Revision Notes for the FRCM

Intermediate SAQ Paper CRC Press

This book is a comprehensive revision guide for the MCEM Part B examination. The content is based on the College of Emergency Medicine curriculum and provides candidates with a concise and complete guide for exam preparation.

Revision Notes for MCEM Cambridge University Press

Designed to help medical students through their exams. Built around the successful 'Essential Revision Notes for MRCP', this title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of medicine at this level.

Complete Self Assessment for Medical and Surgical Finals, Second Edition Hodder Education

Succeeding in your Medical School Finals: Instant Revision Notes" provides medical students sitting finals with a quick and easy revision guide covering all topics examined in medical school finals examinations.

My Revision Notes: Cambridge Technicals Level 3 Health and Social Care Oxford University Press

Neurological disorders account for 10% of consultations in primary care and 20% of acute hospital admissions, yet there is good evidence that 'neurophobia' is common among medical students lost in unnecessary detail. This has led to neurology's long-established reputation as a difficult subject. This book is the antidote to neurophobia. It is divided

into four sections: Section I introduces the reader to clinical neurology by summarising the basic aspects of a neurological consultation including history and examination; Section II covers neurological signs related to cranial nerves, motor and sensory system and peripheral nerve lesions; Section III comprises the major and common diseases such as headache, epilepsy, stroke, Parkinson's disease and Multiple sclerosis; and Section IV addresses other main neurological problems. The scope of this book is limited to only the most fundamental principles and omits all superfluous detail - ideal for medical students needing a concise introduction to neurology and an overview for revision. Oxford Handbook of Medical Sciences CRC Press

In the face of information overload when revising for your final exams, what you want is a revision book that provides all the key facts you need to know and none that you don't. Complete Revision Notes for Medical and Surgical Finals does just that, presenting information in a stimulating way, which in turn enables easy recall. Structured by medical and surgical specialties, the contents are organised in a weighted fashion to reflect coverage in undergraduate curricula. With pharmacology and pathology integrated throughout, this second edition covers all the key topics in: Medicine * Surgery * Paediatrics * Obstetrics & Gynaecology * Psychiatry * Orthopaedics * ENT * Urology * Ophthalmology * Oncology * Public Health. Effective use is made of student-friendly codes and bullet points for easy information retrieval, and popular features including textboxes, summary

tables and clear and reproducible line diagrams have been retained and improved. Fully revised and updated with the latest medical information, and including new illustrations, Complete Revision Notes for Medical and Surgical Finals continues to provide an accessible and stimulating route to exam success. If you know what is in this book then you will know enough to pass your finals.

Revision Notes for MCEM CRC Press
Revision Notes in Intensive Care Medicine is a key resource for candidates preparing for postgraduate intensive care examinations. Mapped to the FFICM, EDIC and FCICM syllabuses, this title ensures candidates have all the information needed to prepare for their examinations. Information is presented in concise note form and bullet points with visually memorable tools, such as tables and diagrams, making revising and retaining key facts easier. Chapters are arranged into physiological systems, such as 'Respiratory Intensive Care' and 'Obstetric Intensive Care', and are subdivided into major clinical issues within each chapter so specific areas of further study can be found easily. Drawing from the authors' experiences as successful candidates, and carefully reviewed by consultants, Revision Notes in Intensive Care Medicine provides the foundation for postgraduate intensive care exam revision.

Complete Revision Notes for Medical and Surgical Finals Oxford University Press
"BIOLOGY REVISION NOTES FOR MEDICAL ENTRANCE EXAMS" is a comprehensive book with an in-depth analysis of all the core topics in Biology with the standard of 11th and 12th grades. This book makes the student well equipped to face all the entrance examinations like NEET, SAT, CBSE 11th

and 12th Board Exams, Cambridge AS/A/O Levels, Olympiad Exams. All the facts and essential points give in easy to revise form, saving the students valuable time just before exams. This is a perfect book that complements the textbook and guarantees you success in the medical entrance exams.

exam ready with answers to the activities available online

Essential Notes for Medical and Surgical Finals Oxford University Press

From reviews: '...this is an excellent book which I would unreservedly recommend to all CSA candidates. Its razor-sharp focus, user-friendly layout, emphasis on the RCGP curriculum and marking criteria make it a priceless resource for CSA candidates.' Dr Hamed Khan, GP Magazine, May 2011. CSA Revision Notes for the MRCGP is divided into medical subject areas and each section works through the personal, data gathering, diagnostic and clinical management skills required to pass the CSA exam. Each section finishes with role play scenarios so you can test your abilities with a colleague. The book is an essential revision source for anyone preparing for the CSA exam.

