Textbook of Anatomy (Regional and Clinical) Upper Limb and Thorax: CBS Publishers & Distributors Private Limited

Guyton and Hall Textbook of Medical Physiology continues this bestselling title's tradition as one of the world's favourite physiology textbooks. The main aim of the South Asian Edition of Guyton & Hall Textbook of Medical Physiology is to meet the needs of undergraduate medical students and faculty in South Asia in alignment to the teaching methods in the subcontinent and also in terms of volume of content required. Presentation of the South Asian Edition is quite reflective of the way the lectures are being delivered in the classroom, both in terms of the breakup of topics and the basic level of detailing and explanations. The South Asian Edition incorporates several features aimed at aiding learning for students while retaining the flow and explanatory approach. Chapters have been rearranged and often split to work towards one chapter-one lecture model so that the text is linked to curriculum objectives which appeals to both students and faculty. Narrative length has been reduced while ensuring the original flow and explanation of concepts is not affected. Topics that are likely to be covered by other subjects and redundancies from the point of view of curriculum have been removed. Includes Learning Objectives and Glossary of Terms in the beginning of every chapter. Mobile App of physiology animations covering difficult and important concepts to enhance the learning process of students.

Ganong's Review of Medical Physiology, Twenty sixth Edition Elsevier Health Sciences
 This text broke ground with its thorough coverage of molecular physiology seamlessly integrated into a traditional homeostasis-based systems approach. This edition introduces a major reorganisation of the early chapters to provide the best foundation for the course and new art features that streamline review and essential topics so that students can access them more easily on an as-needed basis.

Gray's Anatomy for Students is a clinically oriented, student-friendly textbook of human anatomy. It allows students to learn anatomy within the context of many different curricular designs, and within ever-increasing time constraints. The artwork in this textbook presents the reader with a visual image that brings the text to life and presents views that will assist in the understanding and comprehension of the anatomy. Each regional anatomy chapter consists of four consecutive sections: conceptual overview, regional anatomy, surface anatomy, and clinical cases. The Second South Asia Edition of this textbook has two volumes: Volume One—The Body, Upper Limb, Lower Limb, Abdomen, Pelvis and Perineum; and Volume Two—Thorax, Back, Head and Neck, and

Neuroanatomy. New content has been added on the basis of updates in the Fourth International Edition, including the addition of a new chapter on neuroanatomy. The innovative features of the First South Asia Edition such as Set Inductions, Outlines, and Flowcharts have been improved. Students are encouraged to use online resources available on MedEnact. A unique feature of this edition is that each chapter contains line diagrams, abbreviated as LDs, along with questions and answers. These line diagrams are sketches which are easy to draw during an examination and can help students to acquire anatomical concepts and do well in assessment. The questions and answers facilitate learning. Competencies have been added in all the chapters since the curriculum is becoming competency based.
