Explores computer-intensive probability and statistics for ecosystem management decision making

Simulation is an accessible way to explain probability and stochastic model behavior to beginners. This book introduces probability and statistics to future and practicing ecosystem managers by providing a comprehensive treatment of these two areas. The author presents a self-contained introduction for individuals involved in monitoring, assessing, and managing ecosystems and features intuitive, simulation-based explanations of probabilistic and statistical concepts. Mathematical programming details are provided for estimating ecosystem model parameters with Minimum Distance, a robust and computer-intensive method. The majority of examples illustrate how probability and statistics can be applied to ecosystem management challenges. There are over 50 exercises - making this book suitable for a lecture course in a natural resource and/or wildlife management department, or as the main text in a program of self-study. Key features: Reviews different approaches to wildlife and ecosystem management and inference. Uses simulation as an accessible way to explain probability and stochastic model behavior to beginners. Covers material from basic probability through to hierarchical Bayesian models and spatial/ spatio-temporal statistical inference. Provides detailed instructions for using R, along with complete R

programs to recreate the output of the many examples presented. Provides an introduction to Geographic Information Systems (GIS) along with examples from Quantum GIS, a free GIS software package. A companion website featuring all R code and data used throughout the book. Solutions to all exercises are presented along with an online intelligent tutoring system that supports readers who are using the book for self-study.

Managerial Accounting for Managers, 2nd Edition by Noreen/Brewer/Garrison is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen book was created to serve customers who do not wish to teach the financial accounting-oriented content that is included in the Garrison book. Of our three books (the Brewer book, the Garrison book, and the Noreen book), the Noreen book is the most pure management accounting textbook. The other two books have greater amounts of financial accounting content. Managerial Accounting for Managers, 2nd Edition is geared towards professors who love Garrison's market-leading managerial accounting content, but have been bothered by the debits and credits included in the book. It includes the same coverage of managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization. The job-order costing chapter has been extensively rewritten to remove all journal entries.

Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making.

Covers the strategic management topics in cost accounting. This title helps students to understand about the management and the role of cost accounting in helping an organization succeed. It addresses issues such as: How does a firm compete? and What type of cost management

information is needed for a firm to succeed?

Weygandt's Managerial Accounting, Third Canadian Edition retains the same features that made it popular in the previous editions: it gives students all the necessary techniques and concepts of managerial accounting in a focused, concise framework with an excellent pedagogy that's been praised by instructors. It does this by focusing on the tools students need to succeed, whether as accountants or in other career paths. Incorporating the unique Decision Toolkit learning system, and developed around a framework of decision-making, Weygandt Managerial is the perfect fit for any one-semester undergraduate managerial accounting course. However, the authors understand that many students in this course are not accounting majors and will need to understand how managerial accounting is used as a management tool. Therefore, Weygandt Managerial focuses on building decision-making skills, understanding how to use accounting information to make quality business decisions, and developing tools that can be used by future managers.

Managerial Accounting, 9th Edition provides students with a clear introduction to the fundamental managerial accounting concepts needed for anyone pursuing a career in accounting or business. The primary focus of Managerial Accounting is to help students understand the application of accounting principles and techniques in practice through a variety of engaging resources and homework exercises. By connecting the classroom to the business world through real company examples, an emphasis on decision making, and key data analysis skills appropriate at the introductory level, students are better prepared as future professionals in today's business world. *Managerial Accounting Tools for Business Decision Making 6E with WileyPlus* Richard d Irwin

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.
