API RP 551: 2016 [paper] - Kreisler Publications

This recommended practice (RP) addresses the special needs of

automated valves in refinery services. The knowledge and experience of the industry has been captured to provide proven solutions to well-known problems.

Section 2 of RP 554 provides considerations for the selection, specification, and installation of automatic control systems for use in refinery processes. Single-loop controllers, multiloop controllers, programmable controllers, and distributed control systems are discussed with relevant design and application engineering information.
