Critically celebrated
novelist Scott Spencer
delivers a Rosemary's

Baby-like novel of gothic
horror, set against the
backdrop of modern-day
Upper East Side
Manhattan. Alex and
Leslie Twisden lead
charmed lives-fabulous

jobs, a luxurious town house on Manhattan's Upper East Side, a passionate marriage. What they don't have is a child, and as they try one infertility treatment after the next, yearning turns into obsession. As a last-ditch attempt to make their dream of parenthood come true, Alex and Leslie travel deep into Slovenia, where they submit to a painful and terrifying procedure that finally gives them what they so fervently desire . . . but with awful consequences. Ten years later, cosseted

and adored but living in a house of secrets, the twins Adam and Alice find themselves locked into their rooms every night, with sounds coming from their parents' bedroom getting progressively louder, more violent, and more disturbing. Driven to a desperate search for answers, Adam and Alice set out on a quest to learn the true nature of the man and woman who raised them. Their discovery will upend everything they thought they knew about their parents and will reveal a

threat so horrible that it must be escaped, at any cost.

Farm Animals, Cage Birds and Other Small Pets Turner Publishing Company
Bred by the Billionaire Adora Garcia isn't interested in being the breeding vessel for some arrogant billionaire. Her single mother cleans Tobias Bennett's penthouse suite, so when Adora refuses his indecent proposal, he threatens to find a new maid. Tobias needs an heir, but he's

not ready to settle down, and certainly not interested in love. He doesn't have a plan until he sees the curvy brunette standing in his condo. Everything he wants, he gets, and he wants Adora. What he doesn't expect is the rush of possessiveness that takes him by storm. Will Adora give up her virginity to the ruthless businessman? Can Tobias open his heart after keeping it closed off for decades? Bred by the Bushmen After nearly ending her own life, Opal

books a soul-searching Alaskan wilderness tour. She's used to loneliness and rejection, but needs to learn how to love herself. When things go horribly wrong on the tour, she finds herself cold, alone, and facing certain death. Caleb and Damon have the perfect life. They live off the grid, far from society and its destructive influences. But it doesn't take long for the White brothers to realize what's missing. They need a woman, and crave a family of their own. When their dog

leads them to a lost hiker in the woods, they swear she was dropped straight from heaven. It will take a lot of hard convincing for the bushmen to prove life at their cabin is better than what Opal left behind in the city. And they won't take no for an answer. They plan on keeping Opal, loving her, and filling her with their baby.

An unconventional business book for the rebels and misfits—the Rare Breeds—who don't

fit the traditional mold, offering an approach that's anything but business as usual. "Brazen rant!" -- Seth Godin, New York Times bestselling author of *This is Marketing and What to Do When It's Your Turn* In every job you've ever had, you've been judged, labeled, and made to feel like an outsider. Defiant. Dangerous. Different. A real pain-in-the-ass. The message? To be successful, you've got to fundamentally change. But what if -- instead of conforming -- you learned

how to punch society's codes in the nose, run like a hooligan through the corridors of entrenched power, and succeed -- not by grinding down your prickly parts, but by going all-in on who you really are? "A guide for strategic rebellion." -- Mark Levy, founder of Levy Innovation and creator of Your Big Sexy Idea® Meet Sunny Bonnell and Ashleigh Hansberger, award-winning global brand consultants, founders of Motto, and authors of Rare Breed: A Guide to Success for the

Defiant, Dangerous, and Different. In this book, you'll come face-to-face with seven controversial virtues that are typically seen as ladder-burning, career-ending personality traits that -- convention says -- keep mavericks, oddballs, and visionaries like you from getting along, getting buy-in, and getting ahead. "A beautiful reminder that you are not alone." -- Charlamagne Tha God, New York Times bestselling author of Black Privilege Sunny and Ashleigh provide singular

insight into how you can flip the script and turn your so-called "vices" into your virtues, transforming your most "undesirable" flaws into the high-octane fuel of your success. In a world that wants to own you, you'll finally learn how to own yourself, through embracing all your parts -- not just the pretty ones. College dropouts and social misfits Sunny and Ashleigh provide front-row seats to their own counterintuitive rise from broke-ass outsiders to brand consultants for

iconic brands. Success, they show you, is no longer the sole purview of the Harvard MBA graduate. Your ticket to ride resides within the side of you that's disorderly, independent, and rogue. Deep down, you've always been the kid to point out when the emperor has no clothes. Yet, time and time again you've been faced with the consequences of deviating from social expectations. This is a new conversation for a new era. What would happen if, starting today,

you walked away from the sheeple? What could you build?

