Art of the Cut The Countryman Press
 A vibrantly illustrated exploration of the creative, inclusive, and inspiring movement happening in today's Southern interior design The American South is a place steeped in history and tradition. We think of sweet tea, thick draws, and even thicker summer air. It is also a place with a fraught history, complicated social norms, and dated perspectives. Yet among the makers and artists of the South, there is a powerful movement afoot. Alyssa Rosenheck shines a much-needed spotlight on a burgeoning community of people who are taking what's beloved, inherent, and honored in the South and making it their own. The New Southern

Style tours more than 30 homes and includes interviews with the designers, artists, and creative entrepreneurs who are reinventing Southern design and culture. This beautifully illustrated book is sure to inspire the home and soul. *Photoshop Workflow Setups* Top Notch International LTD

photographer, and mommy blogger Laura Izumikawa comes Naptime with Joey, a ridiculously delightful photo book of her now internet-famous daughter dressed up in various pop culture costumes—a perfect gift for new parents everywhere. Lights, Camera...Nap! Joey Marie wears many hats (or, rather, wigs): she's dressed up as Inigo Montoya, Britney Spears, Beyoncé, Pikachu, Anna Wintour, Moana, and Barb from Stranger Things. She's taken trips to Hawaii, baked croissants, and blasted off to the moon as an astronaut (at least, in her dreams). She's held occupations such as pizza chef, aerobics instructor, and handy-dandy-fixer-upper (figuratively, of course). She's inspired a parenting blog, been the face of her mom Laura Izumikawa's Instagram account—and for the first time, she's taken the leap from the ranks of internet-baby-snoeddom to the pages of a book. Naptime with Joey is chockablock full of over a hundred deliciously adorable photos of Joey dressed up as various pop culture characters, movie stars, musicians, vacationers, and holiday-goers, making this the most fun, festive, and downright delightful gift under the sun!

Adobe InDesign is the clear software of choice for designers in desktop publishing and typesetting. With it, designers create professional, eye-catching posters, flyers, brochures, magazines, newspapers, presentations, books, and ebooks. Because it has so much power and depth, sometimes the things you need are...well...kinda hidden or not really obvious. There will be a lot of times when you need to get something done in InDesign, but you have no idea where Adobe hid that feature, or what the “secret handshake” is to do that thing you need now so you can get back to working. That's why this book was created: to get you to the technique, the shortcut, or exactly the right setting, right now. Here's how it works: When you need to know how to do a particular thing, you turn to the chapter where it would be found, find the thing you need to do (it's easy—each page covers just one single topic), and designer and author Dave Clayton tells you exactly how to do it just like he was sitting there beside you, using the same casual style as if he were telling a friend. That way, you get back to working in InDesign fast. < This isn't a book of theory, full of confusing jargon and detailed multi-step concepts. This is a book on which button to click, which setting to use, and exactly how and when to use it, so you're never “stuck” in InDesign again. This will be your “go to”

book that sits within reach any time you're working in InDesign, and you are going to love having this type of help right at your fingertips.

The Oregon Coast Photo Road Trip: How To Eat, Stay, Play, and Shoot Like a Pro Simon and Schuster

Presents a collection of tips on digital photography and digital cameras, covering such topics as digital camera attachments, nighttime photography, using a flash, using Adobe Photoshop, and printing photographs.

Tony Northrup's Adobe Photoshop Lightroom 5 Video Book: Training for Photographers Rocky Nook, Inc.

If your past attempts at learning flash have all ended in failure (not to mention tears and/or blind rage), then *The Off-Camera Flash Handbook* is about to change everything for you. For years, photographer Vanessa Joy has been using off-camera flash to create gorgeous portraits that look like they were shot in the most beautiful natural light at the perfect time of day. Well, guess what? That consistent look was not created thanks to the most amazing luck with the weather. No. It was created by a pro photographer who mastered her use of off-camera flash. And with her down-to-earth and practical explanations, that's exactly what Vanessa teaches you in this book.

Vanessa breaks down off-camera flash into an easy-to-understand approach, and instead of focusing on the gear and the settings (which are also included, of course), she focuses on the kinds of shots you want to make. This book is about learning to use off-camera flash easily and quickly so that you can create beautiful, natural-looking light in any situation, at any time you need it...regardless of the weather or time of day.

The book is divided into three parts. Part One covers the fundamentals of off-camera flash, and it does so without blasting you with a firehose of information. Instead, Vanessa gives you the basics you need so that you can start shooting right away without becoming overwhelmed with technical jargon.

Once you're set up and ready to go, Vanessa jumps right into Part Two with specific photo scenarios and real-world situations where you'll learn key techniques for using your flash to create consistent, beautiful photographs. For each scenario, Vanessa provides the goal for the shoot, a gear list, the step-by-step shooting instructions, and images that show both the progress of the shoot and the behind-the-scenes shots or lighting diagrams of the setup. She also discusses problems you may encounter,

variations on the shot, and additional practical scenarios for each situation.

