 DNA evidence not only solves crimes—in  
 Sean Carroll's hands it will now end the  
 Evolution Wars. DNA, the genetic  
 blueprint of all creatures, is a stunningly  
 rich and detailed record of evolution.  
 Every change or new trait, from the  
 gaudy colors of tropical birds to our color  
 vision with which we admire them, is due

to changes in DNA that leave a record  
 and can be traced. Just as importantly,  
 the DNA evidence has revealed several  
 profound surprises about how evolution  
 actually works.
