Casting Light or Shadow SAGE Publications
 The book consists of selections from major Eastern and Western philosophic texts. Because this is a text on applied ethics, each chapter includes an introduction that helps the reader frame how the ethical theories apply to leadership issues. Each philosophic reading is preceded by an introduction that helps those without philosophy backgrounds understand who the author is and the context of the selection. [The text] also contain[s] readings from leadership studies, literature, management, and anthropology that further integrate the discussion of ethics with leadership.-

Social Psychology and Organizations SAGE Publications
 Blending theory and practice, this innovative, interdisciplinary text equips students to act as ethical change agents who improve the moral performance of their work organizations. Written in a reader-friendly style, the book is structured around levels of organizational behavior. Author Craig E. Johnson examines ethics in not just corporations but all types of workplace organizations, including nonprofit, government, military, and educational entities.

Ethics in the Workplace Routledge

Should you take a much-needed vacation or save money for the kids' education? Protect the endangered owl or maintain jobs for loggers? Have a heart-to-heart with a lying employee or fire him on the spot? All of us face ethical choices. Sometimes they're easy: One side is wrong and the other is right. But how do we handle the really tough "right vs. right" dilemmas, where each side has strong moral arguments and we can't do both? This book helps us build Ethical Fitness®—a values-based decision-making process so definitive that it's now a registered trade mark.

Rushworth M. Kidder, founder of the Institute for Global Ethics,

teaches us how to think for ourselves in order to resolve ethical dilemmas ranging from the intimately personal to the broadly philosophical. Unique in its approach and rich with illustrative anecdotes—updated with examples of real-world conflicts from today's political realm and from Dr. Kidder's own observations—*How Good People Make Tough Choices* is an indispensable resource for spotting, understanding, and resolving our toughest decisions.

Problems and Solutions for Social Scientists and Policy Professionals Harper Collins

This volume presents research from an international, interdisciplinary, and intersectoral research project in which 15 doctoral researchers explored a range of issues related to the life-course experiences of children born of war in 20th-century conflicts. Children Born of War (CBOW), children fathered by foreign soldiers and born to local mothers during and after armed conflicts, have long been neglected in the research of the social consequences of war. Based on research projects completed under the auspices of the Horizon2020-funded international and interdisciplinary research and training network CHIBOW (www.chibow.org), this book examines the psychological and social impact of war on these children. It focusses on three separate but interrelated themes: firstly, it explores methodological and ethical issues related to research with war-affected populations in general and children born of war in particular. Secondly, it presents innovative historical research focussing specifically on geopolitical areas that have hitherto been unexplored; and thirdly, it addresses, from a psychological and psychiatric perspective, the challenges faced by children born of war in post-conflict communities, including stigmatisation, discrimination, within the significant context of identity formation when faced with contested memories of volatile post-war experiences. The book offers an insight into the social consequences of war for those children associated with the 'enemy' by virtue of their direct biological link.

Do you want to make sure you · Don't invest your money in the next Enron? · Don't go to work for the next WorldCom right before the crash? · Identify and solve problems in your organization before they send it crashing to the ground? Marianne Jennings has spent a lifetime studying business ethics---and ethical failures. In demand nationwide as a speaker and analyst on business ethics, she takes her decades of findings and shows us in *The Seven Signs of Ethical Collapse* the reasons that companies and nonprofits undergo ethical collapse, including: · Pressure to maintain numbers · Fear and silence · Young 'uns and a larger-than-life CEO · A weak board · Conflicts · Innovation like no other · Belief that goodness in some areas atones for wrongdoing in others Don't watch the next accounting disaster take your hard-earned savings, or accept the perfect job only to find out your boss is cooking the books. If you're just interested in understanding the (not-so) ethical underpinnings of business today, *The Seven Signs of Ethical Collapse* is both a must-have tool and a fascinating window into today's business world.

