See examples and step-by-step instruction Analysis of Financial Statements - Free Financial Analysis ... Comparative financial analysis is the process of analyzing the data found in a financial report in comparison with similar data from other reports. This allows whoever is doing the analysis to get some context which makes the raw numbers more meaningful. What Is Comparative Financial Analysis? (with picture) Comparative financial statements can use both absolute amounts and percentages to provide meaningful analysis. This type of analysis puts absolute changes and

percentage changes in perspective. No changes can be computed if there is no base figure available, and no meaningful change can be calculated if one figure is positive and the other is negative.
