### *TRAFFIC ENGINEERING*

Firewall Media

Popular among university applicants and their advisers alike, these guides present a wide range of information on a specific degree discipline, laid out in tabular format enabling at-a-glance course comparison.

### **A Textbook of Strength of Materials** New Age International

This book aims to bring together the latest advances in, and applications of, fine and specialty chemicals, environmental chemical engineering, clean production technologies, green chemical processing technology, chemicals and equipment, sensors and sensor materials, energy

materials technology, materials protection technology, materials processing technology, functional materials, etc. It constitutes a useful and timely review of those topics.

### **Power System Protection and Switchgear**

HarperCollins

This Volume Is One Of The Two Which Offer A Comprehensive Course In Those Parts Of Theory

And Practice Of Plane And Geodetic Surveying That Are Most Commonly Used By Civil Engineers. The First Volume Covers In 24 Chapters, The Most Common Surveying Operations. Each Topic Introduced Is Thoroughly Described, The Theory Is Rigorously Developed, And A Large Number Of Numerical Examples Are Included To Illustrate Its Application. General Statements Of Important Principles And Methods Are Almost Invariably Given By Practical Illustration. Apart From

Illustrations Of Old And Conventional Instruments, Emphasis Has Been Placed On New Or Modern Instruments, Both For Ordinary As Well As Precise Work. A Good Deal Of Space Has Been Given To Instrumental Adjustments With Thorough Discussion Of Geometrical Principles In Each Case. Many New Advanced Problems Have Also Been Added Which Will Prove Useful For Competitive Examinations. Physics & Chemistry Nirali Prakashan

This book is the outcome of the authors long teaching experience and has been designed to meet the needs of Civil Engineering curricula for the courses in Soil Mechanics and Foundation Engineering of Indian Universities. The book has been written mainly in the S.I. Units, although some problems and examples in the M.K.S. system have been included for convenience during the period of transition. The concepts have been developed systematically in lucid

language, sufficient number of well-graded Numerical examples and problems for solution have been included, and the answers for the latter have been given at the end of the book. Summary of main points and chapter-wise references have been given at the end of each chapter. References are made to the relevant Indian standard at appropriate places.

### **Surveying Vol. I**

Trotman, Limited  
Can studying really be interesting and enjoyable?

This book explores attitudes towards studying and offers tips and techniques to turn studying into an interesting, enjoyable activity instead of the dull drudgery that it is for most people. Why study subjects you don't like? How to exercise and diet right to keep your brain alert? How to use mind maps to study during an emergency? Art of Living teachers Khurshed Batliwala and Dinesh Ghodke distill years of learning and teaching young people into this

fun, easy-to-read book. *Basic Civil Engineering* Tata McGraw-Hill Education  
D. C. Circuit Concept of EMF, P.D. and current, Resistance, Effect of temperature of resistance, resistance-temperature co-efficient, Classification of electric network. Ohm's law, Kirchoff's law and their application for network solution, Simplification of network using series and parallel combination and star delta transformation. Magnetic Circuit Magnetic effect of

electric current, Law of magnetic force, Magnetic field, Concept of mmf, Magnetic flux, Flux density, Reluctance permeability and field strength and their units. Cross and dot convention current, Simple series and parallel magnetic circuit, Comparison between electric circuit and magnetic circuit, Force on current carrying conductor in magnetic field, Fleming's rules. A. C. Fundamentals Representation of an a.c. source polarity of a.c. source, Generation of a.c. voltage,

Concept of instantaneous, Peak, Average and r.m.s values cycle, Period, Frequency, Peak factor and form factor phase difference, Phasor representation and indication of phase difference in it. Rectangular and polar representation of phasor. A.C. Circuit Study of a.c. circuit consisting of purely resistive, Purely inductive, Purely capacitive type and corresponding voltage and current phasor diagram. Concept of reactance. Study of series

and parallel circuit consisting resistance, Inductance and capacitance and its phasor, Combination of to develop the concept of impedance, Admittance, Conductance, Susceptance. Necessity of earthing, Its types, Fuses safety precaution in working with electricity, Circuit and operation of filament lamp. Fluorescent tube, Mercury vapour, Sodium vapour lamp.  
Amit Student Hindi ShabdKosh PHI Learning Pvt. Ltd.  
 This edited volume

focuses on research conducted in the areas of industrial safety. Chapters are extensions of works presented at the International Conference on Management of Ergonomic Design, Industrial Safety and Healthcare Systems. The book addresses issues such as occupational safety, safety by design, safety analytics and safety management. It is a useful resource for students, researchers, industrial professionals and engineers.

