## **NIGEL FITZPATRICK**

---

Nutrition and Enhanced Sports Performance Constable & Robinson

At last, the Banting book that will answer ALL your questions about the banting lifestyle AND provide you with the solution to permanent weight loss! With solid research supported by actual case studies and before-and-after photographs, readers will now be able to access all the information they need about Banting in just one book.

**Stop Counting Calories and Start Losing Weight** Penguin  
Random House South Africa

'Scientists labelled fat the enemy . . . they were wrong.' Time magazine We've been told for years that eating fat is bad for us, that it is a primary cause of high blood pressure, heart disease and obesity. The Real Meal Revolution debunks this lie and shows us the way back to restored health through eating what human beings are meant to eat. This book will radically transform your life by showing you clearly, and easily, how to take control of not just your weight, but your overall health, too - through what you eat. And you can eat meat, seafood, eggs, cheese, butter, nuts . . . often the first things to be prohibited or severely restricted on most diets. This is Banting, or Low-Carb, High-Fat (LCHF) eating, for a new generation, solidly underpinned by years of scientific research and by now incontrovertible evidence. This extraordinary book, already a phenomenal bestseller, overturns

the conventional dietary wisdom of recent decades that placed carbohydrates at the base of the supposedly healthy-eating pyramid and that has led directly to a worldwide epidemic of obesity and diabetes. Both a startling revelation, and as old as humanity itself, it offers a truly revolutionary approach to healthy eating that explodes the myth, among others, that cholesterol is bad for us. This is emphatically not just another unsustainable, quick-fix diet or a fad waiting to be forgotten, but a long-delayed return to the way human beings are supposed to eat.

**Fast After 50** Humana Press

Nutrition and Enhanced Sports Performance: Muscle Building, Endurance and Strength, Second Edition, includes comprehensive sections on the role of nutrition in human health, various types of physical exercises, including cardiovascular training, resistance training, aerobic and anaerobic exercises, bioenergetics and energy balance, and the nutritional requirements associated with each. Other sections cover sports and nutritional requirements, the molecular mechanisms involved in muscle building, an exhaustive review of various foods, minerals, supplements, phytochemicals, amino acids, transition metals, competition training, healthy cooking, physical training, and lifestyle and dietary recommendations for sports performance. This updated edition includes new chapters on mood, alertness, calmness and psychomotor performance in sports, extreme sports, natural myostatin inhibitor and lean body mass, the benefits of caffeine in sport nutrition formulations, the role of vitamin D in athletic performance, probiotics and muscle mass. Provides a comprehensive appraisal of the nutritional benefits of exercise in human health Compiles chapters reviewing the nutritional

prophylaxis in human health Addresses performance enhancement drugs and sports supplements Presents various types of physical exercises and addresses exercise and nutritional requirements in special populations Discusses sports nutrition and the molecular mechanisms involved in muscle building Contains an exhaustive review of various food, minerals, supplements, phytochemicals, amino acids, transition metals, small molecules and other ergogenic agents Highlights the aspects of healthy cooking, physical training, lifestyle and dietary recommendations for sports performance

The Eat Right Revolution Springer Nature

"It took a viral pandemic to reinvigorate the evidence that a low-carb, high-fat (LCHF) diet may be a 'vaccine' against ill health and premature death. The Eat Right Revolution exposes the real pandemic we should all worry about - not another coronavirus, but a diet-related medical condition that threatens people's life expectancy and well-being globally. The Eat Right Revolution sets out a quick, safe, cheap and effective investment you can make for lifelong health in body and mind. It exposes the root causes of chronic, life-threatening comorbidities, such as obesity, type-2 diabetes, heart disease and more, and explains why LCHF and ketogenic diets can be safer, more effective solutions than drugs to beat these diseases. With recipes, food lists and meal plans, as well as updated, personalised do's and don'ts on the right LCHF approach for each individual, this book is an essential guide to living a longer, stronger, healthier life."--

The 4-Hour Work Week Penguin Random House South Africa

This new volume in the Encyclopaedia of Sports Medicine series, published under the auspices of the International Olympic

Committee, delivers an up-to-date, state of the art presentation of the scientific aspects of conditioning, injury prevention, and competition. The book covers the key areas of scientific knowledge in sport and is divided into: physiology and biochemistry; nutrition; anthropometry; immunology; cell biology; biomechanics, engineering and ergonomics; psychology; pharmacology; limitations to performance; special populations; and exercise and health. Presented in a clear style and format, *The Olympic Textbook of Science in Sport*, draws on the expertise of an international collection of contributors who are recognized as leaders in their respective fields. It will be indispensable for all sport scientists and medical doctors who serve athletes and sports teams and is an invaluable reference for students of sport and exercise science.

