**MANN LEVY**

Routledge

The book offers a  
Psychosocial template for  
Perspectives those dealing  
on with the  
Peacebuilding aftermath of

armed conflict to look at peacebuilding through a psychosocial lens. This Volume, and the case studies that are in it, starts from the premise that armed conflict and the political violence that flows from it, are deeply contextual and that in dealing with the impact of armed conflict, context matters. The book argues for a conceptual shift, in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches: the contributors argue that such interventions and practices should in themselves shape social change. This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress. The chapters in this book describe experiences within very different contexts, including Guatemala, Jerusalem, Indian Kashmir, Mozambique, Northern Ireland, South Africa and Sri Lanka. The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster

wider social change. Psychosocial Perspectives on Peacebuilding is essential reading for social and peace psychologists, as well as for students and researchers in the field of conflict and peace studies, and for psychosocial practitioners and those working in post-conflict areas for NGO's.

### **Indonesia's Ascent**

Springer  
This is the first book to explore how religious

movements and actors shape and are shaped by aspects of global city dynamics. Theoretically grounded and empirically informed, Religion and the Global City advances discussions in the field of urban religion, and establishes future research directions. David Garbin and Anna Strhan bring together a wealth of ethnographically rich and vivid case studies in a diversity of

urban settings, in both Global North and Global South contexts. These case studies are drawn from both 'classical' global cities such as London and Paris, and also from large cosmopolitan metropolises - such as Bangalore, Rio de Janeiro, Lagos, Singapore and Hong Kong - which all constitute, in their own terms, powerful sites within the informational, cultural and moral

networked economies of contemporary globalization. The chapters explore some of the most pressing issues of our times: globalization and the role of global neo-liberal regimes; urban change and in particular the dramatic urbanization of Global South countries; and religious politics and religious revivalism associated, for instance, with transnational Islam or global Pentecostal/C

harismatic Christianity. **Corporate Governance and Investment Management** Routledge The International Science Congress Association organized the 2nd International Science Congress (ISC-2012) with 'Science and Technology - Challenges of 21st Century' as its focal theme. ISC-2012 was divided in 20 sections. A total number of 800 Research

Papers and 1200 registrations from 23 countries all over the world have been received. They was mainly from Bangladesh, Bulgariya, Cameroun, France, Greece, Iran, Iraq, Kazakhstan, Korea, Lithuania, Malaysia, Nigeria, Nepal, Phillipines, Pakistan, Poland, Romania, Slovakiya, USA, Ukraine, Venezuela, Turkey and India. OECD Publishing

**Future Challenges in Evaluating and Managing Sustainable Development in the Built Environment**

Simon and Schuster  
This book

compares two countries with striking parallels in economic and political outcomes, yet with some distinct features in terms of institutional structures, relative size, and culture. Therefore, this book forms a fruitful platform for the study of the similarities and differences in the economic and societal development of Japan and Finland. Despite their geographic distance from one another

and the aforementioned differences, both countries experienced rather similar economic and societal development patterns after the Second World War. The study of these societies both individually and through commonalities will provide a unique perspective on the emergence of modern economies and institutions. The book provides comprehensive coverage on issues such as

welfare state formation and society, security and military spending, education system, industrial development, international trade, governmental economic policies, energy solutions, and bubbles and their collapse; thus, issues typical for these countries, as well as most modern states, studied from a longitudinal perspective. The book aims to answer a fundamental

question in social science: Why do there seem to be common trends and developmental paths among countries differing in size, culture, and economic structure? This book will provide insights for those seeking to decipher how the developments in their own countries came about and where they may be headed to. *Strong to Save: Maritime Mission in Hong Kong from*

*Whampoa Reach to the Mariners' Club* John Wiley & Sons  
 What do we really know about immigration? Immigration is one of the most controversial issues these days. Keeping them out. Taking back control. Building that wall. Whether the debate centres on economics or identity, it is often framed as 'Them' (bad immigrants) against 'Us' (good locals). But immigrants

aren't a burden or a threat – and if we make the right choices we all can thrive together. Drawing on first-hand reporting, compelling stories and the latest research and evidence from around the world, Philippe Legrain explains how immigration benefits us all in many ways. Immigrants start new businesses, bring different skills and help spark valuable new ideas. They help save lives –

including Boris Johnson's. As key workers, they keep coronavirus-stricken societies going, while young newcomers care – and help pay – for our ageing population. For sure, learning to live together can be tough. The book also addresses tricky issues such as 'illegal' immigration, what immigration entails for national identity, what newcomers need to do to fit in, and how

societies ought to adapt. And it suggests new ideas for how to persuade moderate sceptics about the merits of immigration. If patriotism means wanting the best for your country, we should be welcoming immigrants with open arms. It is time to close the gap between myth and reality – and, in the process, close the gap between 'Them' and 'Us'.  
**Challenges for**

