Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki **Chilton's Repair & Tune-up Guide, Mustang, Capri, Merkur, 1979-85** Dundurn

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."

Muscle cars are loud, proud, and in your face, with no other pretensions than to be just that. They may be simple, even crude, but for roaring, pumping, tire-smoking standing starts, they are the business. Muscle cars are a quintessentially North American phenomenon, owing their outrageous existence to a very simple formula. Take a mid-sized American sedan, nothing too complicated, upmarket, or fancy, then add the biggest, raunchiest V8 that it is possible to squeeze under the hood, and there it is! Pontiac was first, with the legendary GTO, then Ford invented a new class of car with the the pony car, the Mustang, then every other American manufacturer got in on the act, producing the legendary Hemi, Camaro, Firebird and Trans-Am, among many

others. This book covers them all, as well as all the excitement of Trans-Am/NASCAR racing. Muscle cars are loud, proud and in your face, with no other pretensions than to be just that. They may be simple, even crude, but for roaring, pumping, tire-smoking standing starts, they are the business. To the youth culture of America, raised on drag racing, red-light street racing and hot-rodding, they are irresistible. The late 1960s was the heyday of the muscle car, before soaring accident rates and insurance premiums, tougher safety and emissions legislation, and finally an oil crisis, made excessive horsepower seem irresponsible. For a while, muscle cars faded from the scene, but in the 1980s they were beginning to creep back into favor, building to a full-blooded revival in the 1990s. They may be a little more efficient today, certainly more high-tech, but muscle cars are definitely back with a vengeance!
