Against Empathy Hal Leonard Corporation

Do you use computers for artistic expression? The openFrameworks toolkit was built to help artists, designers, and experimenters jump in and program software quickly. With this introduction, you'll learn about this unique set of C++ tools, and discover how to get involved with the framework's creative community of hackers. It's ideal for creative coders familiar with Flash or the Processing programming language. Author Zachary Lieberman, openFrameworks co-founder, will help you get up and running with the toolkit so you can begin hacking, prototyping, and experimenting right away. Getting Started with openFrameworks is a welcome mat for the culture and a good beginning for the curious. Get a helpful introduction to C++ content Learn differences and similarities with other open source toolkits Get easy-to-use code snippets and patterns that help you make sense of more complex openFrameworks code

A comprehensive introduction to all facets of MPLS theory and practice Helps networking professionals choose the suitable MPLS application and design for their network Provides MPLS theory and relates to basic IOS configuration examples The Fundamentals Series from Cisco Press launches the basis to readers for understanding the purpose, application, and management of

technologies MPLS has emerged as the new networking layer for service providers throughout the world. For many service providers and enterprises MPLS is a way of delivering new applications on their IP networks, while consolidating data and voice networks. MPLS has grown to be the new default network layer for service providers and is finding its way into enterprise networks as well. This book focuses on the building blocks of MPLS (architecture, forwarding packets, LDP, MPLS and QoS, CEF, etc.). This book also reviews the different MPLS applications (MPLS VPN, MPLS Traffic Engineering, Carrying IPv6 over MPLS, AToM, VPLS, MPLS OAM etc.). You will get a comprehensive overview of all the aspects of MPLS, including the building blocks, its applications, troubleshooting and a perspective on the future of MPLS.

Sketches of Historic Floral City Bedford Books

A New York Times Book Review Summer Reading Selection "Delves into not only what we eat around the world, but what we once ate and what we have lost since then."—The New York Times Book Review Two centuries ago, nearly half the North American diet was foraged, hunted, or caught in the wild. Today, so-called "wild foods" are becoming expensive luxuries, served to the wealthy in top restaurants. Meanwhile, people who depend on wild foods for survival and sustenance find their lives forever changed as new markets and roads invade the world's last untamed landscapes. In Feasting Wild, geographer and anthropologist Gina Rae La Cerva embarks on a global culinary adventure to trace our relationship to wild foods. Throughout her travels, La Cerva reflects on how colonialism and the extinction crisis have impacted wild spaces, and reveals

what we sacrifice when we domesticate our foods—including biodiversity, Indigenous and women's knowledge, a vital connection to nature, and delicious flavors. In the Democratic Republic of the Congo, La Cerva investigates the violent "bush meat" trade, tracking elicit delicacies from the rainforests of the Congo Basin to the dinner tables of Europe. In a Danish cemetery, she forages for wild onions with the esteemed staff of Noma. In Sweden—after saying goodbye to a man known only as The Hunter—La Cerva smuggles freshly-caught game meat home to New York in her suitcase, for a feast of "heartbreak moose." Thoughtful, ambitious, and wide-ranging, Feasting Wild challenges us to take a closer look at the way we eat today, and introduces an exciting new voice in food journalism. "A memorable, genre-defying work that blends anthropology and adventure."—Elizabeth Kolbert, New York Times bestselling author of The Sixth Extinction "A food book with a truly original take."—Mark Kurlansky, New York Times bestselling author of Salt: A World History "An intense and illuminating travelogue... offer[ing] a corrective to the patriarchal white gaze promoted by globetrotting eaters like Anthony Bourdain and Andrew Zimmern. La Cerva combines environmental history with feminist memoir to craft a narrative that's more in tune with recent works by Robin Wall Kimmerer, Helen Macdonald and Elizabeth Rush."—The Wall Street Journal

The Greatest Showman Northwestern University Press

When ten-year-old James' gang initiation endangers his six-year-old brother Isaac, they find the courage to say, "Thanks, but no thanks."

