Routledge

Epidemiological Change and Chronic Disease in Sub-Saharan Africa offers new and critical perspectives on the causes and consequences of recent epidemiological changes in sub-Saharan Africa, particularly on the increasing incidence of so-called 'non-communicable'

and chronic conditions. Historians, social anthropologists, public health experts and social epidemiologists present important insights from a number of African perspectives and locations to present an incisive critique of 'epidemiological transition' theory and suggest alternative understandings of the epidemiological change on the continent. Arranged in three parts, 'Temporalities: Beyond Transition', 'Numbers and Categories' and 'Local Biologies and Knowledge Systems', the chapters cover a broad range of subjects and themes, including the

trajectory of maternal mortality in East Africa, the African smoking epidemic, the history of sugar consumption in South Africa, causality between infectious and non-communicable diseases in Ghana and Belize, the complex relationships between adult hypertension and paediatric HIV in Botswana, and stories of cancer patients and their families as they pursue treatment and care in Kenya. In all, the volume provides insights drawn from historical perspectives and from the African social and clinical experience to offer new perspectives on the changing

epidemiology of sub-Saharan Africa that go beyond theories of 'transition'. It will be of value to students and researchers in Global Health, Medical Anthropology and Public Health, and to readers with an interest in African Studies.

Tropical Cyclone Disasters World Bank Publications

Calcretes are an important component of many ancient fluvial, lacustrine and shallow-marine carbonate sequences, and they are widely developed in many parts of the world at the present time. Calcretes are useful to the earth scientist involved in reconstructing ancient environments, palaeoclimates and palaeographics, and they may also reveal details of soil biota and chemistry. Over the last two decades the journal *Sedimentology* has published a number of articles on this subject and a compilation of them is presented here. In addition to the five main sections, this volume also includes an introduction to the subject that offers a review of recent work on calcretes. The collection of papers illustrates the range of calcrete occurrences and the great variety of textures and fabrics. This volume is authored and edited by experts and will

serve as more than an introduction to the subject for geologists, soil scientists and geographers. If you are a member of the International Association of Sedimentologists, for purchasing details, please see:

Fluid properties and hydraulic units - Hydrostatics - Fundamental concepts of fluid flow - Orifices, gates, and tubes - Weirs - Pipes - Steady uniform flow in open channels - Open channels with nonuniform flow - High-velocity transitions - Wave motion and forces - Spatially variable and unsteady flow - Measurement of flowing water - Computational hydraulics - Computer programs in hydraulics.

Entreprises et entrepreneurs africains Food & Agriculture Organization of the UN (FAO)

The definitive, easy to understand and breakthrough guide on how young people can take their limited first income and turn it into a small fortune by the time they turn thirty from an expert financial planner. Most people know that there are 70 million Baby Boomers in America

today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With

the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Advances in Construction and Demolition Waste Recycling: Management, Processing and Environmental Assessment is divided over three parts. Part One focuses on the management of construction and demolition waste, including estimation of quantities and the use of BIM and GIS tools. Part Two reviews the processing of recycled aggregates, along with the performance of concrete mixtures using different types of recycled aggregates. Part Three looks at the environmental assessment of non-hazardous waste. This book will be a standard reference for civil engineers, structural engineers, architects and academic researchers working in the field of construction and demolition waste. Summarizes key recent research in recycling and reusing concrete and

demolition waste to reduce environmental impacts. Considers techniques for managing construction and demolition waste, including waste management plans, ways of estimating levels of waste, and the types and optimal location of waste recycling plants. Reviews key steps in handling construction and demolition waste.

Piagetian Cognitive-development Research and Mathematical Education Elsevier

If you work in a university, you are almost certain to have heard the term 'open access' in the past couple of years. You may also have heard either that it is the utopian answer to all the problems of research dissemination or perhaps that it marks the beginning of an apocalyptic new era of 'pay-to-say' publishing. In this book, Martin Paul Eve sets out the histories, contexts and controversies for open access, specifically in the humanities. Broaching practical elements alongside economic histories, open licensing, monographs and funder policies, this book is a must-read for both those new to ideas about open-access scholarly communications and those with an already keen interest in the latest developments

for the humanities. This title is also available as Open Access via Cambridge Books Online.

