Slavery in Medieval and Early Modern Iberia provides a sweeping
survey of the many forms of bound labor in Iberia from ancient
times to the decline of slavery in the eighteenth century.
World History and Geography Oxford University Press
"Not only an engrossing read about the distant past, both
informative and entertaining, but also a profoundly thought-
provoking view of our not-really-so-'new' present . . . All medieval
history is here, beautifully narrated . . . The vision takes in whole
imperial landscapes but also makes room for intimate portraits of

key individuals, and even some poems."—Wall Street Journal "A
lively history . . . [Jones] has managed to touch every major topic.
As each piece of the puzzle is placed into position, the modern
world gradually comes into view . . . Powers and Thrones provides
the reader with a framework for understanding a complicated
subject, and it tells the story of an essential era of world history
with skill and style."—The New York Times The New York Times
bestselling author returns with an epic history of the medieval
world—a rich and complicated reappraisal of an era whose legacy
and lessons we are still living with today. When the once-mighty
city of Rome was sacked by barbarians in 410 and lay in ruins, it
signaled the end of an era--and the beginning of a thousand
years of profound transformation. In a gripping narrative bursting
with big names—from Sts Augustine and Attila the Hun to the
Prophet Muhammad and Eleanor of Aquitaine—Dan Jones charges

through the history of the Middle Ages. Powers and Thrones takes readers on a journey through an emerging Europe, the great capitals of late Antiquity, as well as the influential cities of the Islamic West, and culminates in the first European voyages to the Americas. The medieval world was forged by the big forces that still occupy us today: climate change, pandemic disease, mass migration, and technological revolutions. This was the time when the great European nationalities were formed; when the basic Western systems of law and governance were codified; when the Christian Churches matured as both powerful institutions and the regulators of Western public morality; and when art, architecture, philosophical inquiry and scientific invention went through periods of massive, revolutionary change. The West was rebuilt on the ruins of an empire and emerged from a state of crisis and collapse to dominate the world. Every sphere of human life and activity was transformed in the thousand years covered by Powers and Thrones. As we face a critical turning point in our own millennium, Dan Jones shows that how we got here matters more than ever.

To Live Like a Moor traces the many shifts in Christian perceptions of Islam-associated ways of life which took place across the centuries between early Reconquista efforts of the eleventh century and the final expulsions of Spain's converted yet poorly assimilated Morisco population in the seventeenth.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in

Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

This volume examines how historical beliefs about the supernatural were used to justify violence, secure political authority or extend toleration in both the medieval and early modern periods. Contributors explore miracles, political authority and violence in Orthodoxy, Roman Catholicism, various Protestant groups, Judaism, Islam and the local religious beliefs of Pacific Islanders who interacted with Christians. The chapters are geographically expansive, with contributions ranging from confessional conflict in Poland-Lithuania to the conquest of Oceania. They examine various types of conflict such as confessional struggles, conversion attempts, assassination and war, as well as themes including diplomacy, miraculous iconography, toleration, theology and rhetoric. Together, the chapters explore the appropriation of accounts of miraculous violence that are recorded in sacred texts to reveal what partisans claimed God did in conflict, and how they claimed to know. The volume investigates theories of justified warfare, changing beliefs about the supernatural with the advent of modernity and the perceived relationship between human and divine agency. Miracles, Political Authority and Violence in

Medieval and Early Modern History is of interest to scholars and students in several fields including religion and violence, political and military history, and theology and the reception of sacred texts in the medieval and early modern world.

This study is an exploration of lived religion and gender across the Reformation, from the 14th-18th centuries. Combining conceptual development with empirical history, the authors explore these two topics via themes of power, agency, work, family, sainthood and witchcraft. By advancing the theoretical category of 'experience', Lived Religion and Gender reveals multiple femininities and masculinities in the intersectional context of lived religion. The authors analyse specific case studies from both medieval and early modern sources, such as secular court records, to tell the stories of both individuals and large social groups. By exploring lived religion and gender on a range of social levels including the domestic sphere, public devotion and spirituality, this study explains how late medieval and early modern people performed both religion and gender in

ways that were vastly different from what ideologists have prescribed. *Lived Religion and Gender* covers a wide geographical area in western Europe including Italy, Scandinavia and Finland, making this study an invaluable resource for scholars and students concerned with the history of religion, the history of gender, the history of the family, as well as medieval and early modern European history.

An Age of Voyages, 1350-1600 McDougal Littell/Houghton Mifflin

"The beauty and levity that Perry and Gabriele have captured in this book are what I think will help it to become a standard text for general audiences for years to come....The Bright Ages is a rare thing—a nuanced historical work that almost anyone can enjoy reading."—Slate "Incandescent and ultimately intoxicating." —The Boston Globe A lively and magisterial popular history that refutes common misperceptions of the European Middle Ages, showing the beauty and communion that flourished alongside the dark brutality—a brilliant reflection of humanity itself. The word "medieval" conjures images of the "Dark Ages"—centuries of ignorance, superstition, stasis, savagery, and poor hygiene. But the myth of darkness obscures the truth; this was a remarkable period in human history. The Bright Ages recasts the European Middle Ages for what it was, capturing this 1,000-year era in all its complexity and fundamental humanity, bringing to light both its beauty and its horrors. The Bright Ages takes us through ten centuries and crisscrosses Europe and the Mediterranean, Asia and Africa, revisiting familiar people and events with new light cast upon them. We look with fresh eyes on the Fall of Rome, Charlemagne, the Vikings, the Crusades, and