(Piano Solo Personality). If you love the violin music of Lindsey Stirling but your instrument of choice is the piano, this is the songbook for you! This collection of piano solo arrangements features 15 of Lindsey's most popular original works: Beyond the Veil * Crystallize * Electric Daisy Violin * Elements * First Light * Moon Trance * Prism * Roundtable Rival * Shatter Me * Something Wild * Song of the Caged Bird * Spontaneous Me * Stampede * Sun Skip * Zi-Zi's Journey.

The Planetary Turn Conran Octopus

Creative hubs have become a cornerstone of economic and cultural policy with only the barest amount of discussion or scrutiny. This volume offers the first interrogation of creative hubs, with ground-breaking critical writing from a combination of established scholars and new voices.

Looking across multiple sites trans-nationally, and combining theoretical and empirical reflections, it asks: what are creative hubs, why do they matter, and are they making the world a better place? Creative Hubs in Question discusses creative hubs in relation to debates about creative cities, co-working spaces and workers' co-operatives. Featuring case studies from Argentina to the Netherlands, and Nigeria to the UK, the contributions address how hubs are situated in relation to projects of equality and social justice, and whether and in what ways they change the experiences of the creatives who work in them. Drawing on a range of disciplinary perspectives including sociology, geography, economics, media and communications, culture and creative industries, critical policy studies, gender studies, race and ethnicity, and urban studies, this collection will be of interest to policy makers, academics, scholars, students and practitioners across these fields.

Les Miserables Medley for Violin and Piano Houghton Mifflin Harcourt

Dancing electronic violinist Lindsey Stirling shares her unconventional journey in an inspiring New York Times bestselling memoir filled with the energy, persistence, and humor that have helped her successfully pursue a passion outside the box. A classically trained musician gone rogue, Lindsey Stirling is the epitome of independent, millennial-defined success: after being voted off the set of America's Got Talent, she went on to amass more than ten million social media fans, record two full-length albums, release multiple hits with billions of YouTube views, and to tour sold-out venues across the world. Lindsey is not afraid to be herself. In fact, it's her confidence and individuality that have propelled her into the spotlight. But the road hasn't been easy. After being rejected by talent scouts, music reps, and eventually on national television, Lindsey forged her own path, step by step. Detailing every trial and triumph she has experienced until now, Lindsey shares stories of her humble yet charmed childhood, humorous adolescence, life as a struggling musician, personal struggles with anorexia, and finally, success as a world-class entertainer. Lindsey's magnetizing story—at once remarkable and universal—is a testimony that there is no singular recipe for success, and despite what people may say, sometimes it's okay to be The Only Pirate at the Party. *How Pleasure Works: The New Science of Why We Like What We Like* Turner Publishing Company A groundbreaking essay collection that pursues the rise of geoculture as an essential framework for arts criticism, *The Planetary Turn* shows how the planet—as a territory, a sociopolitical arena, a natural space of interaction for all earthly life, and an artistic theme—is increasingly the conceptual and political dimension in which twenty-first-century writers and artists picture themselves and their work. In an introduction that comprehensively defines the planetary model of art, culture, and cultural-aesthetic interpretation, the editors explain how the living planet is emerging as distinct from older concepts of globalization, cosmopolitanism, and environmentalism and is becoming a new ground for exciting work in contemporary literature, visual and media arts, and social humanities. Written by internationally recognized scholars, the twelve essays that follow illustrate the unfolding of a new vision of potential planetary community that retools earlier models based on the nation-state or political “blocs” and reimagines cultural, political, aesthetic, and ethical relationships for the post-Cold War era.

The Transition to College Writing Hal Leonard Corporation

Brace yourself for a fun challenge: build a photorealistic 3D renderer from scratch! In just a couple of weeks, build a ray tracer that renders beautiful scenes with shadows, reflections, refraction effects, and subjects composed of various graphics primitives: spheres, cubes, cylinders, triangles, and more. With each chapter, implement another piece of the puzzle and move the renderer forward. Use whichever language and environment you prefer, and do it entirely test-first, so you know it's correct.

