BLAKE MCMAHON

Development Banks and Entrepreneurship Promotion in India

Pearson South Africa
Social entrepreneurship is one of the most controversial actualities of the modern economy. On the one hand, social entrepreneurship makes up for "market failures" and prevents the deficit of socially essential goods and services in the marketplace, acting as their supplier. On the other hand, the survival of social entrepreneurship in an aggressive market environment is a challenging task, the fulfilment of which may distort the original essence of social entrepreneurship. Comprising a collection of research presented at the International Scientific Conference Advanced Issues on Social Entrepreneurship, this contributed volume offers a global economic analysis of social entrepreneurship. Whilst social entrepreneurship is indispensable to the modern economy, the

current controversial model of its organization means it cannot fully accomplish its mission. This book offers potential solutions to this problem with the global and national strategies of economic growth and social progress. It includes a focus on emerging markets, in which the role of social entrepreneurship is especially high. This book is aimed at scholars and students who are interested in social entrepreneurship and corporate economics, and practitioners involved in this field. It will also be of interest to policy makers in the development and implementation of a national economic policy for support for social entrepreneurship in emerging markets.

Farm to Fork Mittal Publications

This book presents a system view of the digital scientific and technological revolution, including its genesis and prerequisites, current trends, as well as current and potential issues and future prospects. It gathers selected research papers presented at the 12th International Scientific and Practical

Conference, organized by the Institute of Scientific Communications. The conference "Artificial Intelligence: Anthropogenic Nature vs. Social Origin" took place on December 5-7, 2019 in Krasnoyarsk, Russia. The book is intended for academic researchers and independent experts studying the social and human aspects of the Fourth Industrial Revolution and the associated transition to the digital economy and Industry 4.0, as well as the creators of the legal framework for this process and its participants - entrepreneurs, managers, employees and consumers. It covers a variety of topics, including "intelligent" technologies and artificial intelligence, the digital economy, the social environment of the Fourth Industrial Revolution and its consequences for humans, the regulatory framework of the Fourth Industrial Revolution, and the "green" consequences, prospects and financing of the Fourth Industrial Revolution.

From Job Search to

Business Ownership and Self-Sufficiency

CRC Press

This book presents endeavors to join synergies in order to create added value for society, using the latest scientific knowledge to boost technology transfer from academia to industry. It potentiates the foundations for the creation of knowledge- and entrepreneurial cooperation networks involving engineering, innovation, and entrepreneurship stakeholders. The Regional HELIX 2018 conference was organized at the University of Minho's School of Engineering by the MEtrICs and Algoritmi Research Centers, and took place in Guimarães, Portugal, from June 27th to 29th, 2018. After a rigorous peer-review process, 160 were accepted for publication, covering a wide range of topics, including Control, Automation and Robotics; Mechatronics Design, Medical Devices and Wellbeing; Cyber-Physical Systems, IoT and Industry 4.0; Innovations in Industrial Context and Advanced Manufacturing; New Trends in Mechanical Systems Development; Advanced Materials and

Innovative Applications; Waste to Energy and Sustainable Environment; Operational Research and Industrial Mathematics; Innovation and Collaborative Arrangements; Entrepreneurship and Internationalization; and Oriented Education for Innovation, Engineering and/or Entrepreneurship. *Volume 2* Springer Nature
This book discusses fusion of technology and body of knowledge through elaboration of theoretical concepts and conceptual frameworks to ensure the economic growth of the Russian Federation by utilizing the huge potential for innovation and entrepreneurship in Russia. The book presents recent research to solve the most challenging problems facing digitalization in the field of entrepreneurship in the country. Some of them need specialized personnel training; the considerable financial resources needed for the maintenance of digital technologies; how to market enterprises and organizations; and financial instruments designed to support industrial development. The proposed results will create the conditions for a systemic approach to

tilting towards supporting new ventures through an improved regulatory framework—currently virtually absent in the field of entrepreneurship at the national level. The book defines prospects for investment in renewable energy sources, circulation of energy resources, and energy efficiency improvements to gain positive economic effects from the introduction of new technologies.

