KS3 SATS National Test Practice Papers English, Maths and Sc Letts & Lonsdale

Technology is at the heart of learning for all of us and every teacher needs to be using social media, mobile technologies and transformational digital learning opportunities as an integral part of their range of strategies for helping students make the maximum progress. In this book in the 'Perfect' series, Mark Anderson, the ICT Evangelist, takes the technology-

related elements of all the recent subject reports from Ofsted and using them offers clear and practical strategies that are proven to be successful in classrooms and offers up ideas for how they can be turned into a daily reality for all teachers.

Perfect ICT Every Lesson HarperCollins UK

This report unveils proposals for the biggest programme of reform in the education and health support for children with special educational needs (SEN) and disabilities in 30 years. The Government wants to fundamentally reform the SEN system to address problems including: parents having to battle to get the support their child needs; SEN statements not joining up education, health and care support; children falling between the gaps in services or having to undergo multiple assessments; multiple layers of paperwork and bureaucracy adding delays to getting support, therapy and vital equipment; confusing and adversarial assessment process, with the perceived conflict of interest where the local authority must provide SEN support as well as assess children's needs; too many children are being over-identified as SEN, preventing them from achieving their potential because teachers have lower expectations of them. The Government proposes to: include parents in the assessment process and introduce a legal right, by 2014, to give them control of funding for the support their child needs; replace statements with a single assessment process and a combined education, health and care plan so that health and social services is included in the package of support; ensure assessment and plans run from birth to 25 years old; replace the existing complicated School Action and School Action Plus system with a simpler new school-based category to help teachers focus on raising attainment;

overhaul teacher training and professional development; inject greater independence from local authorities in assessments; give parents a greater choice of school and the power to set up special free schools

MICROECONOMICS, 4TH EDITION John Catt

Completely covers the syllabus for Cambridge IGCSE Mathematics Core Level.

New KS3 Maths Independently Published

These resources have been created for the Cambridge IGCSE® and O Level Additional Mathematics syllabuses (0606/4037), for first examination from 2020. New edition of our best-selling IGCSE Mathematics textbook

Edexcel International GCSE (9-1) Mathematics Student Book Third Edition Collins

There are many models of schooling; some work, some don't.

Mastery is an entire model of schooling with over 100 years of provenance, its impact has been researched for decades, with many of the world's greatest education minds testing and refining the approach. It's one of the models of schooling that actually works. In this book, Mark McCourt examines the history of a teaching for mastery approach, from its early beginnings to the modern day when cognitive scientists have been able to bring further evidence to the debate, demonstrating why a model that

was first proposed in the 1910s has the incredible impact on both pupil attainment and attitudes to learning that it has had all around the world over many decades. Drawing on examples from cross disciplines, the story of mastery is one that all educators

can engage with. Mark also draws on his own subject, mathematics, to further exemplify the approach and to give practical examples of pedagogies and didactics that teachers can deploy immediately in their own classroom.
