BRUNO TOWNSEND

Time Planet Earth Nosy
Crow

10 years on from the first,
groundbreaking, Planet
Earth, we use the most
incredible advances in
technology and scientific

discovery to bring you the
most exciting and
immersive picture of our
world's wildlife yet. With
over 250 breathtaking
photographs and stills
from the BBC Natural
History Unit's spectacular
footage, this is an
extraordinary new look at
the complex life of some
of the most amazing

places on Planet Earth.
Each chapter reveals an
environment – some
never-before-seen, some
astonishingly familiar –
defined by a unique set of
rules required for survival.
From the most desolate
desert to the depths of
the jungle, from blistering
heat and freezing cold to
perpetual darkness and

deadly UV, discover how a whole host of creatures have adapted to life in the most extreme conditions. And how they compete with one another to become the largest, the fastest, the most poisonous, or most devious - all in a bid to survive. Planet Earth II includes the first in-depth look at the urban environment, and the surprising range of behaviours occurring right under our noses, as well as some previously untouched island worlds. Filmed with remarkable

5k and infra-red technology, these are the challenges, the confrontations, and the triumphs of some of the most extraordinary creatures in the natural world, told from their perspective. This is our planet, as you have never seen it before.

Geotours Workbook

Albert Whitman & Company
The Sunday Times Bestseller A new, fully updated narrative edition of David Attenborough's seminal biography of our world, The Living Planet.

Livre du pain et du vin, de leau, de lhuile et du baume W. Norton

This new edition will only enhance its success. It has been thoroughly revised to ensure current coverage of all major topics, especially earthquakes (including the disaster in Haiti in 2010), volcanoes, and climate change. The drawn art represents the state of the art and is both pedagogically innovative and a feast for the eyes. The Google Earth exercises provide virtual field trips to the

entire world.

The Uninhabitable Earth
Yearling

From two-time Caldecott
Winner author-illustrator
Sophie Blackall! If You
Came to Earth is a
glorious guide to our
home planet, and a call
for us to take care of both
Earth and each other. This
stunning book is inspired
by the thousands of
children Sophie Blackall
has met during her travels

around the world in
support of UNICEF and
Save the Children. • An
engaging storybook about
a single curious and
imaginative child •

Simultaneously funny and
touching • Carries a clear
message about the need
to care for the earth and
each other If you come to
Earth, there are a few
things you need to know. .
. We live in all kinds of
places. In all kinds of
homes. In all kinds of
families. Each of us is
different. But all of us are
amazing. And, together,
we share one beautiful

planet. This masterful and
moving picture book is a
visually comprehensive
guide to the earth,
imbued with warmth and
humor. • Ideal for children
ages 3 to 5 years old • A
great pick for teachers
looking for a crowd-
pleasing picture book
about the world for little
students • Perfect for
parents, grandparents,
and caregivers • You'll
love this book if you love
books like *The Travel
Book* by Lonely Planet
Kids, *Atlas of Adventures*
by Rachel Williams, and *If
You Lived Here: Houses of*

the World by Giles Laroche.

Earth Springer Nature
Draws on satellite images from NASA to trace the natural history of the planet, describing the forces that have shaped Earth's geography and highlighting noteworthy features, including volcanoes, asteroid craters, river deltas, and glaciers.

Planet Earth II W. W. Norton

A dynamic aerial exploration of our changing planet, published on the 50th

anniversary of Earth Day
The Human Planet is a sweeping visual chronicle of the Earth today from a photographer who has circled the globe to report on such urgent issues as climate change, sustainable agriculture, and the ever-expanding human footprint. George Steinmetz is at home on every continent, documenting both untrammelled nature and the human project that relentlessly redesigns the planet in its quest to build shelter, grow food, generate energy, and

create beauty through art and architecture. In his images, accompanied by authoritative text by renowned science writer Andrew Revkin, we are encountering the dramatic and perplexing new face of our ancient home.

