Phtls: Prehospital Trauma Life Support (Print) with Course Manual (Print)
McGraw Hill Professional
As the required textbook for NAEMT'S worldwide prehospital trauma life

support course, Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. Fully revised and updated, the seventh edition provides trauma treatment and

guidelines that are proven to reduce morbidity and mortality. Submit your application to become a Course Site today.

Prehospital Trauma Life Support

Jones & Bartlett Learning
This is a Pageburst digital textbook; As the required textbook for NAEMT's worldwide prehospital

trauma life support course, Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. Fully revised and updated, the 7th edition provides state-of-the-art, evidence-based trauma treatment and guidelines that are proven to reduce morbidity and mortality, and is also an ideal tool for studying EMT or paramedic skills and a helpful general

reference on trauma assessment and management. The Instructor's Electronic Resource CD-ROM is available for certified PHTLS instructors only. It can be ordered through Elsevier/MosbyJems, but customers must first obtain an access code from the National PHTLS office at 1-800-94-PHTLS or 1-601-924-7744. Individuals may also call the above numbers for information on How to Become a PHTLS Instructor. Elsevier is proud to announce

Prehospital Trauma Life Support (PHTLS) Online Continuing Education, the latest addition to NAEMT's worldwide PHTLS educational content. PHTLS Online Continuing Education includes videos, animations, and interactive exercises, along with reading assignments that direct you to the related content in the PHTLS 7th Edition book. Plus, online feedback is provided for self-assessment questions in each module, allowing you to measure your comprehension. A post-

test at the end of the final module will check your retention of the online content. Visit at <http://phtls.centrelearn.com> to earn 8 hours of CECBEMS continuing education credit by successfully completing all modules of PHTLS Online Continuing Education. Please note: NO PHTLS CARD WILL BE ISSUED. PHTLS Hybrid courses are available only through the NAEMT. Visit the Education section of the NAEMT website www.naemt.org for more information. This is a

Pageburst digital textbook; Provides CEUs for First Responders, EMTs, paramedics, nurses, and physicians; proceeds from the course go to the NAEMT and are used to support the profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS is a continuing

education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway,

thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A consistent approach for every body system helps you easily reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma

chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients.

More than 30 video demonstrations on the companion DVD provide step-by-step procedural guidance for key skills, including 4 brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy. Extensively updated photos clarify key concepts and techniques. New Art and Science of Medicine chapter helps you build the critical thinking skills to determine the best way to

manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions in each chapter challenge you to apply

treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course. Updated Companion DVD includes 9 new narrations and 20 fully re-shot demonstrations and subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish,

German, and Chinese (Mandarin).

Trauma, Seventh Edition Mosby/JEMS

The definitive guide to trauma surgery—now in full color! The seventh edition, Trauma reaffirms

its status as the leading comprehensive textbook in the field. With a new full-color design and a rich atlas of anatomic drawings and surgical approaches, *Trauma, 7e* takes you through the full range of injuries the trauma surgeon is likely to encounter. The book also features timely coverage that explains how to care for war victims who may require acute interventions such as amputation. Supported by numerous x-rays, CT scans, plus informative tables throughout, this

trusted reference begins with an informative look at kinematics and the mechanisms of trauma injury. Subsequent chapters provide useful background information on the epidemiology of trauma; injury prevention; the basics of trauma systems, triage, and transport; and much more. The next section meticulously reviews generalized approaches to the trauma patient, from pre-hospital care and managing shock, to emergency department thoracotomy and the

management of infections. *Trauma* then delivers a clear organ-by-organ survey of treatment protocols designed to help you respond to any critical care situation with confidence, no matter what body system is involved. The remaining sections of the book will help you successfully handle specific challenges in trauma—including alcohol and drug abuse, and combat-related wounds—in addition to post-traumatic complications such as multiple organ failure.