## **Transport and Public Services**

Routledge

A secure supply of energy is essential for all nations, to sustain their economy, and indeed their very survival. This subject is especially important in the case of China, as China's booming economy and consequent demand for energy is affecting the whole world, and in turn potentially driving realignments in international

relations. Moreover, as this book argues, energy security should be considered more broadly, to include issues of sustainability, environmental protection and the domestic organisation of energy policy and energy supply. This book presents a comprehensive picture of China's energy security. It covers all energy sectors – coal, oil, gas, renewables; international relations with

all major sources of energy supply – the Middle East, Central Asia, Africa; and key areas of domestic policy making and supply. *Longitudinal perspectives* Routledge  
In this anthology, editors Kym Anderson and Vicente Pinilla have gathered together some of the world's leading wine economists and economic historians to examine the development of national wine industries before and during the two

waves of globalization. The empirically-based chapters analyse developments in all key wine-producing and consuming countries using a common methodology to explain long-term trends and cycles in wine production, consumption, and trade. The authors cover topics such as the role of new technologies, policies, institutions, as well as exchange rate

movements, international market developments, evolutions in grape varieties, and wine quality changes. The final chapter draws on an economic model of global wine markets, to project those markets to 2025 based on various assumptions about population and income growth, real exchange rates, and other factors. All authors of the book contributed to a unique global

database of annual data back to the mid-nineteenth century which has been compiled by the book editors.

**The Impact of American Strategic Re-Balance**

Routledge  
This two volume book presents an in-depth analysis of many of the most important issues facing today's shipping and port sectors. Volume 1 of Dynamic Shipping and Port Development

in the Globalized Economy focuses on the application of theory to practice in Maritime Logistics.

**Basic Principles of Topography**

Oxford University Press  
This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world. It shows how geography

and technology are intimately linked by examining the origins, growth, and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society.

The SAGE Handbook of Research in International Education

Oxford University Press  
The landscape of international education has changed significantly in the last ten

years and our understanding of concepts such as 'international', 'global' and 'multicultural' are being re-evaluated. Fully updated and revised, and now including new contributions from research in South East Asia, the Middle East, China, Japan, Australasia, and North America, the new edition of this handbook analyses the origins, interpretations and contributions of international education and

explores key contemporary developments, including: internationalism in the context of teaching and learning leadership, standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education,

including researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools.

**A  
Multidimensional  
Perspective**

Edward Elgar Publishing  
Capturing information from 27 OECD countries and key partner economies, the report presents key findings from the OECD Survey of Water

Resources Allocation and case studies of successful allocation reform.

OECD Studies on Water  
Water Resources Allocation  
Sharing Risks and Opportunities

Edward Elgar Publishing  
This book presents a critical analysis of the 'resource curse' doctrine and a review of the international evidence on oil and urban development to examine the role of oil on property development

and rights in West Africa's new oil metropolis - Sekondi-Takoradi, Ghana. It seeks answers to the following questions: In what ways did the city come into existence? What changes to property rights are oil prospecting, explorations, and production introducing in the 21st century? How do the effects vary across different social classes and spectrums? To what extent are local and

national institutions able to shape, restrain, and constrain trans-national oil-related accumulation and its effects on property in land, property in housing (residential, leisure, and commercial), and property in labour? How do these processes connect with the entire urban system in Ghana? This book shows how institutions of varying degrees of power interact to govern land, housing, and labour in

the city, and analyses how efficient, sustainable, and equitable the outcomes of these interactions are. It is a comprehensive account of the tensions and contradictions in the main sectors of the urban economy, society, and environment in the booming Oil City and will be of interest to urban economists, development economists, real estate economists, Africanists and urbanists.

**Territorial  
Disputes in  
the South  
China Sea**

Bloomsbury  
Publishing  
This book  
gives a  
comprehensiv  
e overview of  
all relevant  
elements in  
topography  
and their  
practical  
application. It  
elaborates on  
the classical  
representation  
of terrain on  
maps such as  
cartographic  
projections,  
together with  
their  
classification,  
scale, and  
geographical  
elements. It is  
richly  
illustrated  
with

photographs,  
maps and  
figures, in  
which the  
theoretical  
explanations  
are clarified.  
Readers will  
become  
acquainted  
with the  
physical  
characteristics  
of the ground,  
i.e. tectonic  
and erosive  
shapes, the  
importance  
and  
classification  
of terrain,  
genetic  
(fluvial,  
abrasive,  
glacial, karst)  
and  
topographic  
types such as  
higher  
(mountains,  
hills, peaks)  
and lower

terrain  
(valleys,  
fields). In  
addition, the  
book  
discusses  
cartometry  
and  
coordinate  
systems,  
orientation in  
space  
(geographic,  
topographic,  
tactical)  
including by  
means of  
maps,  
instruments  
and the night  
sky and  
elaborates  
new  
techniques  
and  
technologies  
such as aerial  
photogramme  
tric imagery,  
global  
navigation  
satellite

