Books are always our best companion. The idea of writing or editing a book remains always in our mind. Our students come from semi-urban background and not very fluent in English reading, writing and speaking. English is not just a Second language to them, but it is completely a foreign language to the rural background pupils. So, we research innovative techniques to make them familiar. This continuous research motivates us to edit a book on the topic. We can well see the potential of the book as it is not just about the 'Teaching' of English but basically about 'Learning' English as such. But of course it will be very helpful for ELT, per se. The book making is a long process and it needs a careful study of area, topics and research methodologies, along with very intensive and extensive genuine research work before we start. The very first thing which struck our mind was to choose the topic which could be beneficial for students and teachers both. Our undergraduate students, who actually lack Basic English speaking, reading and writing standard, gave us many new topics to write. They and their problems motivated us to collect opinions of our fellow colleagues on the wider perspectives of the chosen topic and edit a book on the subject. We have endeavored to cover many areas which need to be given emphasize when we teach or learn English. Our main focus is to give tricks and useful tips to enhance and learn English as a second language.

Grammar is a subject that even the best English users tend to neglect. This book can be used as a general reference book by all. For students, it is a grammar guide to refer to any topic at a glance. The description of every rule is easily understandable without teachers' help. It covers all the grammar rules for day-to-day requirements and all parts of speech with plenty of examples. The pronouns are very well-explained, especially nominative and objective pronouns, which are often confusing for many. The case is similar with verbs and adverbs.

Reduce your accent when pronouncing English, with the expertise from an acclaimed specialist in the area Developed by acclaimed speech consultant and accent specialist Susan Cameron, *Perfecting Your English Pronunciation* features her successful method, which focuses on the anatomical placement of sound and on the musculature used in articulation. Where other accent reduction/English pronunciation products rely on solely mimicking of audio sounds, this work focuses visually, audibly, and narratively on the physical ability to speak English, noting that many sounds of English may be difficult for you because some tongue positions used in English may not be used in your native language. The 45-minute DVD introduces you to mouth and jaw exercises to prepare you for English, then demonstrates mouth formations and tongue placement using other nonnative speakers like you. You will see and hear how English sounds--enabling you to become more and more comfortable conversing with native English speakers as you go through the program.

The unheard history of how race and racism are constructed from sound and maintained through the listening ear. Race is a visual phenomenon, the ability to see "difference." At least that is what conventional wisdom has lead us to believe. Yet, *The Sonic Color Line* argues that American ideologies of white supremacy are just as dependent on what we hear--voices, musical taste,

volume—as they are on skin color or hair texture. Reinforcing compelling new ideas about the relationship between race and sound with meticulous historical research, Jennifer Lynn Stoever helps us to better understand how sound and listening not only register the racial politics of our world, but actively produce them. Through analysis of the historical traces of sounds of African American performers, Stoever reveals a host of racialized aural representations operating at the level of the unseen—the sonic color line—and exposes the racialized listening practices she figures as “the listening ear.” Using an innovative multimedia archive spanning 100 years of American history (1845-1945) and several artistic genres—the slave narrative, opera, the novel, so-called “dialect stories,” folk and blues, early sound cinema, and radio drama—The Sonic Color Line explores how black thinkers conceived the cultural politics of listening at work during slavery, Reconstruction, and Jim Crow. By amplifying Harriet Jacobs, Frederick Douglass, Elizabeth Taylor Greenfield, Charles Chesnutt, The Fisk Jubilee Singers, Ann Petry, W.E.B. Du Bois, and Lena Horne as agents and theorists of sound, Stoever provides a new perspective on key canonical works in African American literary history. In the process, she radically revises the established historiography of sound studies. The Sonic Color Line sounds out how Americans have created, heard, and resisted “race,” so that we may hear our contemporary world differently.
