NATHANAEL MARISSA

The Scourge of Unemployment in South Africa Routledge
The Development of Modern South Korea provides a comprehensive analysis of South Korean modernization by examining the dimensions of state formation, capitalist

development and nationalism. Taking a comparative and interdisciplinary approach this book highlights the most characteristic features of South Korean modernity in relation to its historical conditions, institution traditions and cultural values paying particular attention to Korean's pre-modern civilization. The Enigmatic Peninsula Edward Elgar Publishing
The booklet Documents the problem that small arms and light weapons pose to development and peace and focuses on

whether or how supplies of small arms can be limited by UN, EU or US initiative and action.

From Poverty to a Modern Industrial State Routledge

In the new edition of this important contribution to understanding both the Asian economic miracle and the 1997-8 crisis, Richard Stubbs assesses the main explanations to date and updates the analysis to take account of globalization and the remarkable economic rise of China.

[Poisoned Prosperity](#) Lulu.com

In a time of life-and-death challenges to the human spirit--global economics, nuclear dangers, environmental threats, and religious polarization and war--Christians must look for resources that provide new insights of God's power and care for all people. What are the forms of suffering and hope in the world today, and how can Christians respond with healing resources? Korean Christians have unique contributions to make to our understanding of pastoral theology and counseling. Pastoral counselors and theologians from the United States should look to the South Korean Christian churches and other Asian churches for conversation partners about the nature of care and healing in today's world. In this book, the authors explore important ideas--such as han, jeong, and salim--from Korean history and culture that can inform the healing ministries of the churches.

[More Money Than God](#) Human Rights Watch

It was when traveling on assignment in India that journalist Stephen Henderson first learned of soup kitchens operated by Sikh houses of worship (or gurudwaras). After volunteering for a week at the Gurudwara Bangla Sahib in Delhi — which feeds 20,000 men, women, and children every day — Henderson

became curious to research global gastrophilanthropy, or the very different ways in which hungry people are served free meals around the world. When newspaper and magazine work dispatched him to places across America and abroad, Henderson would add days to his itineraries to learn about local customs of charitable cookery. This intriguing series of field reports reveals the clamor, chaos, and compassion of kitchens in places such as Iran, Israel, and South Korea, as well as those in Austin, Los Angeles and Pittsburgh. While the recipes, culinary methods, and clientele may vary, all the soul-stirring experiences share a common theme: a great way to show love to the needy is through the gift of food. Written with a huge heart, and an even bigger appetite, these chapters — sad and funny, sometimes both — may inspire you to embark on your own acts of gastrophilanthropy. After all, someone, somewhere, is always hungry.

Redemption and Regret A&C Black

Former Pentagon insider Van Jackson explores how Trump and Kim reached - and avoided - the precipice of nuclear war.

The Political Economy of War, Prosperity and Crisis Simon and Schuster

In *Sociology: Exploring the Architecture of Everyday Life*, David Newman shows students how to see the "unfamiliar in the familiar"—to step back and see organization and predictability in their personal experiences. Through his approachable writing style and lively personal anecdotes, the author has maintained his goal from the first edition: to write a textbook that "reads like a real book." Many adopters of this book are fans of Peter Berger's classic works, which helped introduce the idea of "social

constructionism" to sociology. Newman uses the metaphors of "architecture" and "construction," to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Using vivid prose, current examples, and recent data, the Thirteenth Edition presents a unique and thought-provoking overview of how society is constructed and experienced. Instead of surveying every subfield in sociology, the more streamlined coverage (14 chapters) focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures. Give your students the SAGE Edge! SAGE Edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. How other countries cracked the world's biggest problems (and we can too) All Points Books

What will the schools of the future look like? What will guide their design, and what is happening now to create them? As we enter the age of disruption and hyperchange, it has become increasingly clear that our education systems are not adequate to the task of enabling young people to thrive in a very different future. FutureSchool offers system leaders, principals, and teachers research-based design principles upon which the evolution of schools might be based. Shaped by an awareness of changing economies, technology, and the climate emergency, it suggests specific ways that leaders can address the challenges of