FEATURES NEW! Trauma Atlas contains precise, concept-clarifying anatomical illustrations and proven surgical techniques that make common procedures more accessible than ever before High-yield section on specific approaches to the trauma patient prepares you for the wide spectrum of cases in trauma/critical surgery care, including: Disaster and mass casualty; Rural trauma; Management of shock; Post-injury hemotherapy and hemostasis; Emergency

department thoracotomy; Diagnostic and interventional radiology; Surgeon-performed ultrasound; Anesthesia and pain management; Infection; A-to-Z overview of the management of specific traumatic injuries; Detailed discussion of the management of complications
PHTLS: Prehospital Trauma Life Support for First Responders Course Manual Jones & Bartlett Publishers
 Prehospital Care Pearls and Pitfalls, is a unique,

stimulating, and easy-to-read way, provide practical information applicable to the prehospital setting and help the prehospital emergency care provider be prepared to manage the myriad of emergency and non-emergency situations that he or she will be called upon to assist.
PHTLS 8e: Prehospital Trauma Life Support Jones & Bartlett Publishers
 Over three decades ago, PHTLS: Prehospital Trauma Life Support transformed the

assessment and management of trauma patients in the field, improving the quality of trauma patient care and saving lives around the world. The tenth edition of this trusted, comprehensive resource continues the PHTLS mission to promote excellence in trauma patient management by all prehospital care practitioners through global education. First developed by the National Association of Emergency Medical Technicians (NAEMT) in the early

1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT), this proven program includes updated medical content to reflect current, evidence-based knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care, knowing that EMS practitioners make the best decisions on behalf of their patients when given a solid foundation of knowledge and key principles to fuel their critical-thinking skills. A

Clear Approach to Assessing a Trauma Patient In the field, seconds count. The tenth edition of PHTLS: Prehospital Trauma Life Support teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing delays in initiating transport to an appropriate destination. PHTLS, Tenth Edition features: - The updated ACS National Guidelines

for the Field Triage of Injured Patients - An advanced discussion on the challenges of prolonged scene time - Consideration of when to shift efforts from search and rescue to recovery in the setting of a drowning victim - The United Kingdom Fire and Rescue Guidelines for search and rescue - New content on blast injuries - Clarification on the role of pelvic binders - Presentation of the emerging role of prehospital blood transfusion in

hemorrhagic shock in reducing 30-day mortality - Current content addressing special considerations, including weapons of mass destruction and environmental trauma
International Trauma Life Support for Emergency Care Providers: Pearson New International Edition Mosby/JEMS
**Each new print copy of Nancy Caroline's Emergency Care in the Streets, Canadian Seventh Edition also includes Navigate 2

Advantage Access that unlocks a complete eBook, Study Center, homework and Assessment Center, and a dashboard that reports actionable data. Learn more at <http://jblnavigate.com/2>
Nancy Caroline's Emergency Care in the Streets, Seventh Edition transforms the legendary paramedic textbook first developed by Dr. Caroline in the early 1970s into the premier paramedic education program. The Paramedic Association of Canada is proud to

continue this legacy and set the new gold standard for paramedic education. The Seventh Edition reflects the collective experience of its top flight Canadian author team and decades of street wisdom. This fully updated edition addresses the National Occupational Competency Profiles with clarity and precision in a concise format that ensures student comprehension and encourages critical thinking. This edition emphasizes the notion that becoming a

paramedic must be a pursuit of excellence. Concepts of team leadership and professionalism are woven throughout the chapters, challenging students to become compassionate, conscientious health care professionals as well as superior clinicians. This edition also broadens the traditional boundaries to include new and emerging areas of paramedic practice. Current, State-of-the-Art Medical Content The Seventh Edition includes in-depth

coverage of anatomy, physiology, and pathophysiology to form an advanced understanding of the human body and disease processes expected of today's paramedic. Three new chapters have been added to this edition: Community Paramedicine, Research and Quality, and Mechanical Ventilation. The first two represent areas of growth in the scope, role, and importance of paramedics in an integrated health care system. The third acknowledges the

paramedics' ability to provide advanced therapies prior to arrival at the hospital, and a growing reliance on paramedics in transfer of critically ill patients in a regionalized delivery of care. Clear Approach to Patient Assessment and Management The Seventh Edition teaches and reinforces the concept of patient assessment with a single, comprehensive chapter, ensuring that students understand patient assessment as a single, integrated process—the way that