In this culinary memoir, readers get a personal tour of the storied New Orleans restaurant with the woman who put it—and Creole cuisine—on the map. Meet Ella Brennan: mother, mentor, blunt-talking fireball, and matriarch of a New Orleans restaurant empire. Ella is famous for bringing national attention to Creole cuisine, and her unique vision is best summed up in her own words: "I don't want a restaurant where a jazz band can't come marching through." In this candid autobiography, Ella shares her life story from childhood in the Great Depression to opening acclaimed eateries. When the Brennans launched Commander's Palace, it became the city's most popular restaurant. Many of the city's most famous chefs such as Paul Prudhomme, Emeril Lagasse, Troy McPhail, and many others, got their start there. Miss Ella of Commander's Palace describes the drama, the disasters, and the abundance of love, sweat, and grit it takes to become the matriarch of New Orleans' finest restaurant empire.

Getting Started with openFrameworks O'Reilly Media, Incorporated

New York Post Best Book of 2016 We often think of our capacity to experience the suffering of others as the ultimate source of goodness. Many of our wisest policy-makers, activists, scientists, and philosophers agree that the only problem with empathy is that we don't have enough of it. Nothing could be farther from the truth, argues Yale researcher Paul Bloom. In AGAINST EMPATHY, Bloom reveals empathy to be one of the leading motivators of inequality and immorality in society. Far from helping us to improve the lives of others, empathy is a capricious and irrational emotion that appeals to our narrow prejudices. It muddles our judgment and, ironically, often leads to cruelty. We are at our best when we are smart enough not to rely on it, but to draw instead upon a more distanced compassion. Basing his argument on groundbreaking scientific findings, Bloom makes the case that some of the worst decisions made by individuals and nations—who to give money to, when to go to war, how to respond to climate change, and who to imprison—are too often motivated by honest, yet misplaced, emotions. With precision and wit, he demonstrates how empathy distorts our judgment in every aspect of our lives, from philanthropy and charity to the justice system; from medical care and education to parenting and marriage. Without empathy, Bloom insists, our decisions would be clearer, fairer, and—yes—ultimately more moral. Brilliantly argued, urgent and humane, AGAINST EMPATHY shows us that, when it comes to both major policy decisions and the choices we make in our everyday lives, limiting our impulse toward empathy is often the most compassionate choice we can make.

Tippi HarperCollins

Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. “Fascinating . . . A thought-provoking journey into emotion science.”—The Wall Street Journal “A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented.”—Scientific American “A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin.”—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

How Emotions Are Made HarperCollins

In this absorbing and surprising memoir, one of the biggest names of classic Hollywood—the star of Alfred Hitchcock's *The Birds* and *Marnie*—tells her story, including never-before-revealed experiences on the set of some of the biggest cult films of all time . . . now with a foreword by Melanie Griffith For decades, Tippi Hedren's luminous beauty radiated from the silver screen, enchanting moviegoers and cementing her position among Hollywood's elite—beauty and star power that continue to endure. For too long Hedren's story has been told by others through

whispered gossip and tabloid headlines. Now, Hedren sets the record straight, recalling how a young and virtuous Lutheran girl from small-town Minnesota became a worldwide legend—as one of the most famous Hitchcock girls, as an unwavering animal activist, and as the matriarch of a powerful Hollywood dynasty that includes her movie star daughter Melanie Griffith, and rising star Dakota Johnson, her granddaughter. For the first time, Hedren digs deep into her complicated relationship with the man who discovered her talent, director Alfred Hitchcock, the benefactor who would become a repulsive and controlling director who contractually controlled her every move. She speaks openly about the dark pain she endured working with him on their most famous collaborations, *The Birds* and *Marnie*, and finding the courage she needed to break away. Hedren's incandescent spirit shines through as she talks about working with the great Charlie Chaplin, sharing the screen with some of the most esteemed actors in Hollywood, her experiences on some of the most intriguing and troubling film sets—including filming *Roar*, one of the most dangerous movies ever made—and the struggles of being a single mother—balancing her dedication to her work and her devotion to her daughter—and her commitment to helping animals. Filled with sixteen pages of beautiful photos, *Tippi* is a rare and fascinating look at a private woman's remarkable life no celebrity aficionado can miss.