moving forward, grasping the opportunities presented by the disruption of the COVID-19 pandemic. Presenting six 'archetypes for the future' – key missions that are central to the future of humanity – it offers inspiring examples of practice that are not just theoretical but well-advanced in schools across the world, practice that is grounded in principles that are central to a new learning paradigm. This book offers an answer and presents a vision that is engaging, inspiring, and intent on enabling success for all learners. This book will provide inspiration and practical guidance for leaders, teachers, and parents who want to see schools rapidly evolve to become the institutions we really need. By Scalpel and Cross: A Missionary Doctor in Old Korea is the story of a Presbyterian medical missionary told against the background of Korea in the first half of the twentieth century, decades before the astounding rise of South Korea. Young Dr. Archibald G. Fletcher arrives in 1909, just before Japan annexes Korea. The dramatic, little-read history of early Christian missions is part of the story, as Arch, assigned to Taegu, confronts appalling diseases, poverty, and the scourge of leprosy. The reader gets to know Arch and his wife, Jessie, through their relentless effort to provide healing, in body and also in spirit, and the artful blend of practical entrepreneurship and compassion in Arch's pioneering treatment of leprosy. The book overflows with the sights and sounds of old Korea, and the experiences of a Westerner pressing the advance of medicine under Japanese rule. Arch and Jessie's story includes setbacks and disappointments-- destruction by fire of their home and the medical dispensary,

Arch's bout with tuberculosis, internment during WWII--yet the narrative is inspiring and uplifting. The reader shares a sense of God's providence, and of esteem for the Korean people--their generous spirit, and their extraordinary response to the Christian message.

American Relations Routledge

How did a country with a dearth of natural resources, a sprawling population congested in a limited arable land transform itself to a modern industrial state within a generation? How could these have been achieved given the lingering geopolitical threats to its very survival as a state, as evidenced by the Korean War and the internecine aggressive posturing of its neighbor from the north? This book looks at strategies, institutional arrangement, role of entrepreneurs and workers in this odyssey, and on how those factors have worked together through effective leadership to transform South Korea's economic fortunes.

Sociology Wipf and Stock Publishers

This book provides an indispensable resource for high school and college students interested in the history and current status of gender identity formation and maintenance and how it impacts LGBTQ rights throughout the world. *Gender and Identity around the World* explores a variety of gender and LGBTQ experiences and issues in countries from all the world's regions. Guided by more than 50 recognized academic experts, readers will examine how gender and LGBTQ identities are developed, fought for, perceived, and policed in countries as diverse as France, Brazil, Russia, Jordan, Iraq, and China. Each chapter opens with a general introduction to a country or group of countries and flows into a discussion of gender and identity in terms of culture,

education, family life, health and wellness, law, work, and activism in that region of the world. A section on contemporary issues specific to the country or group of countries follows this discussion. Readers gain in-depth information from more than 50 recognized experts writing from around the world. Readers can compare and contrast life experiences from a number of different geopolitical and cultural regions. Each chapter explores a country or region's gender and LGBTQ experiences in terms of culture, law, family life traditions, education, health and wellness practices, work norms, and activist movements.

Meeting and Hearing Before the Subcommittee on Africa, Global Health, Global Human Rights, and International Organizations of the Committee on Foreign Affairs, House of Representatives, One Hundred Thirteenth Congress, Second Session, June 18, 2014 Macmillan International Higher Education

A study of environmental degradation, this work presents the environmental problems of South Korea. The effects of rapid industrialisation and modernisation are documented along with the choices and actions which are available to the country.

State Formation, Capitalist Development and National Identity University of Toronto Press

Mark Dake, a Canadian ESL teacher, set out on a four-month road trip to discover everything that South Korea had to offer. From art galleries and temples to mountaintops and national parks, *South Korea: The Enigmatic Peninsula* shares the heart and soul of Koreans and their beautiful country.

examination of hedge funds today Shortlisted for the Financial Times/Goldman Sachs Business Book of the Year Award The New York Times bestseller

Modernizing Korea in the Writings of James Scarth Gale Taylor & Francis

Depicted as an insular and forbidding police state with an “insane” dictator at its helm, North Korea—charter member of Bush’s “Axis of Evil”—is a country the U.S. loves to hate. Now the CIA says it possesses nuclear, chemical, and biological weapons, as well as long-range missiles capable of delivering them to America’s West Coast. But, as Bruce Cumings demonstrates in this provocative, lively read, the story of the U.S.-Korea conflict is more complex than our leaders or our news media would have us believe. Drawing on his extensive knowledge of Korea, and on declassified government reports, Cumings traces that story, from the brutal Korean War to the present crisis. Harboring no illusions regarding the totalitarian Kim Jong Il regime, Cumings nonetheless insists on a more nuanced approach. The result is both a counter-narrative to the official U.S. and North Korean versions and a fascinating portrayal of North Korea, a country that suffers through foreign invasions, natural disasters, and its own internal contradictions, yet somehow continues to survive.