providers actually practice it in the field. Each clinical chapter reinforces the steps of the patient assessment process within the context of the illnesses or injuries discussed in the chapter. Strong Application to Real-World EMS Patient case studies evolve throughout every chapter, offering students a genuine context for the application of the knowledge presented. This approach shows the student how all of the information will be used to help patients in the

field. An additional case concludes each chapter and presents critical-thinking questions to cement the chapter's concepts. Accessible Language Since the first edition published in 1988, *Trauma, Seventh Edition* McGraw Hill Professional has transformed the assessment and management of trauma patients in the field. Over three decades ago, PHTLS: Prehospital Trauma Life Support transformed the assessment and management of trauma patients in the field. Throughout the years and across the globe, the PHTLS course has

improved the quality of trauma patient care and has saved lives. The ninth edition of this trusted and reliable resource continues the PHTLS mission to promote excellence in trauma patient management by all providers involved in the delivery of prehospital care through global education. This legendary program was first developed by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of

Surgeons Committee on Trauma (ACS-COT). Its medical content is continuously revised and updated to reflect current, evidence-based knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care. It is based on the belief that EMS practitioners make the best decisions on behalf of their patients when given a solid foundation of knowledge and key principles to fuel their critical-thinking skills. A Clear Approach to Assessing a Trauma

Patient In the field, seconds count. PHTLS: Prehospital Trauma Life Support, Ninth Edition teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Dynamic Technology Solutions World-class content joins instructionally sound design with a user-friendly

online interface to give instructors and students a truly interactive and engaging learning experience with: eBook Video Demonstrations of Critical Skills

Phtls Prehospital Trauma Life Support Online for Phtls: Prehospital Trauma Life Support (User Guide, Access Code, and Textbook Package)

Jones & Bartlett Publishers
In the field, seconds count. PHTLS: Prehospital Trauma Life Support for First Responders, Second Edition teaches and

reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Developed by the National Association of Emergency Medical Technicians (NAEMT) in cooperation with the American College of Surgeons Committee on Trauma (ASC-COT), PHTLS for First Responders, Second Edition reflects current,

evidence-based knowledge and practice, and promotes critical-thinking as the foundation for providing quality care. Rapidly assessing a trauma patient to identify life-saving care is at the heart of PHTLS for First Responders, Second Edition. It takes 2 minutes or less for a patient to exsanguinate. No other intervention first responders perform is more important than stopping that level of bleeding in trauma patients. To reflect this, PHTLS for First

Responders, Second Edition utilizes the XABCDE patient assessment mnemonic to place exsanguinating hemorrhage at the forefront of every patient encounter. The importance of XABCDE (eXsanguinating hemorrhage, airway, breathing, circulation, disability, and expose/environment) is reinforced in every clinical chapter. PHTLS for First Responders, Second Edition features a new course manual, which reinforces and clarifies

key concepts from the course; features an engaging, interactive design; and is written so you feel like you are participating in a conversation, versus listening to a lecture. *PHTLS - Prehospital Trauma Life Support* Mosby/JEMS
In the newly revised second edition of ABC of Prehospital Emergency Medicine, a team of experienced prehospital practitioners deliver a comprehensive up-to-date guide to the rapidly evolving field of

prehospital emergency medicine. The book includes evidence-based practice and expert opinion to meet the needs of the PHEM training curriculum covering operational, clinical and system considerations. An international team of expert editors and contributors have also provided readers with: A thorough introduction to prehospital emergency medicine, including activation and deployment, personal protective equipment, and scene safety and

assessment
Comprehensive
exploration of the primary
survey, airway, breathing,
and circulation
assessments Practical
discussions of prehospital
anesthesia, analgesia,
sedation, monitoring and

