From Generation to Generation McGraw-Hill Education

The republication of From Generation to Generation-almost half a century after its first appearance in 1956-constitutes a good occasion for a look at the way in which problems of youth and generations developed in contemporary societies. In this brilliant, pioneering effort, different approaches in the social sciences to the analysis of these issues receive close scrutiny. Eisenstadt reexamines these issues by including in this edition several new chapters on this theme.

“As you turn the pages of this novel and get lost in Dana’s story, allow yourself to relive the horrors of slavery....Allow yourself to know the pain of our nation’s past.”—Tomi Adeyemi, New York Times bestseller and Hugo and Nebula award-winning author, from the new foreword This brand new package for young adults includes a redesigned interior for better readability, specially commissioned cover art by Carlos Fama, metallic stock cover, and spot gloss on cover elements “I lost an arm on my last trip home. My left arm.” Dana’s torment begins when she suddenly vanishes on her 26th birthday from California, 1976, and is dragged through time to antebellum Maryland to rescue a boy named Rufus, heir to a slaveowner’s plantation. She soon realizes the purpose of her summons to the past: protect Rufus to ensure his assault of her Black ancestor so that she may one day be born. As she endures the traumas of slavery and the soul-crushing normalization of savagery, Dana fights to keep her autonomy and return to the present. Blazing the trail for neo-slavery narratives like Colson Whitehead’s The Underground Railroad and Ta-Nehisi Coates’s The Water Dancer, Butler takes one of speculative fiction’s oldest tropes and infuses it with lasting depth and power. Dana not only experiences the cruelties of slavery on her skin but also grimly learns to accept it as a condition of her own existence in the present. “Where stories about American slavery are often gratuitous, reducing its horror to explicit violence and brutality, Kindred is controlled and precise” (New York Times). “Reading Octavia Butler taught me to dream big, and I think it’s absolutely necessary that everybody have that freedom and that willingness to dream.” —N. K. Jemisin

"It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature." Score: 95, 4 Stars. --Doody's "Understanding and recognizing transitions are at the heart of health care reform and this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory." Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of Nursing, presents for the first time in a single volume her original "transitions theory" that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, Transitions Theory covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models