Life in Global Uncertainty Routledge

This work presents the unpublished and largely unknown writings of the missionary James Scarth Gale, one of the most important scholars and translators in modern Korean history.

Hearings Before the Subcommittee on Asian and Pacific Affairs... 92-1, June 8, 9, 10, 1971 Radius Book Group
Denmark is set to achieve 100 per cent renewable energy by

2030. Iceland has topped the gender equality rankings for a decade and counting. South Korea’s average life expectancy will soon reach ninety. How have these places achieved such remarkable outcomes? And how can we apply those lessons to our own communities? The future we want is already here - it's just not evenly distributed. By bringing together for the first time tried and tested solutions to society's most pressing problems, from violence to inequality, Andrew Wear shows that the world we want to live in is already within reach. Solved is a much-needed dose of optimism in an atmosphere of doom and gloom. Informative, accessible and revelatory, it is a celebration of the power of human ingenuity to make the future brighter for everyone.

Dundurn

North Korea is poised at the crossroads of history. Which direction will its leader take? Throughout the world, oppressive regimes are being uprooted and replaced by budding democracies, but one exception remains: The People's Republic of North Korea. The Kim family has clung to power for three generations by silencing dissidents, ruling with an iron fist, and holding its neighbors hostage with threats of war. Under the leadership of Kim Jong Un, North Korea has come closer than ever to creating a viable nuclear arsenal, but widespread famine and growing resistance are weakening his regime's stability. In *The Hermit King*, Asian geopolitical expert Chung Min Lee tells the story of the rise of the Kim Dynasty and its atrocities, motivations, and diplomatic goals. He also discusses the possible

outcomes of its aggressive standoff with the world superpowers. Kim Jong Un is not a crazed "Rocket Man" or a bumbling despot; he has been groomed since birth to take control of his country and stay in power at all costs. He is now at a fateful crossroads. Will he make good on decades of threats, liberalize North Korea and gain international legitimacy, or watch his regime crumble around him? Lee analyzes the likelihood and consequences of each of these possibilities, cautioning that in the end, a humanitarian crisis in the region is all but unavoidable. *The Hermit King* is a thoughtful and compelling look at the most complicated diplomatic situation on Earth.

The 24-Hour Soup Kitchen The New Press

In modern times, death is understood to have undergone a transformation not unlike religion. Whereas in the past it was out in the open, it now resides mostly in specialized spaces of sequestration—funeral homes, hospitals and other medical facilities. A mainstay in so-called traditional societies in the form of ritual practices, death was usually messy but meaningful, with the questions of what happens to the dead or where they go lying at the heart of traditional culture and religion. In modernity, however, we are said to have effectively sanitized it, embalmed it and packaged it—but it seems that death is back. In the current era marked by economic, political and social uncertainty, we see it on television, on the Internet; we see it almost everywhere. *(Inter)Facing Death* analyzes the nexus of death and digital culture in the contemporary moment in the context of recent developments in social, cultural and political theory. It argues that death today can be thought of as "interfaced," that is mediated and expressed, in various aspects of contemporary life

rather than put to the side or overcome, as many narratives of modernity have suggested. Employing concepts from anthropology, sociology, media studies and communications, *(Inter)Facing Death* examines diverse phenomena where death and digital culture meet, including art, online suicide pacts, the mourning of celebrity deaths, terrorist beheadings and selfies. Providing new lines of thinking about one of the oldest questions facing the human and social sciences, this book will appeal to scholars and students of social and political theory, anthropology, sociology and cultural and media studies with interests in death. [How Schools Around the World are Applying Learning Design Principles For a New Era](#) SAGE Publications

The potential for reunification of the two Koreas, whether in the short or long term, argues for a comprehensive look at policy and planning issues that encompass the peninsula as a whole. This book deals with spatial policy issues in both South and North Korea in a broad and non-political way. Part one deals with South Korea, examining cultural changes, the capital city of Seoul, Greenbelt policy, the balanced national (regional) development strategy, and the new mega-regional approach. Part two delves into aspects of development in North Korea, such as the limitations of national statistics, the marketization of the economy, integration with the rest of North East Asia, and the need for a spatial infrastructure strategy. Part three examines the case for reunification in the interests of both the South and North. It argues that a transitional approach would be less costly and less risky than sudden reunification primarily via an early strategy of shifting more capital to the North and later by moderating migration flows to the South. The book also examines

whether the capital should remain in Seoul or be relocated elsewhere should reunification occur. Professors, students and public policy officials in the fields of Asian studies, regional

economics and planning, urban studies and political science and any reader interested in the future of Korea will find this book very current and enlightening.
