The #1 Client/Server book, now completely updated and expanded! "It's savvy, informative, and entertaining as anything you are likely to read on the

subject. Client/server isn't one technology but many- remote SQL, TP, message-oriented groupware, distributed objects, and so on. Like the proverbial blind man feeling the elephant, most of us have a hard time seeing the whole picture. The authors succeed brilliantly in mapping the elephant."-John Udell, Byte, "Winner, JOLT Product Excellence Award."-Software Development "The scope and depth of

topics covered in the Guide, with its straightforward and often humorous delivery, make this book required reading for anyone who deals with computers in today's corporate environment."-Bob Gallagher, PC Week "Absolutely the finest book on client/server on the market today. It's got great advice, and is well written and fun to read."-Richard Finkelstein The critics agree-this is the best source for

anyone looking to understand and make informed decisions about client/server technology. In this Third Edition of their award-winning book, authors Orfali, Harkey, and Edwards combine detailed technical explanations with their unique brand of offbeat humor, clever cartoons, controversial soapboxes, and witty quotes to inform, educate, and entertain. This information-packed Survival Guide takes you on a sweeping tour of the world of client/server. From operating systems and communications, to application servers that incorporate database, transaction processing, groupware, and objects, to the Internet and the World Wide Web and their role in the new generation of client/server and object management, this book covers it all. In their other lives: Robert Orfali and Dan Harkey head San Jose State University's Client/Server and Distributed Objects Master's program and lab. Dan also works for IBM as a distributed objects consultant. Jeri Edwards is Vice President of Strategy and Product Planning at BEA Systems. Wiley Computer Publishing

IBM's® Practical, Hands-On Guide to Supporting and Administering Lotus Notes and Lotus Domino This is the only book that focuses entirely on the specific technical, desk-side, and infrastructure issues that support professionals and administrators encounter when implementing and running Lotus Notes in production environments. Authored by one of IBM's top Lotus experts, it draws on the firsthand experiences of IBM professionals working in hundreds of client environments. Mark Elliott has created a true "encyclopedia" of proven resolutions to common problems and has streamlined processes for infrastructure support. Elliott systematically addresses support solutions for all recent Lotus Notes and Domino environments. Survival Guide for Lotus Notes and Domino Administrators is organized for rapid access to specific solutions in three key areas: client setup, technical support, and client software management. It brings together best

practices for planning deployments, managing upgrades, addressing issues with mail and calendars, configuring settings based on corporate policies, and optimizing the entire support delivery process. Along the way, Elliott illuminates the administrative and support implications of the latest enhancements to Lotus Notes and Lotus Domino, in areas ranging from messaging to plug-in support. Whatever your role in managing, administering, or supporting IBM Lotus technologies, this book will help you respond more quickly, efficiently, and effectively—reducing support costs as you increase customer satisfaction. Coverage includes An overview to key software changes introduced in Release 8.0 Resolutions to dozens of error messages and other obscure issues Using the "Smart Upgrade" toolkit to automate upgrades Implementing policies to manage client settings and reduce administrative overhead Optimizing Lotus Notes performance and avoid user frustration Making the most of technical support tools and plug-ins Finding technical support and patches on the IBM developerWorks website Configuring Lotus Notes and

Lotus Notes has long been the leading groupware product used by companies wanting to improve internal communications and streamline business processes. This guide to building an intranet covers the process from its fundamentals to its final implementation based on Domino 5.0, the component that brought Lotus Notes into the Internet age and made it a natural choice for the foundation of an internal office network. Explained are the differences between the Internet and an intranet and how Lotus Notes and Domino work. Businesses can then analyze their needs and use a step-by-step process to plan, design, and create a personalized intranet.

At last, a book that, with honesty and humor, reveals the consultant's hidden playbook. A top-level consultant who came back in from the cold to become a corporate executive with one of the top U.S. banks, Romaine chronicles the

behind-the-scenes deal making among executives, consultants, and third-party outsourcers that typifies all too many of today's corporations. . . . Romaine also presents sound recommendations that can help responsible managers and consultants survive and win. - M. A. Turin, Former IBM Group Director for International Technical Support, Vice President of Gartner Group, President of Turin Associates. . . intriguing and very relevant, particularly in light of Enron. - Ralph Nader

Even if you're not in business, it's an interesting story, and worth the read. - Foreword

Finally, the real story about corporate America with its increased reliance on consultants. Since the 1990s, consulting solutions have become the de facto standard for solving business problems and providing cover for corporate decision makers. This is not the typical CEO whitewash, or business management primer. Steve Romaine offers a view never before shared with management or stockholders as he takes a hired gun's journey beginning at the outside looking in, and ending at the pinnacle of a corporation's power. Based on his experience of working for IBM, his

later role as a self-employed consultant, and finally his responsibilities as senior vice president for NationsBank, Romaine makes it clear that the issues leading to the collapse of Enron were not isolated events. *Soldier of Fortune 500* explores corporate cronyism between executives and their consultants, and builds a convincing case of how, without the proper safeguards, such cozy relationships can lead to pervasive problems, placing stockholders, employees, and the future viability of the American corporation at risk. This book is a must read for corporate managers, employees, and anyone involved with the consulting business.

Steve Romaine (Fairfield, CT), now an independent consultant, has held high-level consulting and managerial positions with KPMG Consulting, The Monitor Company, NationsBank, Informed Technology Decisions, and IBM.

10 Minute Guide to Lotus Notes Mail 4.6 Butterworth-Heinemann

I-Way Robbery is for security, investigative, law enforcement, and other criminal justice professionals, offering a unique look at the Internet as the new crime environment for the 21st century. The book provides an overview of the Internet, its impact on nations, societies, criminals, security officers, and law

enforcement professionals, and includes recommended basic, protective measures. I-Way Robbery is written in non-technical terms. It is also an excellent reference for business and government agency managers who must understand their responsibilities as they relate to asset protection - especially those who have on and off ramps connected to the I-Way. Boni and Kovacich start with the basics and teach users about the internet before teaching them about the security risks. This addresses the subject from the non-information systems perspective and educates the average user about the overall risks and appropriate protective measures they should enforce and follow. This book is a must-have for anyone with an interest in the pitfalls and precautions of doing business on the internet. I-Way Robbery: Crime on the Internet, uniquely approaches the much talked about topic of Internet Crime and security. It is written for anyone who wants a basic understanding of the Internet crime environment now and into the 21st Century. It covers related Internet business, government, global, laws, politics and privacy issues; techniques

being used to commit crimes; what can be done about it; and what challenges the future may hold including topics such as information warfare. Drawing on their decades of experience in high-technology and Internet crime investigations William Boni and Dr. Gerald L. Kovacich have written not only an excellent reference book for business and government agency managers, small business owners, and teachers, but for anyone who drives along the I-Way. Addresses the subject of internet security from the non-information systems perspective Detailed incident reports to fully illustrate the specific issues readers must understand to fully appreciate the risks of I-Way activity Covers a broad range of issues [Will the Reactors React Responsibly? : Joint Hearing Before the Subcommittee on Government Management, Information, and Technology of the Committee on Government Reform and the Subcommittee on Technology of the Committee on Science, House of Representatives, One Hundred Sixth Congress, First Session, October 22, 1999](#) Pearson Education
