Communication Skills for Working with Children and Young People
SAGE

Based on a huge body of research in child language and communication development, *Children's Communication Skills* uses a clear format to set out the key stages of communication development in babies and young children. Its aim is to increase awareness in professionals working with children of what constitutes human communication and what communication skills to expect at any given stage. Illustrated throughout with real-life examples, this informative text addresses: normal development of verbal and non-verbal communication skills the importance of play in developing these skills developmental communication problems bilingualism, cognition and early literacy development working with parents of children with communication difficulties. Features designed to make the book an easy source of reference include chapter summaries, age-specific skills tables, sections on warning signs that further help may be needed, and a glossary of key terms. It will be of great use to a wide range of professionals in training or working in health, education and social care.

Communication, Language and Literacy from Birth to Five
Brookes Publishing Company

Presents strategies for helping children with autism interact with others and achieve their potential, covering such areas as back-and-forth interactions, nonverbal communication, and imitation. *Developing Early Communication, Language and Learning Skills at Home* Brookes Publishing Company

For those working with children, effective communication is a crucial part of building relationships and encouraging children's emotional and intellectual development. This practical guide identifies the child and their relationship with the adult as the

basis upon which real communication can be made. Topics covered include non-verbal communication, attentive listening, empathy, the part played by questions, working constructively with conflict and criticism, and communicating in groups. It also draws on the innovative ideas found in social pedagogic theory and practice, such as communicating with your head, hands and heart and how to differentiate between the personal, the professional and the private in your interactions. The book contains exercises, topics for personal reflection or group discussion, and suggestions for observations. This will be an excellent source of advice and ideas for all those in the children's workforce including early years professionals, teachers, social workers, counsellors and practitioners working with children in care, including foster carers.

Early Communication Skills for Children with Down Syndrome Hay House, Inc

Provides a field-tested model for respectful, reciprocal, and responsive interaction honoring cultural beliefs and values. Includes detailed vignettes, reproducible forms, tips on using translators, and guidelines for distinguishing and differentiating between behaviors from other cultures.

Key Times for Play Jessica Kingsley Publishers

Early Childhood Development: A Multicultural Perspective, 6/e addresses both typical and atypical child development from birth through age eight. This text highlights the diversity of child development, preparing professionals to meet the unique needs of children from a wide variety of backgrounds.

Early Communication Skills for Children with Down Syndrome New Harbinger Publications

This book encourages all those working with children with speech, language and communication needs to develop their creativity within a model of child-centred reflective practice, acknowledging that our interaction with children has an effect at many different levels. Therapists, teachers, teaching assistants and parents will find a wealth of practical suggestions and a solid

foundation of research within these pages.' Mary Hampton, Chair, Association of Speech and Language Therapists in Independent Practice (ASLTIP), UK For many children, the act of communication that most of us take for granted can be a struggle, and communicating with others can become something to fear rather than enjoy. This creative book is full of fun and imaginative ideas to help children aged 4-11 with a speech or language delay or disorder to develop their communication abilities and skills. It is packed with activities and games tailored to help develop abilities such as effective listening, imagination and perseverance, and to build specific skills such as formulation of questions, categorising, taking turns and understanding non-verbal communication. Tips for personalising and shaping the activities are provided. A comprehensive theory section also covers how play can be a therapeutic tool for enhancing communication, and how to structure the emotional environment. Practical advice on working with groups and individuals and in different settings is also given. This activity book is an invaluable resource not only for speech and language therapists and students, but also for parents, teachers, carers and other support staff who are looking for creative ways to promote speech and language development. Deborah M. Plummer is a speech and language therapist and imagework practitioner with over 20 years' experience of facilitating groups and working individually with both children and adults. Formerly a clinical lead therapist working within the NHS, she now lectures at De Montfort University, Leicester, and runs workshops and short courses on the uses of imagery and storytelling and issues of self-esteem. Deborah is author of several titles, including *Helping Children to Cope with Change, Stress and Anxiety: A Photocopiable Activities Book*, *Helping Children to Build Self-Esteem: A Photocopiable Activities Book*, 2nd edition, *Self-Esteem Games for Children*, *Social Skills Games for Children*, *Helping Adolescents and Adults to Build Self-Esteem: A Photocopiable Resource Book*, and *Anger Management Games for Children*, all published by Jessica Kingsley Publishers. The Pragmatics Profile of Early Communication Skills Createspace
Independent Publishing Platform

Every interventionist needs this practical sourcebook, packed with research-based strategies for helping parents and caregivers take a consistent, active role in supporting young children's

development.

Early Childhood Development McGraw-Hill Education (UK)

'Communication, Language and Literacy From Birth to Five' helps the reader develop their knowledge, skills and practice in encouraging and promoting communication, language and literacy for babies and young children.

Saying What You Mean National Academies Press

How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of "expertise." The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about "brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

More Than Words National Academies Press

This guide will help children's nurses to communicate with confidence, sensitivity and effectiveness; to meet the individual needs of children and their families. The book explores different aspects of communicating in this challenging environment using vignettes, examples, practice insights and tips. The book emphasises the importance of listening to and respecting children's views and rights, in addition to respecting parent responsibility, rights and duty to act in the child's best interests. The authors show how a balance between protective exclusion and facilitated inclusion is core to communicating with children and families.