Social Entrepreneurship

IGI Global

A wide range of entrepreneurial initiatives have been introduced within European health care systems during the last decade. While these initiatives promised more efficient management, they also triggered concerns about reduced equity and quality in service provision. This book explores emerging regulatory strategies that seek to capture the benefits of entrepreneurial innovation without sacrificing the core policy objectives of a socially responsible health care system. It opens with an extended essay on current trends and evidence across health care subsectors and across countries,

presenting a wide range of alternatives for policy makers, and assessing their relative advantages and disadvantages. It then reviews entrepreneurialism and regulation in specific contexts (such as hospitals, primary health care, social services) and considers related issues including the impact of corruption and the potential lessons from deregulation of public utilities.

Operations and Supply Chain Management in the Food Industry Oxford University Press

The European Conference on Innovation and Entrepreneurship has been running now for 16 years. This event has been held in Italy, Northern Ireland, France, Belgium, Portugal, and Finland to mention some of the countries who have hosted it. The conference is generally attended by participants from more than 40 countries and attracts an interesting combination of academic scholars, practitioners and individuals who are engaged in various aspects of innovation and entrepreneurship teaching and research. The 16th European Conference on Innovation and Entrepreneurship will be

hosted by Instituto Universitário de Lisboa (ISCTE), Portugal and the Conference Chair will be Florinda Matos

Managing Innovation and Entrepreneurship

24 Steps to Success!

Disciplined

Entrepreneurship will change the way you think about starting a company. Many believe that entrepreneurship cannot be taught, but great entrepreneurs aren't born with something special - they simply make great products. This book will show you how to create a successful startup through developing an innovative product. It breaks down the necessary processes into an integrated, comprehensive, and proven 24-step framework that any industrious person can learn and apply. You will learn: Why the "F" word - focus - is crucial to a startup's success Common obstacles that entrepreneurs face - and how to overcome them How to use innovation to stand out in the crowd - it's not just about technology Whether you're a first-time or repeat entrepreneur, Disciplined Entrepreneurship gives you the tools you need to

improve your odds of making a product people want. Author Bill Aulet is the managing director of the Martin Trust Center for MIT Entrepreneurship as well as a senior lecturer at the MIT Sloan School of Management. For more please visit <http://disciplinedentrepreneurship.com/> *Handbook of Research on Strategies and Interventions to Mitigate COVID-19 Impact on SMEs* Entrepreneurial Development How can management be developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing

technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers. With a new foreword by Joseph Maciariello

The Institutional Foundations of the Digital Economy in the 21st Century Springer

Robbins/Judge provide the research you want in the language your students understand; accompanied with the best selling self-assessment software, SAL. Some topics include management functions; the social sciences; helping employees balance work and other responsibilities; improving people skills; improving customer service; motivational concepts; communication; power and politics; conflict and negotiation; culture; and stress management. Globally accepted and written by one of the most foremost authors in the field, this is a necessary read for all managers, human resource workers, and anyone needing to understand and improve their people skills.

Modern Global Economic System:

Evolutional Development vs. Revolutionary Leap

SAGE Publications

Entrepreneurship has been seen as a phenomenon allowing economic development, job creation, increased productivity and innovation, but many studies do not include the causes of these events. Consequently, the objective of this book is to fill this gap by combining several studies from more practice-oriented perspectives. The various chapters presented here follow several approaches which researchers explore in different contexts and link to specific experiences in entrepreneurship. This book intends to contribute to better understanding of the phenomenon of entrepreneurship and innovation, and to show how these business practices can stimulate economic development in various countries and regions worldwide.

S. Chand Publishing

The aim of this book is to discuss how universities are acting in an entrepreneurial way by responding to educational and social challenges. This will help to understand fruitful new areas of teaching,

research, service and engagement that can occur in a university setting based on entrepreneurial thinking.

What Everyone Needs to Know Springer Nature

With the need for sustainability, a focus on developing an economic system that aims at minimizing waste, commonly referred to as the circular economy, is emerging. Circular economy and studies related to it have gained worldwide attention, as it seems to be an effective alternative economic system. Naturally, the circular economy will impact enterprises and will shift how entrepreneurship development and entrepreneurial opportunities are perceived, developed, and resourced. The Handbook of Research on Entrepreneurship Development and Opportunities in Circular Economy is a collection of pioneering research that advances the understanding of entrepreneurship development, identifies the opportunities, and manages the entrepreneurship development, policies, and programs in order to further a circular

economy. In addition to entrepreneurship development and entrepreneurial opportunities, the book will cover and discuss a number of other factors necessary for a successful transformation, such as entrepreneurship and innovation, entrepreneurship and change, and entrepreneurship education. While highlighting topics including consumer consumption, knowledge management, and linear economics, this book is ideally designed for entrepreneurs, small business owners, managers, consultants, organization development specialists, policymakers, researchers, industry experts, academicians, and students.

