The Teacher Book This booklet contains answers and transcripts for all exercises. The Spanish Listening Booklet matches to the minutest details the content of the 19 units included in the best-selling workbook for beginner-to-pre-intermediate learners "Spanish sentence builders", by the same authors. For best results, the two books should be used together. This book fully implements Dr Conti's popular approach to listening-skills instruction, L.A.M. (aka Listening-As-Modelling), laid out in his seminal work: "Breaking the Sound Barrier: Teaching Learners how to Listen" (Conti and Smith, 2019). L.A.M. is based on the

concept that listening instruction should train students in the mastery of the key micro-listening skills identified by cognitive psychologists. Each unit contains around 13 listening tasks, which provide continuous and extensive recycling of the target constructions and vocabulary items and address the development of the key listening micro-skills. The tasks include engaging and tested Conti classics such as: "Spot the intruder", "Missing details", "Faulty transcript", "Break the flow", "Faulty translation", "Gapped translation" and "Listening slalom", alongside more traditional listening comprehension tasks.

Spanish Sentence Builders is a workbook aimed at beginner to pre-intermediate students co-authored by two modern languages educators with over 40 years of extensive classroom experience between the two, both in the UK and

internationally. This 'no-frills' book contains 19 units of work on very popular themes, jam-packed with graded vocabulary-building, reading, translation, retrieval practice and writing activities. Key vocabulary, lexical patterns and structures are recycled and interleaved throughout. Each unit includes: 1) a sentence builder modelling the target constructions; 2) a set of vocabulary building activities; 3) a set of narrow reading texts exploited through a range of tasks focusing on both the meaning and structural levels of the text; - a set of retrieval-practice translation tasks; 4) a set of writing tasks targeting essential micro-skills such as spelling, lexical retrieval, syntax, editing and communication of meaning. Based on the Extensive Processing Instruction (E.P.I.)

principle that learners learn best from comprehensible and highly patterned input flooded with the target linguistic features, the authors have carefully designed each and every text and activity to enable the student to process and produce each item many times over. This occurs throughout each unit of work as well as in smaller grammar, vocabulary and question-skills micro-units located at regular intervals in the book, which aim at reinforcing the understanding and retention of the target grammar, vocabulary and question patterns.