Ethical Considerations for Research on Housing-Related Health Hazards Involving Children explores the ethical issues posed when conducting research designed to identify, understand, or ameliorate housing-related health hazards among children. Such research involves children as subjects and is conducted in the home and in communities. It is often conducted with children in low-income families given the disproportionate prevalence of housing-related conditions such as lead poisoning, asthma, and fatal injuries among these children. This book emphasizes five key elements to address the particular ethical concerns raised by

these characteristics: involving the affected community in the research and responding to their concerns; ensuring that parents understand the essential elements of the research; adopting uniform federal guidelines for such research by all sponsors (Subpart D of 45 CFR 46); providing guidance on key terms in the regulations; and viewing research oversight as a system with important roles for researchers, IRBs and their research institutions, sponsors and regulators of research, and the community.

Ethical Challenges A&C Black

Why did a group of teenagers watch a friend die instead of putting their own reputations at risk? Why did a top White House official decide to come clean and accept a prison sentence during Watergate? Why did a finance executive turn down millions out of respect for her employer? Why are some willing to risk their futures to uphold principles? What gives us the strength to stand up for what we believe? As these questions suggest, the topic of moral courage is front and center in today's culture. Enron, Arthur Andersen, the U.S. Olympic Committee, abusive priests, cheating students, domestic violence -- all these remind us that taking ethical stands should be a higher priority in our culture. Why, when people discern wrongdoing, are they sometimes unready, unable, or unwilling to act? In a book rich with examples, Rushworth Kidder reveals that moral courage is the bridge between talking ethics and doing ethics. Defining it as a readiness to endure danger for the sake of principle, he explains that the courage to act is found at the intersection of three elements: action based on core values, awareness of the risks, and a willingness to endure necessary hardship. By exploring how moral courage spurs us to strive for core values, he demonstrates the benefits of ethical action to the individual and to society -- and the severe consequences that can result from remaining morally dormant. *Moral Courage* puts indispensable concepts and tools into our hands, equipping us to respond to the increasingly complicated moral challenges we face at work, at home, and in our communities. It enables us to make clear, confident decisions by exploring some litmus-test questions: Is the benefit worth the risk? Am I motivated by my desire to uphold my beliefs or just to impose them on others? Will my actions create collateral damage among those with no stake in the outcome? While physical courage may no longer be a necessary survival skill or an essential rite of passage out of childhood, few would dispute the growing need for moral courage as the true gauge of maturity. Treating this subject not as an esoteric branch of philosophy but as a practical necessity for modern life, Kidder deftly leads us to a clear understanding of what moral courage is, what it does, and how to get it.

Ethics is at the heart of leadership. All leaders assume ethical burdens and must make every effort to make informed ethical decisions and foster ethical behavior among followers. The Sixth Edition of *Meeting the Ethical Challenges of Leadership: Casting Light or Shadow* explores the ethical demands of leadership and the dark side of leadership. Author Craig E. Johnson takes a multidisciplinary approach to leadership ethics, drawing from many fields of research to help readers make moral decisions,

lead in a moral manner, and create an ethical culture. Packed with real-world case studies, examples, self-assessments, and applications, this fully-updated new edition is designed to increase students' ethical competence and leadership abilities. *Patient Care, Research, Education, and Economics* Routledge

How is Saddam Hussein like Tony Blair? Or Kenneth Lay like Lou Gerstner? Answer: They are, or were, leaders. Many would argue that tyrants, corrupt CEOs, and other abusers of power and authority are not leaders at all--at least not as the word is currently used. But, according to Barbara Kellerman, this assumption is dangerously naive. A provocative departure from conventional thinking, *Bad Leadership* compels us to see leadership in its entirety. Kellerman argues that the dark side of leadership--from rigidity and callousness to corruption and cruelty--is not an aberration. Rather, bad leadership is as ubiquitous as it is insidious--and so must be more carefully examined and better understood. Drawing on high-profile, contemporary examples--from Mary Meeker to David Koresh, Bill Clinton to Radovan Karadzic, Al Dunlap to Leona Helmsley--Kellerman explores seven primary types of bad leadership and dissects why and how leaders cross the line from good to bad. The book also illuminates the critical role of followers, revealing how they collaborate with, and sometimes even cause, bad leadership. Daring and counterintuitive, *Bad Leadership* makes clear that we need to face the dark side to become better leaders and followers ourselves. Barbara Kellerman is research director of the Center for Public Leadership and a lecturer in public policy at the Kennedy School of Government, Harvard University.