Scientific and Technical Revolution: Yesterday, Today and Tomorrow BoD - Books on Demand

In a book presented in a Q-and-A format, the authors explain what social entrepreneurs are, how their organizations function, what challenges they face and how readers can get involved in the efforts that social entrepreneurs are spearheading. Cowritten by the author of *How to Change the World*.

ECIE 2020 16th European Conference on Innovation and Entrepreneurship Academic Conferences limited

The first book to look at innovation/entrepreneurship from an international perspective, *Managing Innovation and Entrepreneurship: A Global Perspective* provides a step-by-step process for managing innovation and entrepreneurship in an organization in both turbulent and stable economic times. Authors Robert D. Hisrich and Claudine Kearney demonstrate how to manage innovation on a day-to-day basis—using a wide range of real world scenarios, theories, principles, best practices, case studies, and modern examples. The book provides detailed coverage of each aspect of the process of innovation required to achieve success, including what it takes to build an innovative and entrepreneurial organization, how to develop innovation and

entrepreneurship in both individuals and teams, how to manage and operationalize innovation and entrepreneurship, how to develop a global business plan, and more. The Challenge of Sustainability in Agricultural Systems New Age International For junior/senior/graduate-level courses in Entrepreneurship, New Venture Creation, and Small Business Strategy. Based on the premise that entrepreneurship can be studied systematically, this text offers a comprehensive presentation of the best current theory and practice. It takes a resource-based point-of-view, showing how to acquire and use resources and assets for competitive advantage. FOCUS ON THE NEW ECONOMY * NEW-Use of the Internet-Integrated throughout with special treatment in Ch. 6. * Demonstrates to students how the new economy still follows many of the rigorous rules of economics, and gives them examples of business-to-business and business-to-customer firms so that they can build better business models. * NEW-2 added chapters on e-

entrepreneurship-Covers value pricing; market segmentation; lock-in; protection of intellectual property; and network externalities. * Examines the new economy and the types of resources, capabilities, and strategies that are needed for success in the Internet world. * Resource-based theory-Introduced in Ch. 2 and revisited in each subsequent chapter to help tie concepts together. * Presents an overarching framework, and helps students focus **Entrepreneurship in Power Semiconductor Devices, Power Electronics, and Electric Machines and Drive Systems** Springer Nature This book gathers a selection of peer-reviewed papers presented at the third Big Data Analytics for Cyber-Physical System in Smart City (BDCPS 2021) conference, held in Shanghai, China, on Nov. 27, 2021. The contributions, prepared by an international team of scientists and engineers, cover the latest advances made in the field of machine learning, and big data analytics methods and approaches for the data-driven co-design of communication,

computing, and control for smart cities. Given its scope, it offers a valuable resource for all researchers and professionals interested in big data, smart cities, and cyber-physical systems. **Debunking Public Vs. Private Sector Myths** Walter de Gruyter GmbH & Co KG While the population continues to grow and expand, many people are now making their homes in cities around the globe. With this increase in city living, it is becoming vital to create intelligent urban environments that efficiently support this growth, and that simultaneously provide friendly, progressive environments to both businesses and citizens alike. The Handbook of Research on Entrepreneurial Development and Innovation Within Smart Cities is a comprehensive reference source that discusses social, economic, and environmental issues surrounding the evolution of smart cities. It provides insightful viewpoints on a range of topics such as entrepreneurial ecosystems, competitive tourism, city efficiency, corporate social responsibility, and smart

destinations. This publication is ideal for all researchers, academics, and practitioners that wish to expand their knowledge on the emerging trends and topics involving smart cities.

Entrepreneurship Emerald Group Publishing Entrepreneurial Profiles is intended to help students and practitioners of entrepreneurship think about what it takes to

create a significant business, with focus on what it may take to create a successful and significant business.

Entrepreneurship

Harvard Business Press Named one of the best books of 2013 by the 'Financial Times', 'Huffington Post' and 'Forbes', this debate-shifting book debunks the myth of the State as a static bureaucratic

organization only needed to 'fix' market failures, leaving dynamic entrepreneurship and innovation to the private sector. Case studies ranging from the innovations that make the iPhone so 'smart' to the current developments in clean technology reveal the reality, whereby the private sector only invests after the entrepreneurial State has made the bold, high-risk investments.
