A Wrinkle in Time is the winner of the
1963 Newbery Medal. It was a dark and
stormy night—Meg Murry, her small
brother Charles Wallace, and her mother
had come down to the kitchen for a
midnight snack when they were upset by
the arrival of a most disturbing stranger.
"Wild nights are my glory," the unearthly
stranger told them. "I just got caught in a
downdraft and blown off course. Let me sit
down for a moment, and then I'll be on my
way. Speaking of ways, by the way, there

is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
