In this epic spiritual  
poem, Sri Aurobindo  
reveals his vision of

mankind's destiny within the universal evolution. He sets forth the optimistic view that life on earth has a purpose, and he places our travail within the context of this purpose: to participate in the evolution of consciousness that represents the secret thread behind life on Earth.

A Guide Through the American Status System Faber & Faber

Two men played a crucial role in the creation and early history of the National Park Service: Stephen T. Mather, a public relations genius of sweeping vision, and Horace M. Albright, an able lawyer and administrator who helped transform that vision into reality. In *Creating the National Park Service*, Albright

and his daughter, Marian Albright Schenck, reveal the previously untold story of the critical "missing years" in the history of the service. During this period, 1917 and 1918, Mather's problems with manic depression were kept hidden from public view, and Albright, his able and devoted assistant, served as acting director and assumed Mather's responsibilities. Albright played a decisive part in the passage of the National Park Service Organic Act of 1916; the formulation of principles and policies for management of the parks; the defense of the parks against exploitation by ranchers, lumber companies, and mining interests during World

War I; and other issues crucial to the future of the fledgling park system. This authoritative behind-the-scenes history sheds light on the early days of the most popular of all federal agencies while painting a vivid picture of American life in the early twentieth century.

The first biography of the artist who

“essentially invented indie and alternative rock” (Spin) A brilliant

and influential songwriter, vocalist, and guitarist, the charismatic Alex Chilton was more than a rock star—he was a true cult icon.

Awardwinning music writer Holly George-Warren’s *A Man Called Destruction* is the first biography of this enigmatic artist, who died in 2010. Covering Chilton’s life from his early work with the chart-topping Box Tops and the seminal power-pop band Big Star to his experiments with punk and roots music and his sprawling solo career, *A Man Called Destruction* is the story of a musical icon and a richly detailed chronicle of pop music’s evolution, from the mid-1960s through today’s indie rock.

The dictatorship of Rafael Trujillo, who ruled the Dominican Republic from 1930 until his assassination in 1961, was one of the longest and bloodiest in Latin American history. The Dictator's Seduction is a cultural history of the Trujillo regime as it was experienced in the capital city of Santo Domingo. Focusing on everyday forms of state domination, Lauren Derby

describes how the regime infiltrated civil society by fashioning a "vernacular politics" based on popular idioms of masculinity and fantasies of race and class mobility. Derby argues that the most pernicious aspect of the dictatorship was how it appropriated quotidian practices such as gossip and gift exchange, leaving almost no place for Dominicans to hide or resist. Drawing on previously untapped documents in the Trujillo National Archives and interviews with Dominicans who recall life under the dictator, Derby emphasizes the role that public ritual played in Trujillo's exercise of power. His regime included the people in affairs of state on a massive

scale as never before. Derby pays particular attention to how events and projects were received by the public as she analyzes parades and rallies, the rebuilding of Santo Domingo following a major hurricane, and the staging of a year-long celebration marking the twenty-fifth year of Trujillo's regime. She looks at representations of Trujillo, exploring how claims that he embodied the popular barrio antihero the tiguere (tiger) stoked a fantasy of upward mobility and how a rumor that he had a personal guardian angel suggested he was uniquely protected from his enemies. *The Dictator's Seduction* sheds new light on the cultural contrivances of autocratic power.

Winner of the Pulitzer

Prize “A masterwork . . . the novel astonishes with its inventiveness . . . it is nothing less than a grand comic fugue.”—The New York Times Book Review A Confederacy of Dunces is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, Chicago Sun-Times).

"One of the best books of its kind in decades."  
—The Wall Street Journal

An epic achievement and a huge delight, the entire

history of popular music over the past fifty years refracted through the big genres that have defined and dominated it: rock, R&B, country, punk, hip-hop, dance music, and pop

Kelefa Sanneh, one of the essential voices of our time on music and culture, has made a deep study of how popular music unites and divides us, charting the way genres become communities. In *Major Labels*, Sanneh distills a career's worth of knowledge about music and musicians into a brilliant and omnivorous reckoning with popular music—as an art form (actually, a bunch of art forms), as a cultural and economic force, and as a tool that we use to build our identities. He

explains the history of slow jams, the genius of Shania Twain, and why rappers are always getting in trouble. Sanneh shows how these genres have been defined by the tension between mainstream and outsider, between authenticity and phoniness, between good and bad, right and wrong.

Throughout, race is a powerful touchstone: just as there have always been Black audiences and white audiences, with more or less overlap depending on the moment, there has been Black music and white music, constantly mixing and separating. Sanneh debunks cherished myths, reappraises beloved heroes, and upends familiar ideas of

musical greatness, arguing that sometimes, the best popular music isn't transcendent. Songs express our grudges as well as our hopes, and they are motivated by greed as well as idealism; music is a powerful tool for human connection, but also for human antagonism. This is a book about the music everyone loves, the music everyone hates, and the decades-long argument over which is which. The opposite of a modest proposal, Major Labels pays in full.

The New York Times bestselling debut book of poetry from Lana Del Rey, Violet Bent Backwards Over the Grass. "Violet Bent Backwards Over the Grass is the title poem of the book and the

first poem I wrote of many. Some of which came to me in their entirety, which I dictated and then typed out, and some that I worked laboriously picking apart each word to make the perfect poem. They are eclectic and honest and not trying to be anything other than what they are and for that reason I'm proud of them, especially because the spirit in which they were written was very authentic." —Lana Del Rey Lana's breathtaking first book solidifies her further as "the essential writer of her times" (The Atlantic). The collection features more than thirty poems, many exclusive to the book: Never to Heaven, The Land of 1,000 Fires,

Past the Bushes Cypress Thriving, LA Who Am I to Love You?, Tessa DiPietro, Happy, Paradise Is Very Fragile, Bare Feet on Linoleum, and many more. This beautiful hardcover edition showcases Lana's typewritten manuscript pages alongside her original photography. The result is an extraordinary poetic landscape that reflects the unguarded spirit of its creator. Violet Bent Backwards Over the Grass is also brought to life in an unprecedented spoken word audiobook which features Lana Del Rey reading fourteen select poems from the book accompanied by music from Grammy Award-winning musician Jack Antonoff. A pioneering neuroscientist argues that we are more than our brains. To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact. This blinds us to the physical realities of mental function. We ignore bodily influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately

overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.
