LEONIDAS GEORGE

Things Fall Apart Simon and Schuster
A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. By day they inhabit a land of bright fantastic birds and dark blue seas, but at night their dreams are haunted by the image of a terrifying beast. As the boys' delicate sense of order fades, so their childish dreams are transformed into

something more primitive, and their behaviour starts to take on a murderous, savage significance. First published in 1954, *Lord of the Flies* is one of the most celebrated and widely read of modern classics. Now fully revised and updated, this educational edition includes chapter summaries, comprehension questions, discussion points, classroom activities, a biographical profile of Golding, historical context relevant to the novel and an essay on *Lord of the Flies* by William Golding entitled 'Fable'. Aimed at Key Stage 3 and 4 students, it also includes a section on

literary theory for advanced or A-level students. The educational edition encourages original and independent thinking while guiding the student through the text - ideal for use in the classroom and at home.

INNOVATION IN ENGINEERING AND TECHNOLOGY SET Coordinated by Dimitri Uzunidis Systemic innovation is based on business networks and new business models in a global economy integrated by flows of knowledge, capital, and goods. The authors of this book consider the theory that innovations act as systems based on multi-actor interactions. Innovation is contextualized to demonstrate in what capacity a company or an entrepreneur can innovate. The book details the management of scientific, technical and cognitive resources, the relationships between R&D partners, the creativity and the rules that allow a market and a company to innovate. This contextualization, associated with entrepreneurial strategy, leads to systemic innovation. This book analyzes some key sectors of the economy that are knowledge-intensive and rapidly changing: transport and communications, defense, information technology, artificial intelligence, and the environment.

So Far From God BRILL

NATIONAL BESTSELLER • In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. Four months later, his decomposed body was found by a moose hunter. This is the unforgettable story of how Christopher Johnson McCandless came to die. "It may be nonfiction, but *Into the Wild* is a mystery of the highest order."

—Entertainment Weekly McCandless had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Not long after, he was dead. *Into the Wild* is the mesmerizing, heartbreaking tale of an enigmatic young man who goes missing in the wild and whose story captured the world's attention. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London

and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this

enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Into the Wild is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.

This book traces the long-term genesis of the sixth-century Roman legal penalty of forced monastic penance. The late antique evidence on this penal institution runs counter to a scholarly consensus that Roman legal principle did not acknowledge the use of corrective punitive confinement. Dr Hillner argues that forced monastic penance was a product of a late Roman penal landscape that was more complex than previous models of Roman punishment have allowed. She focuses on invigoration of classical normative discourses around punishment as education through Christian concepts of penance, on social uses of corrective confinement that can be found in a vast range of public and private scenarios and spaces, as well as on a literary Christian tradition that gave the experience of punitive imprisonment a new meaning. The book makes an important contribution

to recent debates about the interplay between penal strategies and penal practices in the late Roman world. *A Companion to Isidore of Seville* Cambridge University Press Tigar (Washington College of Law, American U.) has written a new introduction and extended afterword that update this Marxist analysis of law and jurisprudence, originally published in 1977. The study traces the role of law and lawyers in the rise of the European bourgeoisie. The new material discusses human rights issues and social movements over the past two decades, including political prisoners and the death penalty. c. "A wonderful, wonderful book." —Maxine Hong Kingston Focusing on the relationship between two fiercely independent women—Teresa, a writer, and Alicia, an artist—this epistolary novel was written as a tribute to Julio Cortázar's *Hopscotch* and examines Latina forms of love, gender conflict, and female friendship. This groundbreaking debut novel received an American Book Award from the Before Columbus Foundation and is widely studied as a feminist text on the nature of self-conflict.

This collection of eleven essays traces the complex paths of change taken by the English language in its long history, from its Indo-European origins to the present day. Just like any other language, English is a complex system made up of several interconnected sub-systems - lexical, syntactical, phonological, morphological -

and all of those sub-systems are subject to change, resulting in constant shifts and readjustments. Additionally, more than some other languages, English has a history marked by strong upheavals, particularly with the influence of Scandinavian and Romance languages in the Middle Ages. The contributions here consider all aspects of that complex history, with four of them taking a particular interest in the issues brought about by language contact with French and Latin.

Steno and the Philosophers offers an account of the life and works of the Danish scientist and theologian Nicolas Steno (1638-1686). Its aim is to study the intricate relations between philosophy, theology, and the emerging sciences (anatomy, medicine and geology in particular) in the early modern Republic of Letters through the biographical prism of one of its most fascinating members. Concentrating on Steno's contributions to natural philosophy and his relations to philosophers, the volume portrays Steno,

not only as an influential scientist and theologian, but also as a natural philosopher who played a pivotal, albeit ambivalent, role in the intellectual networks amongst philosophers and natural scientists in the late seventeenth century. Contributors include Raphaële Andrault, Jakob Bek-Thomsen, Daniel Garber, Vasiliki Girgoropoulou, Eric Jorink, Troels Kardel, Mogens Lærke, Sebastian Olden-Jørgensen, Justin E. H. Smith, Frank Sobiech and Pina Totaro.

Migrating Words, Migrating Merchants, Migrating Law examines the connections that existed between merchants' journeys,

the languages they used and the development of commercial law in the context of late medieval and early modern trade. Thanks to this transdisciplinary approach, the book offers a fresh point of view on the history of commercial law in different cultural and geographical contexts, including medieval Cairo, Pisa, Novgorod, Lübeck, early modern England, Venice, Bruges, nineteenth century Brazil and many other trading centers. Contributors are Cornelia Aust, Guido Cifoletti, Mark R. Cohen, Albrecht Cordes, Maria Fusaro, Stefania Gialdroni, Mark Häberlein, Uwe Israel, Bart Lambert, David von Mayenburg, Hanna Sonkajärvi, and Catherine Squires.

The friars represented a remarkable innovation in medieval religious life. Founded in the early 13th century, the Franciscans and Dominicans seemed a perfect solution to the Church's troubles in

confronting rapid changes in society. They attracted enthusiastic support, especially from the papacy, to which they answered directly. In their first 200 years, membership grew at an astonishing rate, and they became counsellors to princes and kings, receiving an endless stream of donations and gifts. Yet there were those who believed the adulation was misguided or even dangerous, and who saw in the friars' actions only hypocrisy, deceit, greed and even signs of the end of the world. From the mid-13th century, writings appeared denouncing and mocking the friars and calling for their abolition. Their French and English opponents were among the most vocal. From harsh theological criticism and outrage at the Inquisition to vulgar tales and bathroom humor, this thoroughly documented work is suitable for the newcomer, as well as for readers who are familiar with the subject but might like to investigate specific topics in more detail.