Skylab Explores the Earth UCL Press

This book is open access under a CC BY 4.0 license. This book aims to inspire decision makers and practitioners to change their approach to climate planning in the tropics through the application of modern technologies for characterizing local climate and tracking vulnerability and risk, and using decision-making tools. Drawing on 16 case studies conducted mainly in the Caribbean, Central America, Western and Eastern Africa, and South East Asia it is shown how successful integration of traditional and modern knowledge can enhance disaster risk reduction and adaptation to climate change in the tropics. The case studies encompass both rural and urban settings and cover different scales: rural communities, cities, and regions. In addition, the book looks to the future of planning by addressing topics of major importance, including residual risk integration in local development plans, damage insurance and the potential role of climate vulnerability reduction credits.

In many regions of the tropics, climate planning is growing but has still very low quality. This book identifies the weaknesses and proposes effective solutions.

Daniel Craig Princeton Review

The report highlights the diverse challenges facing rural areas, their unused potential, and the inability of sectoral policy alone to address these challenges.

The History of Hurling OECD Publishing

EPA-670/4 John Wiley & Sons

In 43 chapters, this book provides an overview of entrepreneurship in Africa. It combines theoretical analysis and empirical descriptions and provides an in-depth analysis of how its economic capabilities can be restored.

Handbook of Hydraulics Thaulk

Updated to cover the Clare and Wexford triumphs of 1995 and 1996, this history of the Irish sport of hurling is mainly devoted to its development since the foundation of the GAA in 1884. It also deals with issues such as the geography of hurling and the game overseas.

Millionaire by Thirty Woodhead Publishing

You may not know it, but an innovation

has made our world a better place. The use of alcohol-based handrubs protects us from infectious diseases and saves millions of lives each year through safer health care. Here is the story of this revolutionary formulation, made available without patent and offered as a gift to humanity by Professor Didier Pittet and his team at Hôpitaux Universitaires de Genève (HUG). From bush doctors to giant pharmaceutical corporations, everyone can now produce effective handrubs, cheaply and easily. Didier Pittet's medical odyssey has taken him to the four corners of the Earth. It also reveals a new path open to human society, one that promises a radical shift from a predatory economic system to an economy of peace. Thierry Crouzet — blogger, essay writer, and novelist — is fascinated by contemporary issues located at the nexus of technology, politics, and literature. A former journalist, his published works in French include *Le Peuple des connecteurs* [The Connected People], a reflection on our networked society; *J'ai débranché* [How I Unplugged], a tale of digital burnout; and *La Quatrième Théorie* [The Fourth Theory], a political techno-thriller.

European Islamophobia Report 2015

KARTHALA Editions

Enabling the Business of Agriculture 2019 presents indicators that measure the laws, regulations and bureaucratic processes that affect farmers in 101 countries. The study covers eight thematic areas: supplying seed, registering fertilizer, securing water, registering machinery, sustaining livestock, protecting plant health, trading food and accessing finance. The report highlights global best performers and countries that made the most significant regulatory improvements in support of farmers.

ICOM Code of Ethics for Museums Gill & MacMillan

An extensively illustrated handbook summarizing the current state of the art of design and construction methods for all types of segmental bridges. Covers construction methodology, design techniques, economics, and erection of girder type bridges; arch, rigid frame, and truss bridges; cable-stayed bridges; and railroad bridges.

Althusser and Law Jot Pub

The French New Wave cinema is arguably the most fascinating of all film

movements, famous for its exuberance, daring, and avant-garde techniques. A History of the French New Wave Cinema offers a fresh look at the social, economic, and aesthetic mechanisms that shaped French film in the 1950s, as well as detailed studies of the most important New Wave movies of the late 1950s and early 1960s. Richard Neupert first tracks the precursors to New Wave cinema, showing how they provided blueprints for those who would follow. He then demonstrates that it was a core group of critics-turned-directors from the magazine Cahiers du Cinéma—especially François Truffaut, Claude Chabrol, and Jean-Luc Godard—who really revealed that filmmaking was changing forever. Later, their cohorts Eric Rohmer, Jacques Rivette, Jacques Doniol-Valcroze, and Pierre Kast continued in their own unique ways to expand the range and depth of the New Wave. In an exciting new chapter, Neupert explores the subgroup of French film practice known as the Left Bank Group, which included directors such as Alain Resnais and Agnès Varda. With the addition of this new material and an updated conclusion, Neupert presents a

comprehensive review of the stunning variety of movies to come out of this important era in filmmaking.

Advances in Construction and Demolition Waste Recycling Icom

This book introduces the theoretical concept, analysis, design methodology and implementation of negative group delay (NGD). The NGD concept is a recent topic in electrical and electronic engineering research based on an unconventional function; the generation of an output signal seemingly in time-advance of the input signal.

Task Force Report Univ of Wisconsin Press
Althusser & Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing

hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.
