—The New York Times Book Review A beautiful repackaging marking the twentieth anniversary of the beloved, award-winning novel that celebrates teachers and learning. Ten-year-old Frederika (Fred for short) doesn't have much faith that the new teacher in town will last very long. After all, they never do. Most teachers who come to their one-room schoolhouse in remote Alaska leave at the first smell of fish, claiming that life there is just too hard. But Miss Agnes is different: she doesn't get frustrated with her students, and finds new ways to teach them to read and write. She even takes a special interest in Fred's sister, Bokko, who has never come to school before because she is deaf. For the first time, Fred, Bokko, and their classmates begin to enjoy their lessons—but will Miss Agnes be like all the rest and leave as quickly as she came?

Dubliners is a collection of picturesque short stories that paint a portrait of life in middle-class Dublin in the early 20th century. Joyce, a Dublin native, was careful to use actual locations and settings in the city, as well as language and slang in use at the time, to make the stories directly relatable to those who lived there. The collection had a rocky publication history, with the stories being initially rejected over eighteen times before being provisionally accepted by a publisher—then later rejected again, multiple times. It took Joyce nine years to finally see his stories in print, but not before seeing a printer burn all but one copy of the proofs. Today Dubliners survives as a rich example of not just literary excellence, but of what everyday life was like for average Dubliners in their day. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Three distinct types of contractions perform colonic motility functions. Rhythmic phasic contractions (RPCs) cause slow net distal propulsion with extensive mixing/turning over. Infrequently occurring giant migrating contractions (GMCs) produce mass movements. Tonic contractions aid RPCs in their motor function. The spatiotemporal patterns of these contractions differ markedly. The amplitude and distance of propagation of a GMC are several-fold larger than those of an RPC. The enteric neurons and smooth muscle cells are the core regulators of all three types of contractions. The

regulation of contractions by these mechanisms is modifiable by extrinsic factors: CNS, autonomic neurons, hormones, inflammatory mediators, and stress mediators. Only the GMCs produce descending inhibition, which accommodates the large bolus being propelled without increasing muscle tone. The strong compression of the colon wall generates afferent signals that are below nociceptive threshold in healthy subjects. However, these signals become nociceptive; if the amplitudes of GMCs increase, afferent nerves become hypersensitive, or descending inhibition is impaired. The GMCs also provide the force for rapid propulsion of feces and descending inhibition to relax the internal anal sphincter during defecation. The dysregulation of GMCs is a major factor in colonic motility disorders: irritable bowel syndrome (IBS), inflammatory bowel disease (IBD), and diverticular disease (DD). Frequent mass movements by GMCs cause diarrhea in diarrhea predominant IBS, IBD, and DD, while a decrease in the frequency of GMCs causes constipation. The GMCs generate the afferent signals for intermittent short-lived episodes of abdominal cramping in these disorders. Epigenetic dysregulation due to adverse events in early life is one of the major factors in generating the symptoms of IBS in adulthood.

In this pulse-pounding final installment of the Don't Turn Around trilogy, which Kirkus Reviews called "The Girl with the Dragon Tattoo for teens, a surefire hit," Noa and Peter race across the country in their search to destroy Project Persephone before time runs out. Noa Torson is out of options. On the run with the three remaining teens of Persephone's Army, she is up against immeasurable odds. The group is outnumbered, outsmarted, and outrun. But they are not giving up. When Noa and Peter realize they can't run anymore, and that Noa's health is quickly failing, they know they must go back to where this began. But when they come face-to-face with the man who started it all, the question becomes, can they win? This riveting final book truly ratchets up the action as Noa and Peter confront the evil that has chased them and won't let them go.