MRCP Part 2 Examination CRC Press
You have read your textbook and your course notes, now you need to test your knowledge and practise your exam technique. Complete Self Assessment for Medical and Surgical Finals is the ideal tool, examining all the core information medical students must know by the end of their final year via the most popular question formats. This new edition has been expanded to include 650 single best answers, 180 extended matching questions and over 50 x-ray interpretation questions. The book is structured into two main parts covering both medicine and surgery and chapters are logically separated by all the main specialties, with new chapters on obstetrics and gynaecology, paediatrics and psychiatry. The answer explanations help you commit the key facts to memory while the attractive colour layout makes this book a refreshing change from other self-assessment

titles. This book also complements Complete Revision Notes for Medical Finals, covering the same key facts so that the two books work together to ensure students are fully prepared. If you know what is in this book then you will know enough to pass your finals.

Part 1 MRCOG Revision Notes and Sample SBAs Oxford University Press

Revision Notes for the Final FRCR Part A summarises the core knowledge required for each of the six test papers that make up the exam, all in highly succinct bullet point format. The book takes the stress out of the revision process by providing candidates with a readymade set of highly synthesised and relevant notes that focus exclusively on the topics encountered in the exam.

Thoroughly updated for the second edition, each chapter has been authored by successful exam candidates and in turn edited by consultant radiologists to provide highly relevant, high quality, high yield revision notes. Key Points Chapters mirror the structure of the exam: chest & cardiovascular, musculoskeletal and trauma, gastrointestinal & hepatobiliary, paediatrics, genitourinary, gynaecology & breast, and neuroradiology/head & neck Only essential facts are presented and are based entirely upon past questions from the exam Each revision topic is presented in a concise manner and exhaustive lists of differential diagnoses have been distilled into those conditions most often tested

& Neil Patel.

Revision Notes for the Final FRCR JP
Medical Ltd

The Objective Structured Clinical Examination, or OSCE, is a familiar and often daunting experience for medical students. Finally, a book has been written which provides the essential information needed to manage OSCE stations competently, and will help you to pass your medical and surgical finals. Over 150 topics are covered at the perfect level of detail for revision for finals; using bullet-pointed checklists and a short and succinct writing style, the authors cover the most important points to remember about the key conditions you're likely to encounter during OSCEs in 2-4 clear pages per condition. Complete OSCE Skills for Medical and Surgical Finals covers the entire undergraduate syllabus for clinical finals under the following headings: - History - Examination - Procedures - Emergency - Interpretations - Communication skills - Obstetrics & Gynaecology - Paediatrics - Genitourinary medicine

Revision Notes for the DRCOG

Complete Revision Notes for Medical and Surgical Finals, Second Edition
Essential Revision Notes in Surgery for Medical Students provides detailed 'need to know' information for medical students. Third year students wishing to reinforce their knowledge will find it invaluable as will 5th years wanting to prepare for their examinations. This new title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of surgery at this level. It includes essential elements of theoretical knowledge and clinical diagnosis combined into a quick but thorough revision aid. Popular conditions are used to illustrate key

learning points. Concise information is contained within an easy to follow format. Each chapter is written by experienced authors within their fields.

Revision Notes for MRCP 2 PACES

CRC Press

Written by biomedical scientists and clinicians, with the purpose of disseminating the fundamental scientific principles that underpin medicine, this new edition of the Oxford Handbook of Medical Sciences provides a clear, easily digestible account of basic cell

physiology and biochemistry. It also includes an investigation of the traditional pillars of medicine (anatomy, physiology, biochemistry, pathology and pharmacology) integrated in the context of each of the major systems relevant to the human body. Cross-referenced to the Oxford Handbook of Clinical Medicine, and thoroughly illustrated, it is the ideal introduction to the medical sciences for medical students and biomedical scientists, as well as a valuable refresher for junior doctors.
