*MacRuby: The Definitive Guide* Routledge Learning Not Schooling: Reimagining the Purpose of Education examines how both the curiosity and the initiative of students in their formative years can be stimulated by partnering local schools with the world of adult work and professional expertise. This tactic addresses some of the issues that seem to continually plague us, such as how to help students learn more effectively in the modern age, or how to more fully address some of the perpetual inequities between different socioeconomic groupings. Drawing on his experiences from founding and directing a private school for students age six to fourteen, Lyn Lesch presents a new model

for education in which learning for students increasingly occurs in the world of adult expertise, with classroom teachers taking on the role of conduits that not only prepare students to learn from professionals working in various fields but also assist them in absorbing the advanced information and knowledge they will be acquiring.

Law, Rights and Ideology in Russia: Landmarks in the destiny of a great power brings into sharp focus several key episodes in Russia's vividly ideological engagement with law and rights. Drawing on 30 years of experience of consultancy and teaching in many regions of Russia and on library research in Russian-language texts, Bill Bowring provides unique insights into people, events and ideas. The book starts with the surprising role of the Scottish Enlightenment in the origins of law as an academic discipline in Russia in the eighteenth century. The Great Reforms of Tsar Aleksandr II, abolishing serfdom in 1861 and introducing jury trial in 1864, are then examined and debated as genuine reforms or the response to a revolutionary situation. A new interpretation of the life and work of the Soviet legal theorist Yevgeniy Pashukanis leads to an analysis of the conflicted attitude of the USSR to international law and human rights, especially the right of peoples to self-determination. The complex history of autonomy in Tsarist and Soviet Russia is

considered, alongside the collapse of the USSR in 1991. An examination of Russia's plunge into the European human rights system under Yeltsin is followed by the history of the death penalty in Russia. Finally, the secrets of the ideology of 'sovereignty' in the Putin era and their impact on law and rights are revealed. Throughout, the constant theme is the centuries long hegemonic struggle between Westernisers and Slavophiles, against the backdrop of the Messianism that proclaimed Russia to be the Third Rome, was revived in the mission of Soviet Russia to change the world and which has echoes in contemporary Eurasianism and the ideology of sovereignty.

While ideology has been treated widely in CDA-literature, the role played by the interaction of text and image in multiplying meaning and furthering ideological stances has not so far received a lot of attention. *Mediating Ideology in Text and Image* offers a number of approaches to such analysis, offering students and academics valuable tools for identifying possible discrepancies between

the world and the way it is represented through various mediational means. The authors' common aim is one of assisting the audience in reading between the lines, thus offering a variety of approaches that may contribute to a better understanding of how ideologies possibly work and how they may be denaturalised from text and image. The articles in part I look at rhetorical strategies used in meaning construction processes unfolding in various kinds of mass media. Part II focuses on the re-semiotization of meaning and looks at how analysing the combination of text and image may contribute to a better understanding of ideological processes brought about by multimodal resources. Foreword by Ruth Wodak.

Based on the proceedings of a satellite symposium held in conjunction with the 9th World Congress of Gastroenterology, the aim of this volume is to present and discuss the latest data originating from leading laboratories in the field. The change in focus of current research to studies of chronic repair rather than acute responses, and deeper mucosal elements rather than surface phenomena, is apparent.