This open access book discusses how the involvement of citizens into scientific endeavors is expected to contribute to solve the big challenges of our time, such as climate change and the loss of biodiversity, growing inequalities within and between societies, and the sustainability turn. The field of citizen science has been growing in recent decades. Many different stakeholders from scientists to citizens and from policy makers to environmental organisations have been involved in its practice. In addition, many scientists also study citizen science as a research approach and as a way for science and society to interact and collaborate. This book provides a representation of the practices as well as scientific and societal outcomes in different disciplines. It reflects the contribution of citizen science to societal development, education, or innovation and provides an overview of the field of actors as well as on tools and guidelines. It serves as an introduction for anyone who wants to get involved in and learn more about the science of citizen science.

Code of Ethics for Nurses with Interpretive Statements SAGE Publications

For most of political science's history, discussions about professional ethics had nothing to do with human subjects. Professional ethics involved integrity in the classroom, fair tenure and promotion rule, and the careful avoidance of plagiarism. As most research was observational, there was little need for attention to how scholarly activities might directly affect the subjects of our work. Times have changed. The dramatic growth in the use of experiments in social science, especially overseas, is generating unexpected ethical controversies. The purpose of this volume is to identify, debate, and propose practical solutions to the most critical of these new ethical issues. A leading team of internationally distinguished political science scholars presents

the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies. Part 1 examines contextual challenges provided by experiments conducted overseas - questions of culture, religion, security, and poverty. Part 2 examines questions of legal constraints on research, focusing on questions of foreign review of international experiments. Part 3 tackles the critical issues in field experiments, including deception and consent, impact on elections and careers, the boundaries of the public officials' exemption, and the use of partner organizations to avoid Institutional Review Body (IRB) review. Part 4 considers strategies for the future, including training and education, IRB reform, institutional changes, and norm development.

In a span of 81 days in 1978, Henry Rono broke four world records, committing the most ferocious assault on the track-and-field record books by a middle-distance runner in the history of the sport. This is what Henry Rono is known for. However, it is not who Henry Rono is. Henry Rono was born a poor Nandi in Kenya's Rift Valley. After an accident when he was two, doctors believed he would never again walk. This would be the first of countless obstacles Rono would have to overcome in order to pursue his two life goals: to first become the greatest runner in the world and then to become the best teacher he could be. Rono's first goal was accomplished in 1978, when he was considered not only the greatest track-and-field athlete in the world, but also by many to be the world's greatest athlete period. His second and greater goal, to become a teacher, was more difficult in coming. Once Rono became a star, coaches, agents, meet directors, and corrupt Kenyan athletic officials (whose boycotts of the 1976 and 1980 Olympics turned Rono's dreams of Olympic gold into Olympic smoke rings), wanted him to serve as their personal moneymaker, and so they did everything they could to discourage Rono's pursuit of an education and dream of teaching. The corruption and discouragement Rono encountered, as well as his alienation and exile from his homeland and family, pushed him to 20 years of alcoholism and even occasional homelessness. This is the life story of Henry Rono, whose descent from triumph to abyss, and whose subsequent ascent from abyss to triumph, are perhaps steeper than those of any track-and field athlete in history.

How to Spot Moral Meltdowns in Companies... Before It's Too Late Sage Publications (CA)

How can you effectively stand up for your values when pressured by your boss, customers, or shareholders to do the opposite?

Drawing on actual business experiences as well as on social science research, Babson College business educator and consultant Mary Gentile challenges the assumptions about business ethics at companies and business schools. She gives business leaders, managers, and students the tools not just to recognize what is right, but also to ensure that the right things happen. The book is inspired by a program Gentile launched at the Aspen Institute with Yale School of Management, and now housed at Babson College, with pilot programs in over one hundred schools and organizations, including INSEAD and MIT Sloan School of Management. She explains why past attempts at preparing business leaders to act ethically too often failed, arguing that the issue isn't distinguishing what is right or wrong, but knowing how to act on your values despite opposing pressure. Through research-based advice, practical exercises,

and scripts for handling a wide range of ethical dilemmas, Gentile empowers business leaders with the skills to voice and act on their values, and align their professional path with their principles. Giving Voice to Values is an engaging, innovative, and useful guide that is essential reading for anyone in business.