Just a few examples include:

- Recreating the golden hour at any time
- Shooting groups
- Making indoors look like outdoors
- Enhancing natural light
- Using flash at events
- Working in harsh sunlight
- Creating silhouettes
- Shooting at sunset
- Fixing an ugly-light room
- And much more

Finally, Part Three tackles the questions you'll likely have once you've got the basics under your belt and you're already creating great photos with your off-camera flash—things like high-speed sync, sync speed, a practical understanding of the inverse square law, etc. There is also a helpful FAQ section at the end of the book.

Adobe Lightroom Rocky Nook, Inc.
 This is the second volume of the widely acclaimed *Art of the Cut* book published in 2017. This follow-up text expands on its predecessor with wisdom from more than 360 interviews with the world's best editors (including nearly every Oscar winner from the last 30 years). Because editing is a highly subjective art form, and one that is critical to the success of motion picture storytelling, it requires side-by-side comparisons of the many techniques and solutions used by a wide range of editors from around the world. That is why this book compares and contrasts methodologies from a wide array of diverse voices and organizes that information so that it is easily digested and understood. There is no one way to approach editorial problems, so this book allows readers to see multiple solutions from multiple editors. The interviews contained within are carefully curated into topics that are most important to film editors and those who aspire to become

film editors. The questions asked, and the organization of the book, are not merely an academic or theoretical view of the art of editing but rather the practical advice and methodologies of actual working film and TV editors, bringing benefits to both students and professional readers. The book is supplemented by a collection of downloadable online exclusive chapters, which cover additional topics ranging from Choosing the Project to VFX. In addition to the supplementary chapters, access to the full-color, full-resolution images printed in the book—and other exclusive images—is included.

Take Control of Photos, 3rd Edition "O'Reilly Media, Inc."

See the images and read the stories behind the creative process of one of America's most respected landscape photographers, William Neill.

For more than two decades, William Neill has been offering his thoughts and insights about photography and the beauty of nature in essays that cover the techniques, business, and spirit of his photographic life. Curated and collected here for the first time, these essays are both pragmatic and profound, offering readers an intimate look behind the scenes at Neill's creative process behind individual photo-

graphs as well as a discussion of the larger and more foundational topics that are key to his philosophy and approach to work.

Drawing from the tradition of behind-the-scenes books like Ansel Adams' *Examples: The Making of 40 Photographs* and Galen Rowell's *Mountain Light: In Search of the Dynamic Landscape*, *Light on the Landscape* covers in detail the core photographic fundamentals such as light, composition, camera angle, and exposure choices, but it also deftly considers those subjects that are less frequently examined: portfolio development, marketing, printmaking, nature stewardship, inspiration, preparation, self-improvement, and more. The result is a profound and wide-ranging exploration of that magical convergence of light, land, and camera.

Filled with beautiful and inspiring photographs, *Light on the Landscape* is also full of the kind of wisdom that only comes from a deeply thoughtful photographer who has spent a lifetime communicating with a camera. Incorporating the lessons within the book, you too can learn to achieve not only technically excellent and beautiful images, but photographs that truly rise above your best and reveal your deeply personal and creative perspective—your vision, your voice.

8 1/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know your "Coma from your Aberrations"? If "Yes," then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.

Revised and updated for this fifth edition, Tom Ang's Digital Photographer's Handbook offers expert advice to all photographers, whether they be novices or seasoned professionals. Regularly revised to keep up with current trends and developments, it has, unlike the majority of other photography books, remained up-to-date and on top of the fast-changing world of digital photography. This is the guide that has it all. Tom Ang teaches you how to capture the best possible shots, then guides you through techniques to enhance or transform your pictures. A Projects section encourages you to practice your skills, and there is advice on printing and showing your work. A Buyer's Guide gives up-to-the-minute information on cameras and accessories to help you choose the right equipment for your needs.

The Art and Style of Product

Photography "O'Reilly Media, Inc."

For the first time ever, world-famous photographer and fashion lighting instructor Frank Doorhof takes you behind the scenes to reveal every step of his model-photography workflow—the same workflow that has made him a hero to photographers around the world thanks to his practical, budget conscious, no-nonsense approach. In this groundbreaking book, Frank starts right at the beginning with how to find models, find great locations, work with backgrounds (you'll be amazed at his tricks for creating stunning backgrounds for just a few bucks), and work by yourself or with a team (stylist, hair stylist, and makeup artist) to create an image that will get your photography noticed. Then, it's on to an in-depth look at the lighting setups and looks that made Frank famous (complete with diagrams and detailed explanations). You'll see how Frank lights his images (you'll be shocked at how simple most of his lighting setups are and you'll be able to create these same setups yourself), plus he covers the critical little stuff nobody else is talking about, including: how to calibrate your monitor (and why it's so important); how to use a color target to nail your color every single time; and why (and how) to use a light meter to get consistent, reproducible lighting each and every shoot. Frank also shares his own retouching techniques through step-by-step tutorials, and he

takes you from start to finish through a number of different looks so you can see exactly how it's done, and recreate these same looks yourself. If you've ever wished there was one book that covers it all, the whole process of photographing models from start to finish, not leaving anything out, then this is the book for you.

