SANTOS MYA

A Trust-Based Approach Univ of California Press
 Montgomery explores the roles that translation has played in the development of Western science from antiquity to the end of the 20th century. He presents case histories of science in translation from a variety of disciplines & cultural contexts.

Key Cultural Texts in Translation Modern Language Assn of Amer
 Culture has a significant influence on the emerging trends in translation and interpretation. By studying language from a diverse perspective, deeper insights and understanding can be gained. Redefining Translation and Interpretation in Cultural Evolution is a pivotal reference source for the latest scholarly research on culture-oriented translation and interpretation studies in the contemporary globalized society. Featuring coverage on a range of topics such as sociopolitical factors, gender considerations, and intercultural communication, this book is ideally designed for linguistics, educators, researchers, academics, professionals, and students interested in cultural discourse in translation studies.

Old Dogmas, New Approaches Routledge
 Starting from the critical notion that we should be asking questions of contemporary importance - and that 'importance' itself must be defined - Anthony Pym sets about undoing many of the currently dominant models of translation history, positing, among much else, that the object of this history should be translators as people, that researchers are subjectively involved in their object, that cultural systems are based on social will, that translators work in intercultural spaces, and that a model of cooperation through negotiation may be applied to the way translators (and researchers!) work between cultures. At the same time, the proposed methodology is eminently constructive, showing how many empirical techniques can be developed and applied: clear illustrations are given of corpus selection, working definitions, deceptive statistics, and the construction of networks and regimes, incorporating elaborate examples drawn from medieval and modernist fields, as well as finding space for notes on practical problems like funding research. Finding its focus in historical debates, this book cannot help but create contemporary debate: its arguments seek not only to revitalize the historical study of translation but also to develop the wider concerns of intercultural studies.

Cultural Translation and Knowledge Transfer on Alternative Routes of Escape from Nazi Terror Routledge
 Designed for the growing number of course on literary translation,

"Translating Literature" discusses the process and the product of literary translation, incorporating practical advice for translators and theoretical discussion of the role translations play in the evolution and interpretations of literatures. Exercises and examples highlight problems in translation. Lefevere shows that translations, like history, criticism, and anthologization, are part of a tradition of "rewriting" and are instrumental in the development and the teaching of literatures. "Translating Literature" concludes with an extensive bibliography of translation studies.

The Role of Henri Borel in Chinese Translation History

University of Chicago Press
 As long as there has been a need for language, there has been a need for translation; yet there is remarkably little scholarship available on pre-modern translation and translators. This exciting and innovative volume opens a window onto the complex world of translation in the multilingual and multicultural milieu of the ancient Mediterranean. From the biographies of emperors to Hittites scribes in the second millennium BCE to a Greek speaking Syrian slyly resisting translation under the Roman empire, the papers in this volume - fresh and innovative contributions by new and established scholars from a variety of disciplines including Classics, Near Eastern Studies, Biblical Studies, and Egyptology - show that translation has always been a phenomenon to be reckoned with. Accessible and of interest to scholars of translation studies and of the ancient Mediterranean, the contributions in *Complicating the History of Western Translation* argue that the ancient Mediterranean was a 'translational' society even when, paradoxically, cultures resisted or avoided translation. Indeed, this volume envisions an expansion of the understanding of what translation is, how it works, and how it should be seen as a major cultural force. Chronologically, the papers cover a period that ranges from around the third millennium BCE to the late second century CE; geographically they extend from Egypt to Rome to Britain and beyond. Each paper prompts us to reflect about the problematic nature of translation in the ancient world and challenges monolithic accounts of translation in the West.

Translation, Interpreting and Culture

John Benjamins Publishing
 This collection brings together two leading figures in the discipline of translation studies. The essays cover a range of fields, and combine theory with practical case studies involving the translation of literary texts.

Translation and Cultural Change

Peter Lang Gmbh, Internationaler Verlag Der Wissenschaften
 The Routledge Handbook of Translation History presents the first comprehensive, state-of-the-art overview of this multi-faceted disciplinary area and serves both as an introduction to carrying out research into translation and interpreting history and as a key

point of reference for some of its main theoretical and methodological issues, interdisciplinary approaches, and research themes. The Handbook brings together 30 eminent international scholars from a wide range of disciplinary backgrounds, offering examples of the most innovative research while representing a wide range of approaches, themes, and cultural contexts. The Handbook is divided into four sections: the first looks at some key methodological and theoretical approaches; the second examines some of the key research areas that have developed an interdisciplinary dialogue with translation history; the third looks at translation history from the perspective of specific cultural and religious perspectives; and the fourth offers a selection of case studies on some of the key topics to have emerged in translation and interpreting history over the past 20 years. This Handbook is an indispensable resource for students and researchers of translation and interpreting history, translation theory, and related areas.