the Black Death, but also to the multi-religious experience of Iberia, the rise of Byzantium, and the genius of Hildegard and the power of queens. We begin under a blanket of golden stars constructed by an empress with Germanic, Roman, Spanish, Byzantine, and Christian bloodlines and end nearly 1,000 years later with the poet Dante—inspired by that same twinkling celestial canopy—writing an epic saga of heaven and hell that endures as a masterpiece of literature today. The Bright Ages reminds us just how permeable our manmade borders have always been and of what possible worlds the past has always made available to us. The Middle Ages may have been a world "lit only by fire" but it was one whose torches illuminated the magnificent rose windows of cathedrals, even as they stoked the pyres of accused heretics. The Bright Ages contains an 8-page color insert.

Guns, Germs, and Steel: The Fates of Human Societies (20th Anniversary Edition) Routledge

Religion and the Medieval and Early Modern Global Marketplace brings together scholars from a variety of disciplines to examine the intersection, conflict, and confluence of religion and the market before 1700. Each chapter analyzes the unique interplay of faith and economy in a different locale: Syria, Ethiopia, France, Iceland, India, Peru, and beyond. In ten case studies, specialists of archaeology, art history, social and economic history, religious studies, and critical theory address issues of secularization, tolerance, colonialism, and race with a fresh focus. They chart the tensions between religious and economic thought in specific locales or texts, the complex ways that religion and economy interacted with one another, and the way in which matters of

faith, economy, and race converge in religious images of the pre- and early modern periods. Considering the intersection of faith and economy, the volume questions the legacy of early modern economic and spiritual exceptionalism, and the ways in which prosperity still entangles itself with righteousness. The interdisciplinary nature means that this volume is the perfect resource for advanced undergraduates, postgraduates, and scholars working across multiple areas including history, literature, politics, art history, global studies, philosophy, and gender studies in the medieval and early modern periods.

The Visualization of Knowledge in Medieval and Early Modern Europe Routledge

Bringing together distinguished scholars in honor of Professor Teofilo F. Ruiz, this volume presents original and innovative research on the critical and uneasy relationship between authority and spectacle in the period from the twelfth to the sixteenth centuries, focusing on Spain, the Mediterranean and Latin America. Cultural scholars such as Professor Ruiz and his colleagues have challenged the notion that authority is elided with high politics, an approach that tends to be monolithic and disregards the uneven application and experience of power by elite and non-elite groups in society by highlighting the significance of spectacle. Taking such forms as ceremonies, rituals, festivals, and customs, spectacle is a medium to project

and render visible power, yet it is also an ambiguous and contested setting, where participants exercise the roles of both actor and audience. Chapters in this collection consider topics such as monarchy, wealth and poverty, medieval cuisine and diet and textual and visual sources. The individual contributions in this volume collectively represent a timely re-examination of authority that brings in the insights of cultural theory, ultimately highlighting the importance of representation and projection, negotiation and ambivalence.

The first cultural history of early modern cryptography, this collection brings together scholars in history, literature, music, the arts, mathematics, and computer science who study ciphering and deciphering from new materialist, media studies, cognitive studies, disability studies, and other theoretical perspectives. Essays analyze the material forms of ciphering as windows into the cultures of orality, manuscript, print, and publishing, revealing that early modern ciphering, and the complex history that preceded it in the medieval period, not only influenced political and military history but also played a central role in the emergence of the capitalist media state in the West, in religious reformation, and in the scientific revolution. Ciphered communication, whether in etched stone and bone, in musical notae, runic symbols, polyalphabetic substitution, algebraic equations, graphic typographies, or literary metaphors, took place in contested social spaces and offered a means of expression during times of political, economic, and personal upheaval. Ciphering shaped the early history of linguistics as a discipline, and it bridged theological and scientific rhetoric before and during the Reformation. Ciphering was an occult art, a mathematic language, and an aesthetic that influenced music, sculpture, painting, drama, poetry, and the early novel. This collection addresses gaps in cryptographic history, but more significantly, through cultural analyses of the rhetorical situations of ciphering and actual solved and unsolved medieval and early modern ciphers, it traces the influences of cryptographic writing and reading on literacy broadly defined as well as the cultures that generate, resist, and require that literacy. This volume offers a significant contribution to the history of the book, highlighting

the broader cultural significance of textual materialities.

This volume seeks to increase understanding of the origins, ideology, implementation, impact, and historiography of religion and conflict in the medieval and early modern periods. The chapters examine ideas about religion and conflict in the context of text and identity, church and state, civic environments, marriage, the parish, heresy, gender, dialogues, war and finance, and Holy War. The volume covers a wide chronological period, and the contributors investigate relationships between religion and conflict from the seventh to eighteenth centuries ranging from Byzantium to post-conquest Mexico. Religious expressions of conflict at a localised level are explored, including the use of language in legal and clerical contexts to influence social behaviours and the use of religion to legitimise the spiritual value of violence, rationalising the enforcement of social rules. The collection also examines spatial expressions of religious conflict both within urban environments and through travel and pilgrimage. With both written and visual sources being explored, this volume is the ideal resource for upper-level undergraduates, postgraduates, and researchers of religion and military, political, social, legal, cultural, or intellectual conflict in medieval and early

modern worlds.
