Amazon.com: Force of Gravity: Gravity Series, Book 1 ... Since it is a force, gravity is usually measured using different formulas, depending on whether it is a mechanical (classical) or relativistic physical approach. It is usually represented in kilograms of force, that is, in Newtons (N) or, also, by the acceleration it imprints on the objects on which it acts, which on the earth's surface reaches about 9.80665 m/s². What is the force of gravity? Concept, Discovery and Examples Since we have explored gravity and how it effects dropped objects (the same regardless of mass) perhaps we should think about what is needed to escape gravity. In order to do this we need to consider forces. So we exerted forces on one another with the hula hoops, staying safe of course! gravity | Kelly St. Scientists Hello, Sign in.