Siting Translation

Routledge
 This groundbreaking 2007 volume gathers an international team of historians to present the practice of translation as part of cultural history. Although translation is central to the transmission of ideas, the history of translation has generally been neglected by historians, who have left it to specialists in literature and language. This book seeks to achieve an understanding of the contribution of translation to the spread of information in early modern Europe. It focuses on non-fiction: the translation of books on religion, history, politics and especially on science, or 'natural philosophy', as it was generally known at this time. The chapters cover a wide range of languages, including Latin, Greek, Russian, Turkish and Chinese. The book will appeal to scholars and students of the early modern and later periods, to historians of science and of religion, as well as to anyone interested in translation studies.

Translation and the Classic

Continuum
 This book, the first of its kind for an English-language audience, introduces a fresh perspective on the Polish literary translation landscape, providing unique insights into the social, political, and ideological underpinnings of Polish translation history. Employing a problem-based approach, the book creates a map of different research directions in the history of literary translation in Poland, highlighting a holistic perspective on the discipline's development in the region. The four sections explore topics of particular interest in current translation research, including translation and cultural borderlands, the agency of women translators, translators as intercultural mediators, and the intersection of translation research and digital methods. The 15 contributions demonstrate the ways in which Polish culture has represented translated work in its own way, informed and shaped by socio-political changes in

Polish history. At the same time, the volume situates Polish research in translation within the growing body of work on Central and Eastern European translation studies, as well as looking at them against the backdrop of the international development of the discipline. This collection offers a valuable addition to existing research on Western literary canons, making it key reading for scholars in translation studies, comparative literature, cultural studies, and Slavonic studies.

A Cultural History of Translators and Translating in Early Modern Europe Cambridge University Press

The most important and productive statements on the translation of literature from Roman times to the 1920s are collected in this book. Arranged thematically around the main topics which recur over the centuries - power, poetics, universe of discourse, language, education - it contains texts previously unavailable in English, and translated here for the first time from classical, Medieval, and Renaissance Latin, from French and from German. As the first survey of its kind in both scope and selection it argues that translation commands a central position in the shaping of European literatures and cultures. Translation/History/Culture creates a framework for further study of the history of translation in the West by tracing European historical thought about translation, and discussing the topicality of many of the texts included.

Complicating the History of Western Translation Routledge

Translation is a fundamental aspect of biblical scholarship and an ever-present reality in a global context. Scholars interested in more than linguistically oriented translation problems of a traditional nature often struggle to find an interdisciplinary venue in which to share their work. These essays, by means of critical engagement with the translation, translation practices, and translation history of texts relevant to the study of Bible and ancient and modern Christianity, explore theoretical dimensions and contemporary implications of translations and translation practice. The contributors are George Aichele, Roland Boer, Virginia Burrus, Alan Cadwallader, K. Jason Coker, John Eipper, Scott S. Elliott, Raj Nadella, Flemming A. J. Nielsen, Christina Petterson, Naomi Seidman, Jaqueline du Toit, Esteban Voth, and Matt Waggoner.

The Circulation of Enlightened Thought in Europe by Means of Translation Rodopi

The most important and productive statements on the translation of literature from Roman times to the 1920s are collected in this book. Arranged thematically around the main topics which recur over the centuries - power, poetics, universe of discourse, language, education - it contains texts previously unavailable in English, and translated here for the first time from classical, Medieval, and Renaissance Latin, from French and from German. As the first survey of its kind in both scope and selection it argues that translation commands a central position in the shaping of European literatures and cultures.

DEGREESTranslation/History/Culture creates a framework for further study of the history of translation in the West by tracing European historical thought about translation, and discussing the topicality of many of the texts included.

The Ancient Mediterranean in Perspective Bloomsbury Publishing

Acclaimed, when it first appeared, as a seminal work - a groundbreaking book that was both informative and highly readable - Translators through History is being released in a new edition, substantially revised and expanded by Judith Woodsworth. Translators have played a key role in intellectual exchange through the ages and across borders. This account of how they have contributed to the development of languages, the emergence of literatures, the dissemination of knowledge and the spread of values tells the story of world culture itself. Content has been updated, new elements introduced and recent directions in translation scholarship incorporated, providing fresh insights and a more nuanced view of past events. The bibliography contains over 100 new titles and illustrations have been refreshed and enhanced. An invaluable tool for students, scholars and professionals in the field of translation, the latest version of Translators through History remains a vital resource for researchers in other disciplines and a fascinating read for the wider public.

