The Adventures of Sherlock Holmes is a collection of twelve short stories by Arthur Conan Doyle, first published on 14 October 1892. It contains the earliest short stories featuring the consulting detective Sherlock Holmes, which had been published in twelve monthly issues of The Strand Magazine from July 1891 to June 1892. The stories are collected in the same sequence, which is not supported by any fictional chronology. The only characters common to all twelve are Holmes and Dr. Watson and all are related in first-person narrative from Watson's point of view. In general the stories in The Adventures of Sherlock Holmes identify, and try to correct, social injustices. Holmes is portrayed as offering a new, fairer sense of justice. The stories were well received, and boosted the subscriptions figures of The Strand Magazine, prompting Doyle to be able to demand more money for his next set of stories. The first story, "A Scandal in Bohemia", includes the character of Irene Adler, who, despite being featured only within this one story by Doyle, is a prominent character in

modern Sherlock Holmes adaptations, generally as a love interest for Holmes. Doyle included four of the twelve stories from this collection in his twelve favourite Sherlock Holmes stories, picking "The Adventure of the Speckled Band" as his overall favourite.

Of the dealings of Edward Bellingham with William Monkhouse Lee, and of the cause of the great terror of Abercrombie Smith, it may be that no absolute and final judgment will ever be delivered. It is true that we have the full and clear narrative of Smith himself, and such corroboration as he could look for from Thomas Styles the servant, from the Reverend Plumtree Peterson, Fellow of Old's, and from such other people as chanced to gain some passing glance at this or that incident in a singular chain of events. Yet, in the main, the story must rest upon Smith alone, and the most will think that it is more likely that one brain, however outwardly sane, has some subtle warp in its texture, some strange flaw in its workings, than that the path of Nature

has been overstepped in open day in so famed a centre of learning and light as the University of Oxford.

The New York Times bestselling guide to thinking like literature's greatest detective. "Steven Pinker meets Sir Arthur Conan Doyle" (Boston Globe), by the author of *The Confidence Game*. No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes. But is his extraordinary intellect merely a gift of fiction, or can we learn to cultivate these abilities ourselves, to improve our lives at work and at home? We can, says psychologist and journalist Maria Konnikova, and in *Mastermind* she shows us how. Beginning with the "brain attic"—Holmes's metaphor for how we store information and organize knowledge—Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights. Drawing on twenty-first-century neuroscience and psychology, *Mastermind* explores Holmes's unique methods of ever-present mindfulness, astute observation, and logical deduction. In doing so, it shows how each of us, with some self-awareness and a little practice, can employ these same methods to sharpen our perceptions, solve difficult problems, and enhance our creative powers. For Holmes aficionados and casual readers alike, Konnikova reveals how the world's most keen-eyed detective can serve as an unparalleled guide to upgrading the mind.

Edgar Allan Poe's *The Murders in the Rue Morgue* represents the beginning of crime fiction. The mystery was first published in *Graham's Magazine* in 1841 and has been recognized as the first detective story. Poe referred to it as one of his "tales of

ratiocination." As the first fictional detective, Poe's Dupin displays many traits which became literary conventions in subsequent fictional detectives including Sherlock Holmes and Hercule Poirot. Many later characters, for example, follow Poe's model of the brilliant detective, his personal friend who serves as narrator, and the final revelation being presented before the reasoning that leads up to it. Dupin himself reappears in *The Mystery of Marie Rog t* and *The Purloined Letter*.

obtain a certain piece of information that would inevitably determine their whole future. But then an all-powerful malevolent AI, for reasons known only to itself, also enters the game... *Cat's Whirl*, a book indispensable for understanding the evolution of Spanish science fiction, is an original fusion of thriller, cyberpunk, and space opera, with unforgettable characters, and a frenetic pace and rhythm that never falter; a hybrid novel in which elements from distinct genres make a surprisingly harmonious whole. Originally published in 1995, it was the first cyberpunk novel in Spanish; a specially remarkable achievement in that it was also the first of Rodolfo Martínez' many novels, and yet was not afraid to tread new ground, and, moreover, to do so with great narrative confidence. Twenty years later, the story still retains its power, as fresh and exciting as ever.

El permiso de obras ya ha sido aprobado por el Consejo del Municipio de Waverley (Waverley Borough Council). La Fundación para la Preservación de Undershaw (en inglés, Undershaw Preservation Trust [UPT]), con Mark Gatiss [Sherlock de la BBC] como presidente de honor, está dedicada a la preservación y protección de este importante edificio literario y está haciendo campaña para conseguir que se revoque esta decisión, de manera que la casa pueda ser restaurada a su gloria original y disfrutada como la vivienda individual que Sir Arthur Conan Doyle pretendió que fuese. A Study in Scarlet is an 1887 detective novel by Scottish author Arthur Conan Doyle. Written in 1886, the story marks the first appearance of Sherlock Holmes and Dr. Watson, who would become the most famous detective duo in popular fiction. The book's title derives from a speech given by Holmes, a consulting detective, to his friend and chronicler Watson on the nature of his work, in which he describes the story's murder investigation as his "study in scarlet" "There's the scarlet thread of murder running through the colourless skein of life, and our duty is to unravel it, and isolate it, and expose every inch of it."