Earth HARCOURT

Move to another planet? Sounds interesting! In our imaginary spaceship, let's check out the planets in our solar system. Mercury is closest, but it has no air, and it's either sizzling hot or bitterly cold. The atmosphere on Venus is

poisonous; plus, human beings would cook there. Mars might work, but you'd always have to be in a protective shelter. And if you got to the outer planets, you couldn't even land as they are mostly made of gas! Our home planet is looking good. Why is Earth so comfortable for plants, animals, and people? As Robert E. Wells explains, it's because of our just-right position from the sun, marvelous atmosphere, and abundant water. Our planet is very special and

perfect for us, and that's why we must do all we can to keep Earth healthy. An Introduction to the Earth-Life System Chronicle Books #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New Yorker* • *The New York Times Book Review* •

Time • NPR • *The Economist* • *The Paris Review* • *Toronto Star* • *GQ* • *The Times Literary Supplement* • *The New York Public Library* • *Kirkus Reviews* It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (*The*

Guardian) and “this generation’s Silent Spring” (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call

to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s. **LONGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD** “*The Uninhabitable Earth* is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously

documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, *The New York Times* “Riveting. . . . Some readers will find Mr. Wallace-Wells’s outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—*The Economist* “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘eerily banal language of climatology’

in favor of lush, rolling prose.”—Jennifer Szalai, The New York Times “The book has potential to be this generation’s Silent Spring.”—The Washington Post “The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book.”—Alan Weisman, The New York Review of Books

(STANDALONE) W. W.
Norton

"Tender and illuminating. A beautiful debut." -- Rebecca Stead, Newbery Medal-winning author of *When You Reach Me* A heartrending and hopeful story about a nonverbal girl and her passion for space exploration, for fans of *See You in the Cosmos*, *Mockingbird*, and *The Thing About Jellyfish*. Twelve-year-old Nova is eagerly awaiting the launch of the space shuttle *Challenger*--it's the first time a teacher is going into space, and kids across America will watch the event on live TV in

their classrooms. Nova and her big sister, Bridget, share a love of astronomy and the space program. They planned to watch the launch together. But Bridget has disappeared, and Nova is in a new foster home. While foster families and teachers dismiss Nova as severely autistic and nonverbal, Bridget understands how intelligent and special Nova is, and all that she can't express. As the liftoff draws closer, Nova's new foster family and teachers begin to see her

potential, and for the first time, she is making friends without Bridget. But every day, she's counting down to the launch, and to the moment when she'll see Bridget again. Because as Bridget said, "No matter what, I'll be there. I promise."

Essentials of Geology

Random House

Looks at the Planet Earth with numerous color illustrations and accompanying text, with separate sections examining the atmosphere, pedosphere,

biosphere, hydrosphere, cryosphere, and geosphere.

What's So Special about Planet Earth?

Activity Book

A hands-on, visual learning experience for physical geology
Earth: Portrait of a Planet Art Notebook Henry Holt and Company (BYR)
 PORTRAITS OF THE EARTH, combines 114 remarkable photographs with a compelling text. It is a remarkable photographic portrait of this planet we call Earth.
Planet Earth Is Blue W.

W. Norton

This concise textbook combines Earth and biological sciences to explore the co-evolution of the Earth and life over geological time.

Living Planet: The Web of Life on Earth Piatkus Books

A lighthearted nonfiction picture book about the formation and history of the Earth--told from the perspective of the Earth itself! "Hi, I'm Earth! But you can call me Planet Awesome." Prepare to learn all about Earth from the point-of-view of Earth

herself! In this funny yet informative book, filled to the brim with kid-friendly facts, readers will discover key moments in Earth's life, from her childhood more than four billion years ago all the way up to present day. Beloved children's book author Stacy McAnulty helps Earth tell her story, and award-winning illustrator David Litchfield brings the words to life. The book includes back matter with even more interesting tidbits. This title has Common Core connections.

