This book provides a chronological introduction to the sciences of astronomy and cosmology based on the reading and analysis of significant selections from classic texts, such as Ptolemy's The Almagest, Kepler's Epitome of Copernican Astronomy, Shapley's Galaxies and Lemaître's The Primeval Atom. Each chapter begins with a short introduction followed by a reading selection. Carefully crafted study questions draw out key points in the text and focus the reader's attention on the author's methods, analysis, and conclusions. Numerical and observational exercises at the end of each chapter test the reader's ability to understand and apply key concepts from the text. The Heavens and the Earth is the first of four volumes in A Student's Guide Through the Great Physics Texts. This book grew out of a four-semester undergraduate physics curriculum designed to encourage a

critical and circumspect approach to natural science, while at the same time preparing students for advanced coursework in physics. This book is particularly suitable as a college-level textbook for students of the natural sciences, history or philosophy. It also serves as a textbook for advanced high-school students, or as a thematically-organized source-book for scholars and motivated lay-readers. In studying the classic scientific texts included herein, the reader will be drawn toward a lifetime of contemplation.

"My road to atheism was paved by science... but, ironically, so was my later journey to God." Former atheist Lee Strobel has discovered that science, far from being the enemy of faith, now provides a solid foundation for belief in God. New scientific discoveries point to the incredible complexity of our universe, a complexity best explained by the existence of a Creator. This revised six-session study (DVD/digital video) invites participants to encounter this evidence delivered in a compelling conversational style. Join Strobel in reexamining the theories that once led him away from God. Pastors, small group leaders, and individuals seeking resources that answer tough questions about the existence of God will find compelling answers in the Case for a Creator study. Sessions include: Science and God Doubts about Darwinism The Evidence of Cosmology The Fine-tuning of the Universe The Evidence of Biochemistry The DNA and the Origin of Life Designed for use with the Case for a Creator Revised Video Study 9780310699606 (sold separately).