Leica Lens Compendium alt concepts Jay Maisel, hailed as one of the most brilliant, gifted photographers of all time, is much more than that. He is a mentor, teacher, and trailblazer to many photographers, and a hero to those who feel Jay's teaching has changed the way they see and create their own photography. He is a living legend whose work is studied around the world, and whose teaching style and presentation garner standing ovations and critical acclaim every time he takes the stage. Now, for the first time ever, Jay puts his amazing insights and learning moments from a lifetime behind the lens into a book that communicates the three most important aspects of street photography: light, gesture, and color. Each page unveils something new and challenges you to rethink everything you know about the bigger picture of photography. This isn't a book about f-stops or ISOs. It's about seeing. It's about being surrounded by the ordinary and learning how to find the extraordinary. It's about training your mind, and your eyes, to see and capture the world in a way that delights, engages, and captivates your viewers, and there is nobody that communicates this, visually or through the written word, like Jay Maisel. *Light, Gesture & Color* is the seminal work of one of the true photographic geniuses of our time, and it can be your key to opening another level of understanding, appreciation, wonder, and creativity as you learn to express yourself, and your view of the world, through your camera. If you're ready to break through the barriers that have held your photography back and that have kept you from making the types of images you've always dreamed of, and you're ready to learn what photography is really about, you're holding the key in your hands at this very moment.

Combining the benefits of video training and book learning, Tony Northrup's *Lightroom 5 Video Book* gives you over 12 hours of video and 250 pages of written content. When you can set aside the time, start the videos on a smartphone, tablet, or PC, and work alongside Tony & Chelsea in Lightroom. When you'd rather learn away from your PC, or you just want to quickly look something up, search the eBook or flip through the paperback book

to find the information you need. Similar video training costs well over \$120 or more, or worse, requires you to pay a monthly membership fee that might cost you thousands. Similar books cost over twice this amount. You also get over 150 Lightroom presets, which usually cost more than \$100, and access to our private Lightroom group on Facebook so you can ask questions and get feedback. Tony covers every aspect of Lightroom in-depth, but structures his teaching so that both beginner and advanced photographers can learn as efficiently as possible. If you just want a quick start, you can simply watch the first video or read the first chapter and you'll be organizing and editing your pictures in less than an hour. If you want to know more about a specific feature, switch to that video or flip to that chapter in the eBook. If you want to know everything about Lightroom, watch the videos and read the book from start-to-finish.

With an abundance of new features and the promise of producing vastly superior images, photographers of all skill levels are giving Capture One Pro a try. Of course, along with expanded functionality and improved performance, the software has become a challenge to learn efficiently on one's own. Users need a helping hand in order to get up to speed and make sure they are taking full advantage of this powerful software.

In Capture One Pro 10: Mastering RAW

Development, Image Processing, and Asset Management, photographer Sascha Erni teaches readers everything they need to know in order to quickly get up and running with Capture One Pro. He also dives deeply into its extensive feature list to allow users to fully explore the capabilities of the software. Whether you're moving to Capture One Pro from Aperture or Lightroom, or just beginning to

learn image-editing with Capture One Pro 10, this book will teach you how to get amazing results while avoiding frustration and wasted time along the way.

Topics include:

- RAW conversion
- Asset management
- Converting to black-and-white
- Eliminating lens errors
- Tethered shooting/live view
- Film grain simulation
- Working with layers
- HDR imaging
- Much, much more

Amphoto Books

- The first publication of major Instagram influencer @le21eme - Brings together street and fashion show photography to explore the ascent of streetwear into high fashion - A must-have book for all those passionate about contemporary fashion, street style, and luminescent, candid photography This is Not a F*cking Street Style Book is the first monograph of cult photographer and influencer, Adam Katz Sinding (aka Le 21ème), an astute documentarian of major fashion events, top brands, tastemakers, and trendsetters since 2003. For a long time, streetwear was nothing more than the rebel kid brother of high fashion. With his candid, fashion forward-scouting photos, Katz Sinding shows how streetwear has transformed into a leading style reference pioneering trends, championing creativity, and inspiring high fashion designers the world over. Today, the flair of streetwear is

as likely to be seen on the runways of Milan, New York, and London as on the streets themselves. This bold fashion book brings together Katz Sinding's most striking streetwear images, both on the streets and backstage at more than 20 fashion shows around the globe. With his unique backstage access, Katz Sinding captures such top designers, supermodels, and stylists as Kris van Assche (Christian Dior), Lucas Ossendrijver (Lanvin) and Grace Coddington (Vogue), as well as contemporary fashion icons such as Virgil Abloh, Imaan Hammam, and Luka Sabbat. The book also features a fascinating conversational piece on the streetwear phenomenon between Adam Katz Sinding, Virgil Abloh (founder of Off-White), and MENDO.