Creative Hubs in Question Lulu.com

Contrary to the popular view of science as a mountainous accumulation of facts and data, Stuart Firestein takes the novel perspective that ignorance is the main product and driving force of science, and that this is the best way to understand the process of scientific discovery.

Your Move Avery

This book identifies the 'cognitive humanities' with new approaches to literature and culture that engage with recent theories of the embodied mind in cognitive science. If cognition should be approached less as a matter of internal representation—a Cartesian inner theatre—than as a form of embodied action, how might cultural representation be rethought? What can literature and culture reveal or challenge about embodied minds? The essays in this book ask what new directions in the humanities open up when the thinking self is understood as a participant in contexts of action, even as extended beyond the skin. Building on cognitive literary studies, but engaging much more extensively with '4E' cognitive science (embodied, embedded, enactive, extended) than previously, the book uses case studies from many different historical settings (such as early modern theatre and digital technologies) and in different media (narrative, art, performance) to explore the embodied mind through culture.

Everyone's an Author HarperCollins

"Engaging, evocative...[Bloom] is a supple, clear writer, and his parade of counterintuitive claims about pleasure is beguiling." —NPR Why is an artistic masterpiece worth millions more than a convincing forgery? Pleasure works in mysterious ways, as Paul Bloom reveals in this investigation of what we desire and why. Drawing on a wealth of surprising studies, Bloom investigates pleasures noble and seamy, lofty and mundane, to reveal that our enjoyment of a given thing is determined not by what we can see and touch but by our beliefs about that thing's history, origin, and deeper nature.

Love 2.0 Oxford University Press, USA

While today's business world is dominated by technology and data analysis, award-winning financial journalist and anthropology PhD Gillian Tett advocates thinking like an anthropologist to better understand consumer behavior, markets, and organizations to address some of society's most urgent challenges. Amid severe digital disruption, economic upheaval, and political flux, how can we make sense of the world? Leaders today typically look for answers in economic models, Big Data, or artificial intelligence platforms. Gillian Tett points to anthropology—the study of human culture. Anthropologists learn to get inside the minds of other people, helping them not only to understand other cultures but also to appraise their own environment with fresh perspective as an insider-outsider, gaining lateral vision. Today, anthropologists are more likely to study Amazon warehouses than remote Amazon tribes; they have done research into institutions and companies such as General Motors, Nestlé, Intel, and more, shedding light on practical questions such as how internet users really define themselves; why corporate projects fail; why bank traders miscalculate losses; how companies sell products like pet food and pensions; why pandemic policies succeed (or not). Anthropology makes the familiar seem unfamiliar and vice versa, giving us badly needed three-dimensional perspective in a world where many executives are plagued by tunnel vision, especially in fields like finance and technology. “Fascinating and surprising” (Fareed Zaria, CNN), *Anthro-Vision* offers a revolutionary new way for understanding the behavior of organizations,

individuals, and markets in today's ever-evolving world.

Failure Cisco Press

A romantic inn...a white Christmas...hot cocoa by a roaring fire...it all adds up to a perfect holiday

romance from Special Edition debut author Olivia Miles! Dear Holly, As I look around the inn, I see garland and mistletoe, colored ornaments—everything I have always professed to despise. You were right to wonder why I would choose to visit the White Barn Inn. You were right about lights and a lot of things. Since I met you, though, everything has changed. I've changed. And that's why

I can't go on any longer without telling you the whole story. I don't know if you will ever be able to forgive me. But they say Christmas is a time for miracles. And you do believe in them, don't you? The question is, can you still believe in me? Max