 The field's definitive text
 Trauma, 7e delivers expert, high-yield guidance on all the

standard treatments and modes of management of traumatic injuries.
PHTLS--pre-hospital Trauma Life Support Jones & Bartlett Learning
 As the required textbook for NAEMT's worldwide prehospital trauma life support course, Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. Fully revised and updated, the 7th edition provides state-

of-the-art, evidence-based trauma treatment and guidelines that are proven to reduce morbidity and mortality. Tailored expressly for the military environment, this book diverges in the last 12 chapters to reflect the special considerations of the military. These unique chapters are written by the Tactical Combat Casualty Care Committee on Trauma, the leading body that oversees trauma care. The Instructor's Electronic Resource CD-ROM is available for certified

PHTLS instructors only. It can be ordered through Elsevier/MosbyJems, but customers must first obtain an access code from the National PHTLS office at 1-800-94-PHTLS or 1-601-924-7744. Individuals may also call the above numbers for information on How to Become a PHTLS Instructor. Provides CEUs for military prehospital care providers, first responders, EMTs, paramedics, nurses, and physicians; proceeds from the course go to the NAEMT and are used to

support the profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of

the American College of Surgeons. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway, thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A consistent

approach for every body system makes it easy to reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and

includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients. Three new Military Medicine chapters add to coverage for the military environment: Joint Theater Trauma System, Treatment of Burn Casualties in TCCC, and TCCC Casualty Response

Planning. More than 30 video demonstrations on the companion DVD provide step-by-step procedural guidance for key skills, including 20 fully re-shot demonstrations and four brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy; subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish, German, and Chinese

(Mandarin). Extensively updated photos clarify key concepts and techniques. New Art and Science of Medicine chapter helps you build the critical thinking skills to determine the best way to manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive

agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions challenge you to apply treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course. PHTLS Trauma First

Response Spanish: Primera Respuesta Al Trauma John Wiley & Sons First Responder's Manual of Prehospital Trauma Care is an easy to use education tool for all the conscientious citizens willing to serve their fellow companions in an adverse scenario of trauma and emergency. The manual's target audience is firemen, safety officers, policemen, teachers, nurses, drivers, emergency room staffs, medical and nursing students, surgery residents and surgeons.

The founders of the book have stressed on the issues related to trauma, which are described in a simple and understandable language. It is basic but descriptive resource for layperson's first responders, describing practical advice for the best care. The focus of the manual is to educate people on the best standard of care in the prehospital settings and to learn methods of improvisation. The authors have stressed on regularly confronted trauma situations in

critical care through chapters on shock, airway and circulation.
Prehospital Care Pearls and Pitfalls CRC Press
 A unique combination of both basic and advance trauma life support concepts and skills for use as part of the core curriculum in trauma training at the EMT and paramedic levels, this book covers all aspects of trauma assessment and management, including triage.
PHTLS Jones & Bartlett Learning
 As the required textbook

for NAEMT's Trauma First Response course, *PHTLS Trauma First Response* delivers comprehensive, evidence-based guidelines culled from NAEMT's internationally renowned Prehospital Trauma Life Support, 7th Edition text to help you provide the most effective pre-EMS trauma treatment. It's the perfect book for first responders, police, officers, firefighters, rescue personnel, and safety officers!
PHTLS Jones & Bartlett Publishers
 Prehospital Trauma Life

Support (PHTLS) revised reprint, is a unique, continuing education program that directly addresses trauma issues in the prehospital environment. Following the publication cycle of ATLS (Advanced Trauma Life Support) by the Committee on Trauma of the American College of Surgeons, the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care. This revised fifth edition of the PHTLS textbook is the required book for the

PHTLS course, and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management. It combines both basic and advanced trauma concepts and skills in one definitive resource and now features an entirely new chapter on evidence-based guidelines for military medicine, developed by the Committee on Tactical Combat Casualty Care. PLEASE NOTE: The Instructor's Manual and