The Earth and Beyond
Oxford University Press
When faced with climate change, the biggest threat that our planet has ever confronted, it's easy to feel as if nothing you do can really make a difference . . . but this book proves that individual people can change the world. With twenty inspirational stories celebrating the pioneering work of a selection of Earth Heroes from all around the globe, from Greta Thunberg and David Attenborough to Yin Yuzhen and Isatou

Ceesay, each tale is a beacon of hope in the fight for the future of our planet, proving that one person, no matter how small, can make a difference. Featuring Amelia Telford, Andrew Turton and Pete Ceglinski, Bittu Sahgal, Chewang Norphel, David Attenborough, Doug Smith, Ellen MacArthur, Greta Thunberg, Isabel Soares, Isatou Ceesay, Marina Silva, Melati and Isabel Wijisen, Mohammed Rezwani, Renée King-Sonnen, Rok Rozman, Sheila Watt-Cloutier,

Stella McCartney, William Kamkwamba, Yin Yuzhen and Yvon Chouinard. Featuring illustrations by Jackie Lay.

Planet Earth: Land,

Water, Sky Centripetal Press

“Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan’s books.”—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of

people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies

beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. “Takes readers far beyond *Cosmos* . . . Sagan sees humanity’s future in the stars.”—Chicago Tribune
Planet Earth Activity Book
W. W. Norton & Company
Join fifty inspiring and extraordinary environmental crusaders working to save our planet and see how you can make a difference just

like them. Kids across the globe will be moved by the passion of these amazing eco-warriors who have dedicated their lives to making our world a better place. Alongside dynamic illustrations and entertaining biographical information, you'll find practical tips that anyone can do to help save the earth. Every one of us can make a difference, and, together as an Earth Squad, we can change the world. Will Allen * Anohni * Yann Arthus-Bertrand * Inka Saara Arttijeff * David Attenborough *

Precious Brady-Davis * Erin Brockovich * Vicki Buck * Rachel Carson * Yvon Chouinard * Opha Pauline Dube * Lamy Essemli * Christiana Figueres * Eileen Fisher * Eunice Newton Foote * Wan Gang * Al Gore * James Hansen * Vanessa Hauc * Hilda Heine * Chai Jing * Alexandra Koroleva * Winona LaDuke * Dr. Phil Landrigan * Annie Leonard * Wangari Maathai * Xiuhtezcatl Martinez * Gina McCarthy * William McDonough * Bill McKibben * Angela Merkel * Charles Moore *

Nicolaus Copernicus
Macmillan

Since 1960, there have been two major theoretical advances in the Earth sciences: the

theory of plate tectonics and the advent of Earth systems science. Stephen Marshak's beautifully written and illustrated new text is the first to incorporate both of these discoveries from its inception. *Earth: Portrait of a Planet* covers all the topics of a traditional physical geology course, but also includes such topics as historical geology, environmental geology, the Earth's resources, the oceans and atmosphere, cosmology, and global change. What results is a fascinating,

comprehensive portrait of planet Earth. **Earth** Abrams "This is the first real biography of the Earth - not only a brilliant portrait of the emergence and evolution of life on this planet, but a vivid and frightening look at Earth's remote future. Peter Ward and Donald Brownlee combine storytelling power with extreme scientific care, and their narrative is as transfixing as any of H.G. Wells's fantasies, but more enthralling, for Ward and Brownlee have real power

to prognosticate. This is a book that makes one shiver, but also inspires one to wonder how humanity (if we survive in the short term) will fare in the distant future." Oliver Sachs Peter Ward and Don Brownlee, a geologist and an astronomer respectively, are in the vanguard of the new field of astrobiology. Combining their knowledge of the evolution of life on our planet with their understanding of the life cycles of stars and solar systems, the authors tell

the awe-inspiring story of the second half of Earth's life. The process of planetary evolution will

essentially reverse itself; life as we know it will subside until only the simplest forms remain. The oceans will

evaporate, and as the sun slowly expands, Earth itself will eventually meet a fiery end.