Fluid Mechanics and Fluid

Power CRC Press  
This grammar for the 21st century combines clear grammatical principles with non-technical explanations of all terms and concepts used.

Engineering Surveying  
Springer  
This book is evolved from the experience of the author who taught all lab courses in his three decades of teaching in various universities in India. The objective of this lab manual is to provide information to undergraduate students to practice experiments in

electronics laboratories. This book covers 118 experiments for linear/analog integrated circuits lab, communication engineering lab, power electronics lab, microwave lab and optical communication lab. The experiments described in this book enable the students to learn: • Various analog integrated circuits and their functions • Analog and digital communication techniques • Power electronics circuits and their functions •

Microwave equipment and components • Optical communication devices  
 This book is intended for the B.Tech students of Electronics and Communication Engineering, Electrical and Electronics Engineering, Biomedical Electronics, Instrumentation and Control, Computer Science, and Applied Electronics. It is designed not only for engineering students, but can also be used by BSc/MSc (Physics) and Diploma students.  
**KEY FEATURES** • Contains

aim, components and equipment required, theory, circuit diagram, pin-outs of active devices, design, tables, graphs, alternate circuits, and troubleshooting techniques for each experiment • Includes viva voce and examination questions with their answers • Provides exposure on various devices  
**TARGET AUDIENCE** • B.Tech (Electronics and Communication Engineering, Electrical and Electronics Engineering, Biomedical

Electronics, Instrumentation and Control, Computer Science, and Applied Electronics) • BSc/MSc (Physics) • Diploma (Engineering)  
**Building Materials in Civil Engineering**  
 Springer Nature  
 Covers all the major topics in civil engineering. Each topic is presented briefly followed by an exhaustive set of objective questions. Coverage ranges from the basic to the advanced. The text includes 3000+ objective type questions;

brief descriptions of important theorems; derivations of important functions, relationships and equations; and diagrams and tables to illustrate important concepts.

*Introduction to Engineering Materials*  
Elsevier

The fundamentals and implementation of digital electronics are essential to understanding the design and working of consumer/industrial electronics, communications, embedded systems,

computers, security and military equipment. Devices used in applications such as these are constantly decreasing in size and employing more complex technology. It is therefore essential for engineers and students to understand the fundamentals, implementation and application principles of digital electronics, devices and integrated circuits. This is so that they can use the most appropriate and effective technique to suit their technical need.

This book provides practical and comprehensive coverage of digital electronics, bringing together information on fundamental theory, operational aspects and potential applications. With worked problems, examples, and review questions for each chapter, Digital Electronics includes: information on number systems, binary codes, digital arithmetic, logic gates and families, and Boolean algebra; an in-depth look at

multiplexers, de-multiplexers, devices for arithmetic operations, flip-flops and related devices, counters and registers, and data conversion circuits; up-to-date coverage of recent application fields, such as programmable logic devices, microprocessors, microcontrollers, digital troubleshooting and digital instrumentation. A comprehensive, must-read book on digital electronics for senior undergraduate and graduate students of electrical, electronics and

computer engineering, and a valuable reference book for professionals and researchers.

