Bianca wants to escape. She's been uprooted from her small hometown and enrolled at Evernight Academy, an eerie Gothic boarding school where the students are somehow too perfect: smart, sleek, and almost predatory. Bianca knows she doesn't fit in. Then she meets Lucas. He's not the "Evernight type" either, and he likes it that way. Lucas ignores the rules, stands up to the

snobs, and warns Bianca to be careful—even when it comes to caring about him. "I couldn't stand it if they took it out on you," he tells Bianca, "and eventually they would." But the connection between Bianca and Lucas can't be denied. Bianca will risk anything to be with Lucas, but dark secrets are fated to tear them apart . . . and to make Bianca question everything she's ever believed.

This volume represents a unique collection of chapters on the way in which color is categorized and named in a number of

languages. Although color research has been a topic of focus for researchers for decades, the contributions here show that many aspects of color language and categorization are as yet unexplored, and that current theories and methodologies which investigate color language are still evolving. Some core questions addressed here include: How is color conceptualized through language? What kind of linguistic tools do languages use to describe color? Which factors tend to bias color language? What methodologies could be used to understand human color categorization and language better? How do color vocabularies evolve? How does context impact the color cognition? The chapters collected here adopt different theoretical and methodological approaches in describing new empirical research on how the concept of color is represented in a variety of different languages. Researchers in linguistics, psychology, and cognitive science present a set of new explorations and challenges in the area of color language. The book promotes several methodological and disciplinary dimensions to color studies. The color category is given an in-depth and broad-based examination, so a reader interested in color conceptualization for itself will be able to form a solid vision of the subject.

A follow-up to Blue Blood that tells the recent history of the Duke-Carolina college basketball rivalry. When Art Chansky's Blue Blood was published in 2005, ESPN's Dick Vitale said it was about "the greatest rivalry, not just in college basketball, but in all of sports" and the book was hailed by The East Carolinian as the "holy text for both sides of the rivalry." Now, 13 years later, Chansky revisits the fiercest college basketball rivalry. Since 2005, Duke-Carolina has been a study of rival recruiting philosophies, disparate playing styles, classic game encounters, coaching milestones, All-American and NBA draft picks galore, plus off-the-court drama, and most recently, the ultimate question of who will be the next caretakers to this national treasure. Winning more Atlantic Coast Conference and NCAA championships than the rest of the ACC combined made Duke and UNC the true blue bloods of basketball. When the prequel to this book was published in 2005, few fans thought the passionate backyard battle could get any better, but the last 13 years have added new colors and different

fabrics to the mosaic that is the remaining virtue of the college game's regular season, which for everyone else is now a qualifying run to the NCAA tournament and March Madness. Chansky brings all of these details to light, making Blue Blood II a must-have follow-up for Duke and UNC fans, and college basketball fans in general.

A must-read for humans of all ages, this middle grade novel grows up before your very eyes. Painfully shy and lonely, eleven-year-old Mariah Miller hates being a human; she'd rather be an animal so she wouldn't have to go to school and deal with mean old Mrs. Tarbox and her nasty cousin, Travis, who has invaded her life. Enchantment abounds when she finds a magic spearhead on the beach that allows her to talk to a wise old horseshoe crab and a host of other animals. Her father becomes seriously ill, and throughout her trials in the real world, she is often surprised by the unpredictable power of the spearhead. As she travels through time and space, and listens to the wisdom of creatures and people, Mariah makes leaps in her own personal growth, discovers the interdependence of all living things, learns how perspective creates reality, and what it really means to be human.