*The Olympic Textbook of Science in Sport* Constable & Robinson  
A definitive resource for low carbohydrate living. Trading up from sugars and starches to a cornucopia of nutrient-rich, satisfying, and healthy foods.

**The Diabetes Diet** BenBella Books, Inc.

This new text presents the most up-to-date research based information regarding popular sport/performance nutrient dense diets and nutritional supplements and their constituents that directly or indirectly utilize them. Previous chapters have been fully revised and new chapters have been added to cover important cutting edge topics. New chapters include: (1) Carbohydrate Utilization and Disposal in Strength/Power Training & Sports, (2) Exercise for Athletes with Diabetes, and (3) Beyond the Obvious: Future Innovations in Sports Nutrition. The volume is divided into four sections: (1) The Industrial Nature of the

Supplement Game; (2) Nutritional Basics First; (3) Specialized Nutritional Strategies & Supplements; and (4) Present and Future Directions of Nutritional Supplements. Editors and authors are co-founders, board members or members of the International Society of Sports Nutrition and or current/former doctoral students from the Exercise and Sport Nutrition Laboratory located at Texas A&M University. *Nutritional Supplements in Sports and Exercise, Second Edition* presents cutting edge information and is valuable to sports nutritionists, exercise physiologists, strength and conditioning/personal trainers, athletic trainers, athletic coaches, registered dietitians, and college/professional sport affiliates.

*The Protein Pacing Diet* Penguin Random House South Africa  
*Sports Nutrition for Health Professionals* merges the basic principles and latest evidence-based scientific understanding of sports nutrition with the real-world practical applications that health professional students must master to help their current and future clients to optimize athletic performance, overall satisfaction and success with sports and physical activity. Step-by-by, you'll learn about the scientific basis of sports nutrition and how to apply that knowledge to real-life situations and interactions with clients. You'll follow six different clients as they are evaluated by a variety of health professionals and undergo a series of assessments and self-administered tests. By seeing how the science of Sports Nutrition can be applied to sample clients, you will be able to take that knowledge and apply it to your future clients.

*The Real Meal Revolution* Robinson

The pandemic proved that it is one thing to sit around waiting for

scientists to develop a vaccine against a new virus, but it is quite another for doctors and dietitians to tell people to ignore a weapon already close at hand, in their kitchens, that can protect them from the worst effects of COVID-19 infection. That weapon is a low-carb, high-fat diet ... It took a viral pandemic to reinvigorate the evidence that a low-carb, high-fat (LCHF) diet may be a 'vaccine' against ill health and premature death. The Eat Right Revolution exposes the real pandemic we should all worry about - not another coronavirus, but a diet-related medical condition that threatens people's life expectancy and well-being globally. The Eat Right Revolution sets out a quick, safe, cheap and effective investment you can make for lifelong health in body and mind. It exposes the root causes of chronic, life-threatening comorbidities, such as obesity, type-2 diabetes, heart disease and more, and explains why LCHF and ketogenic diets can be safer, more effective solutions than drugs to beat these diseases. With recipes, food lists and meal plans, as well as updated, personalised do's and don'ts on the right LCHF approach for each individual, this book is an essential guide to living a longer, stronger, healthier life.

#### Lore of Running Outskirts Press

Dr. Noakes explores the physiology of running, all aspects of training, and recognizing, avoiding, and treating injuries. 133 illustrations.