The Enlightenment commitment to reason naturally gave rise to a belief in the perfectibility of man. Influenced by John Locke and Jean-Jacques Rousseau, many eighteenth-century writers argued that the proper education and upbringing breeding could make any man a member of the cultural elite. Yet even in this egalitarian environment, the concept

of breeding remained tied to theories of blood lineage, caste distinction, and biological difference. Turning to the works of Locke, Rousseau, Swift, Defoe, and other giants of the British Enlightenment, Jenny Davidson revives the debates that raged over the husbandry of human nature and highlights their critical impact on the development of eugenics, the emergence of fears about biological determinism, and the history of the language itself. Combining rich

historical research with a keen sense of story, she links explanations for the physical resemblance between parents and children to larger arguments about culture and society and shows how the threads of this compelling conversation reveal the character of a century. A remarkable intellectual history, *Breeding* not only recasts the fundamental concerns of the Enlightenment but also uncovers the seeds of thought that bloomed into contemporary notions of human perfectibility.

Latest figures suggest that approximately 20% of the world's population of six billion is malnourished because of food shortages and inadequate distribution systems. To make matters worse, it is estimated that some 75 billion metric tons of soil are removed annually from the land by wind and soil erosion, much of it from agricultural land, which is thereby rendered unsuitable for agricultural purposes. Moreover, out

of a total land area under cultivation 9.6 of approximately 1.5 x 10¹⁰ ha, some 12 x 10¹⁰ ha of arable land are destroyed and abandoned worldwide each year because of unsustainable agricultural practices. Add to this the fact that the world population is increasing at the rate of a quarter of a million per day, and the enormity of the task ahead becomes apparent. To quote the eminent wheat breeder E. R. Sears, It seems clear that plant geneticists can look forward to an expanded

role in the 21st century, particularly in relation to plant improvement. The success of these efforts may go a long way towards determining whether the world's increasing billions of humans will be adequately fed. Food for an ever-increasing population will have to be produced not only from an ever-diminishing, but from what will become an ever-deteriorating land resource unless justifiable environmental concerns are taken into account.

Successful Dog

Breeding Princeton University Press
Breeding in Captivity takes us on Stacy Bolt's journey to have a child at "advanced maternal age," first with the help of a Really Expensive fertility specialist, and then ultimately through a local adoption agency. But this isn't your typical serious memoir about struggling with infertility; it's an entertaining, witty read that perfectly balances humor with its more poignant moments. Breeding in Captivity is about a quirky, lovable

couple that you root for through their fertility struggles and adoption adventures. It's about the hundreds of Internet message boards where annoyingly perky women from Kappa Alpha Fruitcake refer to sex as "babydancing" and sprinkle virtual "baby dust" on each other. It's about meeting birthmothers and deciding on open adoptions. It's about being chosen and then having a birthmother change her mind. But ultimately, it's about hope, how life can

surprise you, and laughing through the insanity.

In what promises to become an "Omnivore's Dilemma" for dog lovers—breed devotees and adoption advocates alike—The Dog Merchants is the first book to explain the complex and often surprisingly similar business practices that extend from the American Kennel Club to local shelters, from Westminster champions to dog auctions. Without judging dog lovers of any

stripe, The Dog Merchants makes it clear that money spent among these dog merchants has real-world effects on people and canines. Kavin reveals how dog merchants create markets for dogs, often in defiance of the usual rules of supply and demand. She takes an investigative approach and meets breeders and rescuers at all levels, shedding much-needed light on an industry that most people don't even realize is an industry. Kavin's goal is to advance the conversation

about how all dogs are treated, from puppy mills to high-kill shelters. She shows that a great deal can be improved by understanding the business practices behind selling dogs of all kinds. Instead of pitting rescue and purebred people against each other, The Dog Merchants shows how all dog lovers can come together, with one voice as consumers, on behalf of all our beloved companions.

October, 1901. Lawyer and private enquiries agent Karl Werthen accepts an assignment to protect the famous Irish writer Bram Stoker while on a speaking tour of Vienna. Meanwhile, his colleague, renowned criminologist Dr Hanns Gross has been called away to advise on a bizarre series of murders near his hometown of Graz, in the Austrian province of Styria. Three women have been killed with strange mutilations

and scarring patterns left on their bodies. The third, most recent victim has had her unborn baby cut out of her womb. Clues have been left at each scene; clues that have been clearly mentioned in Gross's handbook for magistrates, Criminal Investigation. A coincidence? Dr Gross thinks not. Meanwhile, back in Vienna, Werthen's wife Berthe is investigating what seems to be a fraudulent breeding scheme involving the prized Lipizzaner horses. Could

the two investigations possibly be connected? Matters become complicated with Werthen and Stoker's arrival in Graz. For, having read wild newspaper accounts of vampire killings, the Dracula author insists they investigate.