*Material Science & Engineering* Laxmi Publications

The primary aim of this book is to provide a guide to current practice and equipment for non-specialist surveyors in the various professions involved in the construction industry and the environment. It is suitable for students preparing for degrees and diplomas in architecture, building, building

surveying, quantity surveying, estate management and town planning and environmental studies. It is also of value to engineers who are not specialising in engineering surveying. This book has been thoroughly revised to include new topics such as OS digital mapping, standard deviation and standard error, global positioning systems, transition and vertical curves. Walter Whyte was born in New Zealand of Scottish parents and

educated in Scotland. He worked on site and building surveys in Scotland. He worked on site and building surveys in Scotland, then on road survey and setting out in the North Nyanza and Uasin Gishu Provinces of Kenya, and as a road engineer in British Southern Cameroons and Northern Nigeria, De Montford University in the UK and latterly at City University, Hong Kong. Raymond E Paul has been professionally involved in surveying for over 40 years as a land and

cartographical surveyor, senior lecturer and author. He has a wealth of practical experience and an awareness of the needs of the intended users of this book from all corners of the globe.

Geotechnical Engineering  
Routledge

Hindi is the most widely spoken language in the Republic of India, and Hindi speakers can also be found in Mauritius, Fiji and Trinidad. This comprehensive dictionary featuring over 40,000 modern entries and a useful guide to

transliterations is ideal for students or travelers to any of these regions.

Civil Engineering

New Age International  
13 comprehension lessons  
; Concepts and study material ; Games and exercises ; Tricks of the trade ; Practice exams and questions.

Materials of Construction

Benjamin-Cummings  
Publishing Company  
The construction of buildings and structures relies on having a thorough understanding of building materials.

Without this knowledge it would not be possible to build safe, efficient and long-lasting buildings, structures and dwellings. Building materials in civil engineering provides an overview of the complete range of building materials available to civil engineers and all those involved in the building and construction industries. The book begins with an introductory chapter describing the basic properties of building materials. Further chapters cover the basic

properties of building materials, air hardening cement materials, cement, concrete, building mortar, wall and roof materials, construction steel, wood, waterproof materials, building plastics, heat-insulating materials and sound-absorbing materials and finishing materials. Each chapter includes a series of questions, allowing readers to test the knowledge they have gained. A detailed appendix gives information on the testing

of building materials. With its distinguished editor and eminent editorial committee, Building materials in civil engineering is a standard introductory reference book on the complete range of building materials. It is aimed at students of civil engineering, construction engineering and allied courses including water supply and drainage engineering. It also serves as a source of essential background information for engineers and professionals in the civil

engineering and construction sector. - Provides an overview of the complete range of building materials available to civil engineers and all those involved in the building and construction industries - Explores the basic properties of building materials featuring air hardening cement materials, wall and roof materials and sound-absorbing materials - Each chapter includes a series of questions, allowing readers to test the

knowledge they have gained  
*A Book on C* Pearson Education India  
This edition has been thoroughly revised and enlarged. It is still considered to be a must for all those sitting Civil Engineering examinations.  
*Industrial Safety Management* Trans Tech Publications  
Provides a basic text covering useful topics, procedures, standards and specifications for materials and their testing, as per conditions

and practices prevalent in the country. This book includes trade names, compositions, properties and applications of engineering materials commonly used in industry in the form of tables.

**EMERGING TRENDS IN CIVIL ENGINEERING Course Code 22603**

Laxmi Publications  
The book covers the syllabi of diploma, degree and AMIE courses and a few topics are also included to aid practising engineers. The examination papers of

various boards of technical education and AMIE have been included in the appendix along with hints and solutions.

### *Electrical Engineering*

*Manual* John Wiley & Sons

The authors provide clear examples and thorough explanations of every feature in the C language. They teach C vis-a-vis the UNIX operating system. A reference and tutorial to the C programming

language. Annotation copyrighted by Book News, Inc., Portland, OR *Chemical Reaction Engineering II* CBS Publishers & Distributors Pvt Limited, India  
 This book comprises select proceedings of the 46th National Conference on Fluid Mechanics and Fluid Power (FMFP 2019). The contents of this book focus on aerodynamics and flow control,

computational fluid dynamics, fluid structure interaction, noise and aero-acoustics, unsteady and pulsating flows, vortex dynamics, nuclear thermal hydraulics, heat transfer in nanofluids, etc. This book serves as a useful reference beneficial to researchers, academicians and students interested in the broad field of mechanics.