#### **Lore of Nutrition** Human Kinetics

Fast After 50 is for every endurance athlete who wants to stay fast for years to come. For runners, cyclists, triathletes, swimmers, and cross-country skiers, getting older doesn't have to mean getting slower. Drawing from the most current research on aging and sports performance, Joe Friel--America's leading endurance sports coach--shows how athletes can race strong and stay healthy well past age 50. In his groundbreaking book Fast After 50, Friel offers a smart approach for athletes to ward off the effects of age. Friel shows athletes how to extend their racing

careers for decades--and race to win. *Fast After 50* presents guidelines for high-intensity workouts, focused strength training, recovery, crosstraining, and nutrition for high performance: How the body's response to training changes with age, how to adapt your training plan, and how to avoid overtraining How to shed body fat and regain muscle density How to create a progressive plan for training, rest, recovery, and competition Workout guidelines, field tests, and intensity measurement In *Fast After 50*, Joe Friel shows athletes that age is just a number--and race results are the only numbers that count. With contributions from: Mark Allen, Gale Bernhardt, Amby Burfoot, Dr. Larry Creswell, John Howard, Dr. Tim Noakes, Ned Overend, Dr. John Post, Dr. Andrew Pruitt, and Lisa Rainsberger.

#### The Stone Age Diet CRC Press

Tim Noakes is one of the world's leading authorities on the science behind sport and a successful sportsman in his own right. Through a lifetime of research, he has developed key scientific concepts in sport that have not only redefined the way elite athletes and teams approach their professions, but challenged conventional global thinking in these areas. In this new and updated edition of *Challenging Beliefs*, Noakes shares his views on everything from the myths perpetuated by the sports-drink industry to the prevalence of banned substances, the need to make rugby a safer sport and the benefits of a high-protein, low-carb diet. The teams and athletes with whom Noakes has worked make fascinating backdrops to these topics, highlighting the importance of science in sport in human terms. In providing an intimate look at the golden threads running through Noakes's life and career, this remarkable book reveals the landmark theories

and principles generated by one of the greatest minds in the history of sports science.

#### **The Obesity Code** Brooks Cole

This low-carb diet book is geared towards diabetics. An engineer by training, Bernstein pioneered blood glucose self-monitoring and the tight control of blood sugar that is now accepted as the standard treatment of diabetes.

#### *Sugar Free* Penguin Random House South Africa

Like most doctors, Peter Brukner was trained to believe that drugs and surgery are the answers to all medical problems – including the epidemics of obesity, diabetes and other ‘modern illnesses’ that are threatening our healthcare system and the life expectancy of future generations. For years he was dismissive of any ‘alternative’ diets or lifestyle changes. But that all changed when, facing the double threat of obesity and diabetes himself, his research led to a shocking realisation that overturned a lot of the medical ‘truth’ he’d taken for granted: our dietary guidelines and food pyramid have no scientific basis. So he switched to a low-carb, healthy fat lifestyle – and dropped 13 kilos, lowered his insulin levels and drastically improved his liver function in just three months. In *A Fat Lot of Good* Dr Brukner busts the dietary myths we’ve been living by for decades and gives you all the information you need, in as simple a way as possible, to live a longer, healthier and – most importantly – more enjoyable life. *A Fat Lot of Good* features:

- The real reasons why we’re all getting fatter and less healthy
- The lowdown on carbs, fats and proteins: what they do, which we actually need and how much
- What you need to know about insulin, inflammation and the gut microbiome
- Dr Brukner’s Five Golden Rules for a healthy lifestyle
- Tips on

reading food labels, making smart choices when eating out and buying real food on a budget · Advice on how to get the right levels of exercise, sleep and sun to boost your health · A selection of simple low-carb, healthy fat recipes to get you started Packed full of the latest research and countless practical tips, *A Fat Lot of Good* is the complete toolkit for building the healthy lifestyle that's right for you. All author proceeds donated to SugarByHalf. [The Art and Science of Low Carbohydrate Living](#) Simon and Schuster

