Imagine you're one of 75,000 people working in a huge company, and the CEO wants to talk to you, one-on-one, to get to know and understand you. That's what Monty Moran did 20,000 times as he built the extraordinary culture that took Chipotle Mexican Grill from a regional burrito chain to a Fortune 500 superstar. In *Love Is Free, Guac Is Extra*, Monty shows how he used curiosity, vulnerability, love, and a unique understanding of the true meaning of empowerment to build a distinctive and wildly effective culture. From his teenage days befriending homeless people at a Colorado Dairy Queen to his nuanced navigation of a complex co-CEO relationship, Monty demonstrates a relentless humility and desire to understand the person across from him. This is not your average leadership book. This is a book about business leadership executed in a way you've never encountered before, by becoming the best version of yourself.

Our lives are getting faster and faster. We are engulfed in constant distraction from email, social media and our 'always on' work culture. We are too busy, too overloaded with information and too focused on analytical left-brain thinking processes to be creative. *Too Fast to Think* exposes how our current work practices, media culture and education systems are detrimental to innovation. The speed and noise of modern life is undermining the clarity and quiet that is essential to power individual thought. Our best ideas are often generated when we are free to think diffusely, in an uninterrupted environment, which is why moments of inspiration so often occur in places completely separate to our offices. To reclaim creativity, *Too Fast to Think* teaches you how to retrain your brain

into allowing creative ideas to emerge, before they are shut down by interruption, distraction or the self-doubt of your over-rational brain. This is essential reading for anyone who wants to maximize their creative potential, as well as that of their team. Supported by cutting-edge research from the University of the Arts London and insightful interviews with business leaders, academics, artists, politicians and psychologists, Chris Lewis takes a holistic approach to explain the 8 crucial traits that are inherently linked to creation and innovation.

The novel pits Ted Cogan, a forty-three-year-old surgeon and self-described womanizer, against Hank Madden, a handicapped veteran detective. From the outset it's not clear who is victim and who is victimizer, as the usually dispassionate Madden grapples with his long-suppressed prejudices and his obsession with bringing Ted Cogan to justice at any cost. It all leads up to the most stunning surprise ending since Scott Turow's *Presumed Innocent*.

Critical Decisions Made Simple John Wiley & Sons

This book develops a new paradigm in the field of leadership studies, referred to as the "leadership-as-practice" (L-A-P) movement. Its essence is its conception of leadership as occurring as a practice rather than residing in the traits or behaviours of particular individuals. A practice is a coordinative effort among participants who choose through their own rules to achieve a distinctive outcome. It also tends to encompass routines as well as problem-solving or coping skills, often tacit, that are shared by a community. Accordingly, leadership-as-practice is less about what one person thinks or does and more about what people may accomplish together. It is thus concerned with how leadership emerges and unfolds through day-to-day experience. The social and material contingencies impacting the leadership constellation - the people who are effecting leadership at any given time - do not reside outside of leadership but are very much embedded within it. To find leadership, then, we must look to the practice within which it is occurring. The leadership-as-practice approach resonates with a number of closely related traditions, such as collective, shared, distributed, and relational leadership, that converge on leadership processes. These approaches share a line of inquiry that acknowledges leadership as a social phenomenon. The new focus opens up a plethora of research opportunities encouraging the study of social processes beyond influence, such as intersubjective agency, shared sense-making, dialogue, and co-construction of responsibilities.
