The 7th edition of this trusted introduction to personality centers on the premise that personality theories are a reflection of the unique cultural background, family experiences, personalities, and professional training of their originators. The book begins by acquainting students with the meaning of personality and providing them with a solid foundation for understanding the nature of theory, as well as its crucial contributions to science. The chapters that follow present twenty-three major theories: coverage of each theory also encompasses a biographical sketch of each theorist, related research, and applications to real life. Richard Ryckman's theory by theory approach to personality carefully guides students through major theories in a way that helps them develop a comprehensive understanding of personality. Ryckman's personal writing style presents the major theories in a straightforward way helping readers more easily distinguish between them. At the beginning of the text, Ryckman provides a framework that defines personality, and emphasizes the science of personality (including the interrelation between research and theory). Then, he introduces each major theoretical position with an objective overview of the theorist's basic concepts and principles. Ryckman concludes by noting the ways in which the different theories stimulate additional research efforts, and by presenting five current research trends that have resulted from the work of these earlier theorists. The text aims to introduce the primary theoretical perspectives that guide contemporary research on personality and individual differences, while reviewing a wide range of contemporary scientific findings on personality. Throughout the text, emphasis is placed on how theory and research inform one another. Rich case material shows how the theoretical conceptions yield insight into the lives of individual persons.