Slide Set are available for certified PHTLS Instructors ONLY. They are ordered through Mosby but customers must first obtain an "access code" from the National PHTLS office - (800) 94-PHTLS or (601) 924-7744. Individuals may also call the above numbers for information on HOW TO BECOME A PHTLS INSTRUCTOR. PHTLS Course Features: Provides CEUs for First Responders, EMTs, paramedics, nurses, & physicians; Proceeds from the course go to the NAEMT and thus

are used to support the profession; It improves the quality of care (Research is available); Can be incorporated into initial training or as a stand-alone continuing education course; Promotes critical thinking as the foundation for providing quality care. PHTLS (Prehospital Trauma Life Support) is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the

Committee on Trauma of the American College of Surgeons. The PHTLS textbook is the required book for official PHTLS courses. However, it can also be used outside of the course, adopted or purchased as a stand-alone textbook or reference book. This one book covers both basic and advanced level training. More information on kinematics than any similar book on the market. Airway, Thoracic and Spinal Skills are presented in a heavily illustrated, step-by-step

format. Consistent approach! Each body region chapter features info on anatomy and physiology, pathophysiology, assessment and management giving the reader a systematic way of looking at trauma. Chapter pedagogy includes: objectives, opening case scenario and scenario conclusion at the end of chapter, summary, review questions. Features a separate chapter on trauma care for the Military. NEW TO THE

REVISED 5TH EDITION:
UPDATED and EXPANDED
chapter on Military
Medicine to reflect the
new evidence based
guidelines for prehospital
care in the tactical
environment. This new
content was developed in
2002 by the Committee
on Tactical Combat
Casualty Care, comprised
of trauma specialists,
operational medical
officers, and combat
medical personnel. NEW
TO THE 5TH EDITION:
NEW! A Companion CD-
ROM is now included with
every book. Contains

video clips of all different
airway and spinal skills
used in PHTLS. Also
includes info to download
onto a PDA (such as the
Glasgow Coma Scale,
Revised Trauma Score,
Rule of 9's, Parkland
Formula and Pediatric
Vital Signs). NEW!
Chapter on Injury
Prevention. Provides the
reader with information
on preventing injuries
within their community.
NEW! Chapter on Triage,
Transport and Trauma
Systems. Provides the
reader with a "pull it all
together" concept of how

to triage a trauma patient,
how and when to
transport a trauma
patient and where to
transport a trauma
patient. NEW! Chapter on
the Golden Principles of
Prehospital Trauma Care.
Provides the reader with
guidelines to put all the
information together and
critically think through
every trauma patient.
NEW! Information on
prolonged transportation.
NEW! References for
every chapter and
suggested reading lists.
Providing evidence based
prehospital trauma care.

NEW! Drug table for commonly used drugs for pharmacologically assisted intubation. Provides general guidelines of current accepted drug use for intubation. NEW! Spinal Immobilization algorithm. Provides general guidelines for when spinal immobilization is appropriate for a trauma patient. ALL NEW PHOTOS! An entirely new set of photographs for the skills portion of this text. NEW! Face to Face Intubation is a procedure that provides advanced

providers with an alternative method of intubating a trauma patient. NEW SPINAL SKILLS! - 2 person technique for standing longboard application and 2-person rapid extrication. Revised - Head Trauma chapter. Expanded coverage of the pathophysiology of secondary brain injury. Expanded coverage of the management of traumatic brain injury. Also now includes information on management of brain injury during prolonged transportation. Revised:

Shock chapter. Now provides information on the complications of shock, expanded coverage on the assessment and confounding factors that contribute to shock, specific guidelines for appropriate use of the Pneumatic Antishock Garment (PASG), and more. Expanded! The Patient Assessment and Management chapter now includes expanded information on hemorrhage control and evaluating level of consciousness at the

scene, pain management and assessing of domestic abuse. Expanded! Chapter on trauma in the elderly. Expanded coverage on the systematic effects of aging, the common mechanisms of injury in the elderly and special considerations in the

management of the elderly in an ABCDE approach. COMPANION CD-ROM: Includes video presentations of more than 20 skills being performed in "real-time." These skills include: Airway Maneuvers, Dual

Lumen Device insertion, Endotracheal Intubation (traditional, face-to-face, nasal), Helmet Removal techniques, Rapid Extrication (2 person and +2person), Standing Longboard Application (2 person and +2 person), and more!