systems and LiDAR. The book also includes methods for the practical execution of concrete measurement operations, such as determining position and movement on land with maps, compass and azimuth which makes it especially useful for practitioners and professionals, e.g., for landscape planning, military exercises, mountaineering, nature walks etc. As

such it offers a valuable guide not only for undergraduate students but also for researchers in the fields of geography, geosciences, geodesy, ecology, forestry and related areas looking for an overview on topography. Uniquely, the book also features an extensive glossary of topographical terms. SOUVENIR of 2nd International Science Congress (ISC-2012) Routledge After the

conflagration of Tito's Yugoslavia a medley of new and not-so-new states rose from the ashes. Some of the Yugoslav successor states have joined, or are about to enter, the European Union, while others are still struggling to define their national borders, symbols, and relationships with neighbouring states. Strategies of Symbolic Nation-building in South Eastern

Europe expands upon the existing body of nationalism studies and explores how successful these nation-building strategies have been in the last two decades. Relying on new quantitative research results, the contributors offer interdisciplinary analyses of symbolic nation-building in Albania, Bosnia-Herzegovina, Croatia, Kosovo, Macedonia,

Montenegro, and Serbia to show that whereas the citizens of some states have reached a consensus about the nation-building project other states remain fragmented and uncertain of when the process will end. A must-read not only for scholars of the region but policy makers and others interested in understanding the complex interplay of history, symbolic politics, and post-conflict transition.

The Promises and Limitations of the New Financial Economy  
Edward Elgar Publishing  
Why has democracy failed to reduce corruption in Kenya?  
Framing the challenge in game theoretical terms,  
Dominic Burbidge examines how mutual expectations between citizens dictate the success or failure of political reforms. Since 1992, Kenya

has conducted multiparty elections with the hope of promoting accountability and transparency in government. This is being undermined by ongoing corruption and an increasingly centralised state response to terrorism. Providing a nuanced assessment of democracy's difficult road in Kenya, Burbidge discusses the independent role being played by widespread social

expectations of corruption. Through tracking average views of the average person, it is possible to identify a threshold beyond which society suffers mutually reinforcing negative social expectations. This trend is the shadow of Kenyan democracy, and must be treated as a policy challenge on its own terms before institutional reforms will be successful. *Africa and the Sustainable*

*Development Goals* Springer The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans-Pacific Partnership (TPP). The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations. It is expected to eventually mature into a regional trade agreement covering the

entire Asia-Pacific. As of now, it does not include China and India, the two largest emerging markets and regional economies. The TPP has generated controversy for its excessive emphasis on trade issues, which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets. It has also been criticized for adopting a

negotiating style reflecting the US regulatory approach to international trade and also as a geo-political strategy of the US for supporting its strategic rebalancing towards Asia. From both economic and geo-political perspectives, the TPP has various significant implications for China and India that are examined in the book. This book sheds light on how China and India's entries in the TPP are

mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward-oriented reforms. The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India. Otherwise, the TPP and China and India

might walk divergent paths and trade and regional integration in Asia-Pacific may not ever converge. This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade.

**Volume 1:  
Applying  
Theory to  
Practice in  
Maritime  
Logistics**

Edward Elgar  
Publishing  
Future

Challenges in Sustainable Development within the Built Environment stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development. It examines the methods of evaluation, the use of technology, the creation of new models and the role of human factors for examining and developing the subject over the next

twenty years. *Processes, practices, and possibilities* John Wiley & Sons  
The interdisciplinary contributors to *Developmental Cities* offer a richly nuanced and critical account of how the urban has been integral to East Asian developmentalism, and, vice versa, how developmentalism has profoundly shaped the nature of the urban in East Asia. Accessibility, Equity and Efficiency

Routledge Change and development are going on all around us. On both an international platform, as well as at the local governmental and community level, governments, decision and policy makers constantly strive to improve the world in which we live, seeking to make it better and to improve quality of life. This book focuses on such development in the context

of localism in the UK. It strips the principle of local sustainability down to its constituent parts and considers the extent to which it can be said to be central to local life. As part of this, it presents the case for the importance of accountability and citizen participation in achieving objectives aligned with sustainability, and illustrates the relationships that these principles share. On this

foundation, it evaluates local government in the UK, as well as examples of community-led regeneration initiatives and bodies, and seeks to determine both the nature of their pursuit of sustainability and the extent to which accountability and citizen participation play a part in that pursuit. It shows that local sustainability is enhanced by accountability and citizen participation;

those principles ensuring that local people can be central to the process. Whilst its evaluations of local democratic systems in the UK reveal certain issues as regards the extent to which this is

reflected in practice, it at least demonstrates an enthusiasm and awareness of the important role that accountability and citizen participation can play in the process of local sustainability.

The book is aimed at legal academics, with relevance also to students in law, environmental politics and sustainable development, as well as those working in government policy and political practice.