A Critical Look at Life-Cycle Investing Harper Collins

The shocking, definitive account of the 2020 election and the first year of the Biden presidency by two New York Times reporters, exposing the deep fissures within both parties as the country approaches a political breaking point. This is the authoritative account of an eighteen-month crisis in American democracy that will be seared into the country's political memory for decades to come. With stunning, in-the-room detail, New York Times reporters Jonathan Martin and Alexander Burns show how both our political parties confronted a series of national traumas, including the coronavirus pandemic, the January 6 attack on the Capitol, and the political brinksmanship of President Biden's first year in the White House. From Donald Trump's assault on the 2020 election and his ongoing campaign of vengeance against his fellow Republicans, to the behind-the-scenes story of Biden's selection of Kamala Harris as his running mate and his bitter struggles to unite the Democratic Party, this book exposes the degree to which the two-party system has been strained to the point of disintegration. More than at any time in recent history, the long-established traditions and institutions of American politics are under siege as a set of aging political leaders struggle to

hold together a changing country. Martin and Burns break news on most every page, drawing on hundreds of interviews and never-before-seen documents and recordings from the highest levels of government. The book asks the vitally important (and disturbing) question: can American democracy, as we know it, ever work again?

"The Ages of the Investor: A Critical Look at Life-cycle Investing" is intended to be the first installment in the "Investing for Adults" series. Just as grown-ups do not believe in the Tooth Fairy, the Easter Bunny, or Santa Claus, "Investing adults" know that there is no such creature as the Stock-picking Fairy or the Market-timing Fairy. Further, there is no Risk Fairy who will write you cheap options that will protect your stock holdings against loss. Investing adults are familiar with Gene Fama, Zvi Bodie, Jack Bogle, and Burton Malkiel, and understand that a mean variance optimizer does not blend vegetables. In other words, this series is not for beginners. Future topics will, with luck, include the limits of market efficiency and diversification in increasingly non-segmented global markets.

The job of the centre-half (or central defender) is to stop opposing players from scoring. In this first-ever cultural history of these traditionally bruising hard men, Leo Moynihan (*Four Four Two*) explores the unique mindset and last-ditch, bone-crunching tackles of those hellbent on destroying glory. Football is often romanticised as 'The Beautiful Game'. If true then the game's centre-half might be considered as the unsightly pimple on the end of its otherwise perfectly formed nose. The stopper, the last line of defence, the big man with small ideas. The lump who lumps it. *Thou Shall Not Pass* (the title comes from a command England captain Terry Butcher would shout before every match) celebrates the football position where brutal characters are loved for their hard-hitting tackles and bruising mentality and yet laughed at for their apparent lack of skill. As well as covering the long and illustrious history of the centre-half, the book will take the reader into the muddy penalty area frequented by our protagonists, into their domain. The places they head the ball, the places they tackle, the places in which they will stop at nothing to stop a forward. What makes them approach the game the way they do? What makes them different from those whose sole purpose is flair? Rich with amazing anecdotes, the book explore all aspects of the position and delve into the mentality of those who ply their trade there: what makes a player willing to put his face in the way of danger, how have tactics governed the role over the decades and what dark arts centre-halves must master in order to stop their foes.

This is an addictive, gloves-off exposé from the producer of the classic films *The Sting*, *Taxi Driver*, and *Close Encounters of the Third Kind*—and the first woman ever to win an Academy Award for Best Picture—who made her name in Hollywood during the halcyon seventies and the yuppie-infested eighties and lived to tell the tale. Wickedly funny and surprisingly moving, *You'll Never Eat Lunch in This Town Again* takes you on a trip through the dream-manufacturing capital of the world and into the vortex of drug addiction and rehab on the arm of one who saw it all, did it all, and took her leave. Alongside its positive impact of providing a global reach, the Internet is prone to a variety of abuses. In the 1990s it was unauthorised access of computers and impairment of the operation of computers through the introduction of viruses and worms that took centre stage. Since then the potential of the Internet for fraudulent activities has been realised by the criminal fraternity and, in recent years, we have seen, for instance, the rise of identity theft and the widespread distribution of offensive and illegal materials. The collection of essays in this volume, while being highly selective, provides a snapshot of the parameters of computer crime, the legal response and discussions surrounding ways to improve the security of cyberspace.

"Influenza pandemics are unpredictable but recurring events that can have severe consequences on societies worldwide. This revised WHO guidance publication on pandemic influenza preparedness and response acknowledges that pandemic preparedness is centered around health sectors planning but must also be broader. WHO therefore advocates a "whole-of-society" approach to sustainable and ethical pandemic preparedness while focusing in more detail on the role of the health sector. The roles of WHO and national governments are outlined to create a better understanding of how health and non-health sectors, both public and private, all contribute to pandemic preparedness"-- Publisher's description.