People, Politics, Poetics Society of Biblical Lit

Bible translators have focused their efforts on preparing a text that is clear, natural and accurate, with the expectation that audiences will understand the message if it is in their language. Field research among the Adioukrou of Côte d'Ivoire shows that audiences also need to have access to the contextual information the author expected his audience to bring to the text. When such information is provided, both understanding of and interest in the message increase dramatically. These findings support Relevance Theory's claim that meaning is inferred from the interaction of text and context. To the extent that the contextual knowledge evoked by the text for contemporary audiences differs from that evoked for the first audience, understanding is impaired. The Bible at Cultural Crossroads presents a model to assist translators in identifying contextual mismatches and applies it on the thematic level to mismatches between first-century Jewish and Adioukrou views of the unseen world, and on the passage level to contextual mismatches arising from four Gospel passages. In-text and out-of-text solutions for adjusting contextual mismatches are explored, with field research results showing the effectiveness of various solutions. Context is shown to be both a significant factor in communication and a dynamic one. Translations of the text alone are not sufficient for successful communication.

What is Translation History? Cambridge University Press

Over the last 30 years there has been a substantial increase in the study of the history of translation. Both well-known and lesser-known specialists in translation studies have worked tirelessly to give the history of translation its rightful place. Clearly, progress has been made, and the history of translation has become a viable independent research area. This book aims at claiming such autonomy for the field with a renewed vigour. It seeks to explore issues related to methodology as well as a variety of discourses on history with a view to laying the groundwork for new avenues, new models, new methods. It aspires to challenge existing theoretical and ideological frameworks. It looks toward the future of history. It is an attempt to address shortcomings that have prevented translation history from reaching its full disciplinary potential. From microhistory,

archaeology, periodization, to issues of subjectivity and postmodernism, methodological lacunae are being filled.

Contributors to this volume go far beyond the text to uncover the role translation has played in many different times and settings such as Europe, Africa, Latin America, the Middle-east and Asia from the 6th century to the 20th. These contributions, which deal variously with the discourses on methodology and history, recast the discipline of translation history in a new light and pave the way to the future of research and teaching in the field.

A Sourcebook John Benjamins Publishing

A Companion to Translation Studies is the first work of its kind. It provides an authoritative guide to key approaches in translation studies. All of the essays are specially commissioned for this collection, and written by leading international experts in the field. The book is divided into nine specialist areas: culture, philosophy, linguistics, history, literary, gender, theatre and opera, screen, and politics. Contributors include Susan Bassnett, Gunilla Anderman and Christina Schäffner. Each chapter gives an in-depth account of theoretical concepts, issues and debates which define a field within translation studies, mapping out past trends and suggesting how research might develop in the future. In their general introduction the editors illustrate how translation studies has developed as a broad interdisciplinary field. Accompanied by an extensive bibliography, this book provides an ideal entry point for students and scholars exploring the multifaceted and fast-developing discipline of translation studies.

Translation and Cultural Change Rodopi

What's new in Translation Studies? In offering a critical assessment of recent developments in the young discipline, this book sets out to provide an answer, as seen from a European perspective today. Many new ideas actually go back well into the past, and the German Romantic Age proves to be the starting-point. The main focus lies however on the last 20 years, and, beginning with the cultural turn of the 1980s, the study traces what have turned out since then to be ground-breaking contributions (new paradigms) as against what was only a change in position on already established territory (shifting viewpoints). Topics of the 1990s include nonverbal communication, gender-based Translation Studies, stage translation, new fields of interpreting studies and the effects of new technologies and globalization (including the increasingly dominant role of English). The author's aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies.

New Paradigms Or Shifting Viewpoints? OUP Oxford

A collection of essays which represent the different strands of work being undertaken in the field of translation studies. The book reflects the shift in emphasis away from a more descriptive form of translation to the view that translation occupies a central position in the development of culture.

Identity as Change in the History of Culture IGI Global

"Niranjana brings into colloquy key texts from a classic age of translation and new post-humanistic texts on the same issues. She shows how the questions of translation must be reframed in light of the critique of emerging work on imperialism and cultural studies. This is a key work for translation studies."—Frances Bartkowski, author of *Feminist Utopias*
