 Real-Time Auditing for SANS Consensus Audit Guidelines  
 Internal audit must learn to be more agile and forward-looking. The goal is to provide real-time (or close to real-time) assurance through data analytics, allowing for quick and responsive changes to audit plans and scoping in audit engagements, and enhancing the depth and breadth of fieldwork without expending extra time and effort.

 WIS International is a leading provider of outsourced inventory data collection, verification, merchandising and analysis services to customers globally.  
 Real-Time-Auditing - WIS  
 "Audit firms will provide plug-ins for blockchain, do the audit in real time, spot anomalies and then send in humans to dig deeper if necessary - unless software can do it for

them, of course." Blockchain could also spell the end of random sampling by auditors, since code could perform a check on every single transaction in future.  
 How blockchain could introduce real-time auditing | EY ...  
 The "continuous" aspect of continuous auditing and reporting refers to the real-time or near real-time capability for financial information to be checked and shared. Not only does it indicate that the integrity of information can be evaluated at any given point of time, it also means that the information is able to be verified constantly for errors, fraud, and inefficiencies.
