Getting Things Done*, *The Willpower Instinct* combines

life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

The stunning, never before told story of the quixotic attempt to recreate small-town America in the heart of the Amazon In 1927, Henry Ford, the richest man in the world, bought a tract of land twice the size of Delaware in the Brazilian Amazon. His intention was to grow rubber, but the project rapidly evolved into a more ambitious bid to export America itself,

along with its golf courses, ice-cream shops, bandstands, indoor plumbing, and Model Ts rolling down broad streets. Fordlandia, as the settlement was called, quickly became the site of an epic clash. On one side was the car magnate, lean, austere, the man who reduced industrial production to its simplest motions; on the other, the Amazon, lush, extravagant, the most complex ecological system on the planet. Ford's early success in imposing time clocks and square dances on the jungle soon collapsed, as indigenous workers, rejecting his midwestern Puritanism, turned the place into a ribald tropical boomtown. Fordlandia's eventual demise as a rubber plantation foreshadowed the practices that today are laying waste to the rain forest. More than a parable of one man's arrogant attempt to force his will on the natural world, Fordlandia depicts a desperate quest to salvage the bygone America that the Ford factory system did much to dispatch. As Greg Grandin shows in this gripping and mordantly observed history, Ford's great delusion was not that the Amazon could be tamed but that the forces of capitalism, once released, might yet be contained.

Fordlandia is a 2009 National Book Award Finalist for Nonfiction.

[How to Start & Manage a Sandwich Shop/deli Business](#) John Wiley & Sons

A designer who's "turned pie crust decorating into an art form" shows how to embellish an ordinary crust—for a creation as beautiful as any cake (Martha Stewart). Everyone knows that serving a pie for dessert makes guests happy. And serving one with a beautifully designed crust that makes guests swoon is even better. Pies can be as stunningly attractive as the most decorative cakes with the use of some basic techniques and the appropriate care when working with pie dough. The recipes and techniques in this book give any home baker the tools to create breathtaking works of pie art. From preparation of the dough to the last moments of baking, all methods are clearly presented using step-by-step photographs. A flat surface, rolling pin, sharp knife, and cookie cutters of different sizes and shapes make embellishing an ordinary pie crust easy. The 25 designs in this book, arranged by three levels of difficulty, range from graphic art styles to seasonal-inspired florals—offering the first

guide to creating these stunning works of edible art. "[A] gorgeous cookbook...As the book progresses, so do your skills."

Python Crash Course is a fast-paced, thorough introduction to Python that will have you writing programs, solving problems, and making things that work in no time. In the first half of the book, you'll learn about basic programming concepts, such as lists, dictionaries, classes, and loops, and practice writing clean and readable code with exercises for each topic. You'll also learn how to make your programs interactive and how to test your code safely before adding it to a project. In the second half of the book, you'll put your new knowledge into practice with three substantial projects: a Space Invaders-inspired arcade game, data visualizations with Python's super-handful libraries, and a simple web app you can deploy online. As you work through Python Crash Course you'll learn how to: -Use powerful Python libraries and tools, including matplotlib, NumPy, and Pygal -Make 2D games that respond to keypresses and mouse clicks, and that grow more difficult as the game progresses -Work with data to generate

interactive visualizations –Create and customize Web apps and deploy them safely online –Deal with mistakes and errors so you can solve your own programming problems If you've been thinking seriously about digging into programming, Python Crash Course will get you up to speed and have you writing real programs fast. Why wait any longer? Start your engines and code! Uses Python 2 and 3

[Ben & Jerry's Homemade Ice Cream & Dessert Book](#) Lewis & Renn Associates Incorporated  
George Orwell set out 'to make political writing into an art', and to a wide extent

this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the Orwell's

Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times