Let me guess... You've tried every diet under the sun. You've lost weight and put it back on. The more you diet, the more you crave food. You have almost given up hope of being and staying slim. You need to *Stop Counting Calories & Start Losing Weight!* *Stop Counting Calories & Start Losing Weight* is the definitive guide to The Harcombe Diet. This book covers each of the three phases of The Harcombe Diet in detail, with meal plans for each phase - for omnivores and vegetarians - and the recipes to accompany these plans. In this book, Zoe Harcombe shows how calorie counting leads to three extremely common medical conditions, which cause overeating and weight gain. The Harcombe Diet will help you to lose weight and keep it off through eating better, not less. Weight loss in the first five days is typically 7lb. *Stop Counting Calories & Start Losing Weight: The Harcombe Diet* has the ultimate Question & Answer section, with over 100 Q&As covering Avocados to Xylitol with Natural Live Yoghurt, Nuts and Soya in-between. The Harcombe Diet has changed the lives of tens of thousands of people, freeing them from yo-yo dieting and returning them to great health. Let it do the same for you too. [Basketball Sports Medicine and Science](#) Jonathan Ball Publishers

This book will redefine how you approach losing weight. Based on over 15 years of research and with personal stories, amazing before and after photos, recipes and sidebars, *The 4-Hour Body*, from international bestselling author Tim Ferriss, will give unbelievable results and change the way you look forever. 'Mr. Ferriss makes difficult things seem very easy' -- NY Times 'The Superman of Silicon Valley' - Wired 'This book has changed my life' -- \*\*\*\*\* Reader review 'An uncommon genius' -- \*\*\*\*\* Reader review 'This book is awesome' -- \*\*\*\*\* Reader review 'Educational and mind blowing' -- \*\*\*\*\* Reader review

\*\*\*\*\*  
 Whatever your physical goal, *The 4-Hour Body* eclipses every other health manual by sharing the best kept secrets in the latest science and research to provide new strategies for redesigning the human body. And you don't need to exhaust yourself. International bestselling author, Timothy Ferriss, helps you reach your true genetic potential in 3-6 months with a commitment of less than four hours per week. You can pick and choose from a menu of options, from simple to extreme, for dramatic body changes. Packed full of personal case studies, before and after photos, recipes and top tips, this book will help you achieve your body goals in record time.

*The Eat Right Revolution* Wiley-Blackwell

A radically different, practical and doable way to achieve a healthy weight and substantially reduce your risk of diseases such as diabetes, heart disease, cancer and dementia. 'If you follow the advice here, you will improve your health, lose weight, avoid diabetes and reduce your risk of cancer and Alzheimer's. What more could you ask?' Dr Malcolm Kendrick, GP and author

of The Great Cholesterol Con 'A highly readable, smart and well-reasoned book based on the latest generation of rigorous science' Nina Teicholz, author of The Big Fat Surprise, and Adjunct Professor, New York University Recent research has shown that a diet that is very low in carbs and high in good fats is effective for weight loss, can counteract many diseases and also help athletic performance and endurance. The drawback is that it is difficult to stick to - because most people love carbs. But, as The Hybrid Diet demonstrates, we don't need to choose. The human body has been designed through millions of years of evolution to burn two different sources of fuel - glucose (which comes from the carbohydrates in fruit and vegetables) and ketones (which are made in the body from fat) - and to switch between them when food is scarce. The point of The Hybrid Diet is to show you how to make the best use of both options when you need them, and how best to switch between them. In their quest to discover the perfect diet, leading health journalist Jerome Burne and nutrition expert Patrick Holford have examined the latest cutting-edge

science and have put together a plan that is sound, simple and delicious - one that is based on how your body works best.

**The Real Meal Revolution** Penguin Random House South Africa Where fat was once regarded as the enemy, scientists now point to the huge amount of sugar we consume as being the real danger to our health. Karen Thomson's simple, effective and proven eight-week programme to quit sugar for good will dramatically improve your health while helping you to lost weight. Packed with recent scientific research and nutritional advice, it includes a chapter by research neuroscientist Dr Nicole Avena and provides eight weeks of meal plans, both vegetarian and non-vegetarian, put together by Emily Maguire. This updated international edition of Sugar Free features over 40 new mouth-watering new recipes developed to help you live a low-carb lifestyle.

The Low-Carb Fraud Academic Press

Offers techniques and strategies for increasing income while cutting work time in half, and includes advice for leading a more fulfilling life.
