## Abnormal Psychology

Ron Comer's brief text is ideal for introducing students to the realities of living with, treating, and researching psychological disorders. From his experiences as a practicing therapist, Comer draws a multitude of examples of real people and the disorders with which they struggle. From his extensive classroom experience, he presents the material in a way that connects to students' lives. And with this new edition, *Fundamentals of Abnormal Psychology* becomes the first abnormal psychology text that fully embraces diagnostic and definition changes introduced by the DSM-5.

### **Student Workbook for Ronald J. Comer's Abnormal Psychology, Third Edition** Worth Publishers

Through a thoughtful and accurate balance of developmental, clinical-diagnostic, and experimental approaches to child and adolescent psychopathology, Eric Mash and David Wolfe's *ABNORMAL CHILD PSYCHOLOGY* remains the most authoritative, scholarly, and comprehensive book in its market. Accessible to a broad range of readers, the book traces the developmental course of each disorder and shows how biological, psychological, and sociocultural factors interact with a child's environment. Case histories, case examples, and first-person accounts are at the heart of the text, illustrating the categorical and dimensional approaches used to describe disorders and bringing life to the theories discussed. The authors also consistently illustrate how troubled children behave in their natural settings: homes, schools, and communities. Up-to-date and forward-looking, the text covers the DSM-IV-TR and dimensional approaches to classification as well as evidence-based assessment and treatment, contemporary research, and the latest theories related to the predominantly inattentive ADHD subtype, early-onset and the developmental propensity model of conduct disorder, the triple vulnerability model of anxiety, the tripartite model in children, depression, and autism. ### Psychology Around Us Cram101

Fully updated for DSM-5, this exciting revision complements the abnormal psychology course by providing 17 case histories based on the authors' clinical experiences. Each case study goes beyond DSM-5 diagnosis to describe the individual's history and symptoms, a theoretical discussion of treatment, a specific treatment plan, the actual treatment conducted, and assessment questions for students. The casebook also provides three "You Decide" cases -- written without diagnosis or treatment, so students can identify disorders and suggest appropriate therapies. This new edition adds assessment questions to the end of each case and also features three brand new cases: hoarding, somatic symptom disorder, and gender dysphoria.

**A Christian Vision of Human Sexuality** InterVarsity Press Merle Jordan argues that many people spend their adult lives struggling to distinguish between the imperatives of divine authority and the deeply rooted psychological authority of family structures. Employing the wisdom of his experience as a pastoral psychologist as well as the insights of clinical researchers and therapists, Jordan offers ways to demythologize false absolutes and to refocus distorted maps of reality.