Early Communication Skills Woodbine House

This text presents an examination of the importance of play for children from birth to three years, setting play within the

framework of a child's whole development. The authors combine theory with practice, and the text is illustrated with many examples from the direct observation of children.

Handbook of Parenting W Publishing Group

When children's communication skills lag, all areas of learning and socialisation are affected. This book describes how an ABA approach can help children aged 2 to 10 years who have significant communication problems -- difficulty making requests, perseverative speech, a lack of fluency in conversational exchanges, trouble reading others' signals, and more -- learn to understand and use speech and language. Enriched by case studies, this straightforward and information-packed book examines using the Applied Verbal Behaviour (AVB) method to tackle a wide variety of communication problems typical of children with autism. In a nutshell, AVB consists of observing and analysing a child's communication behaviours, breaking them down into functions, and then teaching and reinforcing needed skills. AVB strategies and the other methods profiled (PECS, sign language, video modelling, scripts, social stories, etc..) can greatly boost a child's understanding of verbal and non-verbal communication, and help him improve his expressive abilities. The authors provide helpful suggestions on how parents can support this process and teach and reinforce communication skills at home. With this book parents and professionals can help young kids, both those with and without speech, expand their communication abilities and opportunities, enabling greater inclusion and progress in daily activities.

From Neurons to Neighborhoods Brookes Publishing Company

"Building Engagement and Early Communication is designed for SLPs and other EI practitioners working with infants and toddlers whose disabilities impact communication development. A key preverbal communication milestone is triadic focus gaze, when a child begins shifting gaze back and forth between an adult and another object of interest. Triadic Gaze Intervention (TGI), as discussed in this practical resource, supports development of triadic gaze and related communication behaviors and can be implemented within everyday routines"--

Baby Sign Language Basics Penguin

In this newly expanded edition, a renowned baby-signing expert provides more than 300 American Sign Language (ASL) signs, illustrated with the same clear, easy-to-understand photos and

descriptions. Since 2004, Baby Sign Language Basics has introduced hundreds of thousands of parents and caregivers around the globe to the miracle of signing with their babies—and left them wanting more! Baby-specific signing techniques, songs, and games are also included to make learning fun and to quickly open up two-way communication. Parents will meet real signing families and learn how to make sign language a part of their everyday interactions with their children. Also included is a video signing dictionary featuring all the signs from the book. Just point and click, and see the sign you want to learn come alive! This is a must-have for all parents, grandparents, and anyone else who spends time with preverbal children. After all, what parent or caregiver doesn't want to know what their baby is trying to tell them? Now includes streaming video, additional tips, advice, and updated resources!

Derived Relational Responding Applications for Learners with Autism and Other Developmental Disabilities Psychology Press

Early Communication Skills Oakmoor-Publishing

This work offers a practical resource for all professionals working

with young children, containing educational and therapeutic ideas for use with pre-school children and their parents.

The Early Childhood Coaching Handbook Routledge

In *Early Communication Skills for Children with Down Syndrome*, Libby Kumin, Ph.D., CCC-SLP shares her expertise -- gained through her work with hundreds of children with Down syndrome over the past 23 years -- with parents and speech-language pathologists to help them maximize the communication development of young children. This new book, an updated, expanded edition of *Communication Skills in Children with Down Syndrome* focuses on speech and language development from birth through the stage of making 3-word phrases, which is often around ages 5 or 6, but can occur later. Book jacket.

Children's Communication Skills Jessica Kingsley Publishers

Newly revised and updated, this compassionate and authoritative guide is based on Libby Kumin's more than thirty years experience working with children and adolescents with Down syndrome and their families. As the founder of the Down Syndrome Center for Excellence at Loyola University in Maryland, she draws on her vast experience to show parents how they can support and encourage their child's speech and language development from birth to age 6 (or when a child can form 2- to 3- word sentences). Parents and teachers learn how to work through characteristic challenges, including hearing loss,

intelligibility issues, apraxia (difficulty planning oral-motor movements), or a slower pace of development. Families soon see that many children with Down syndrome are natural and willing communicators. In a warm and conversational style, the author shares her professional expertise in parent-friendly terms. She uses specific examples of difficulties and successes to illustrate the concepts behind speech and language development, and includes the latest research supporting current early intervention and preschool approaches that can be used at home and in schools. This third edition of *EARLY COMMUNICATION SKILLS* features expanded information on the needs of children with apraxia, dual diagnosis of autism and Down syndrome, and updated terminology and information on special education law. A new chapter explains how technology and augmentative and alternative communication (AAC) ? smartphones, iPods, iPads, and apps ? can help with speech and language, foster communication, and provide inexpensive transitional language systems. Dozens of forms are now included on a CD-ROM to be used for assessment, developing treatment plans, and keeping detailed records of progress. Teachers, speech-language pathologists, and parents will love the convenience of printing multiple copies of forms and organizing information for IEP meetings or periodic evaluations.
