Over the last thirty years, even as China's economy has grown by leaps and bounds, the environmental quality of its urban centers has precipitously declined due to heavy industrial output and coal consumption. The country is currently the world's largest greenhouse-gas emitter and several of the most polluted cities in the world are in China. Yet, millions of people continue moving to its cities seeking opportunities. *Blue Skies over Beijing* investigates the ways that China's urban development impacts local and global environmental challenges. Focusing on day-to-day choices made by the nation's citizens, families, and government, Matthew Kahn and Siqi Zheng examine how Chinese urbanites are increasingly demanding cleaner living conditions and consider where China might be headed in terms of sustainable urban growth. Kahn and Zheng delve into life in China's cities from the personal perspectives of the rich, middle class, and poor, and how they cope with the stresses of pollution. Urban parents in China have a strong desire to protect their children from environmental risk, and calls for a better quality of life from the rising middle class places pressure on government officials to support greener policies. Using the historical evolution of American cities as a comparison, the authors predict that as China's economy moves away from heavy manufacturing toward cleaner sectors, many of China's cities should experience environmental progress in upcoming decades. Looking at pressing economic and environmental issues in urban China, *Blue Skies over Beijing* shows that a cleaner China will mean more social stability for the nation and the world.

Paper Springer

Across the globe, states have long aimed to control the movement of people, identify their citizens, and restrict noncitizens' rights through official identification documents. Although states are now less likely to grant permanent legal status, they are increasingly issuing new temporary and provisional legal statuses to migrants. Meanwhile, the need for migrants to apply for frequent renewals subjects them to more intensive state surveillance. The contributors to *Paper Trails*

examine how these new developments change migrants' relationship to state, local, and foreign bureaucracies. The contributors analyze, among other things, immigration policies in the United Kingdom, the issuing of driver's licenses in Arizona and New Mexico, the Deferred Action for Childhood Arrivals program, and community know-your-rights campaigns. By demonstrating how migrants are inscribed into official bureaucratic systems through the issuance of identification documents, the contributors open up new ways to understand how states exert their power and how migrants must navigate new systems of governance. Contributors: Bridget Anderson, Deborah A. Boehm, Susan Bibler Coutin, Ruth Gomberg-Muñoz, Sarah B. Horton, Josiah Heyman, Cecilia Menjívar, Juan Thomas Ordóñez, Doris Marie Provine, Nandita Sharma, Monica Varsanyi

This book makes an original contribution to our knowledge of the world's major defence industries. Experts from a wide range of different countries – from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea – describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation's defence spending, its spending on defence R&D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and performance of the industry. The analysis of 'structure' includes discussions of entry conditions, domestic monopoly/oligopoly structures and opportunities for competition. The section on 'conduct' analyses price/non-price competition, including private and state funded R&D, and 'performance' incorporates profitability, imports and exports together with spin-offs and technical progress. The conclusion explores the future prospects for each nation's defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years' time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

WHO Expert Committee on Biological Standardization

Routledge

It is widely recognised that climate change poses significant serious threats to sustained economic growth and agricultural development, poverty reduction, food security and political stability globally. Nowhere are these challenges more marked than in Africa where two-thirds of all available land is classified either as desert or dry land, in relation to which the Intergovernmental Panel on Climate Change (IPCC) (2013) has classified the continent as the most vulnerable to climate change variability. This anthology is a product of a call from OSSREA to collate evidence based researches in a book in a bid to assess how far countries in eastern and southern Africa are implementing the UNFCCC, Rio+20, Agenda 21 and other global and Africa-wide decisions concerning the need to address climate change. This will contribute to post-2015 development agenda for sustainable development goals (SDGs), in which climate change and disaster risk reduction will be priority areas of focus. We hope this book will serve as a valuable tool for experts, advisers and policymakers in pursuing effective green growth policies and practices and achieving climate compatible development and in doing so inspire readers to choose a more sustainable pathway for humanity. It will also help in looking at climate change as both a challenge and opportunity for development. Further, this book aims at stimulating more research in climate compatible development and climate financing which have put most countries at crossroads.

Debate on the desirability, feasibility and implementation of a Citizen's Basic Income – an unconditional, nonwithdrawable and regular income for every individual – is increasingly widespread among academics, policymakers, and the general public. There are now numerous introductory books on the subject, and others on particular aspects of it. This book provides something new: It studies the Citizen's Basic Income proposal from a variety of different disciplinary perspectives: the economics of Citizen's Basic Income, the sociology of Citizen's Basic Income, the politics of Citizen's Basic Income, and so on. Each chapter discusses the academic discipline, and relevant aspects of the debate, and asks

how the discipline enhances our understanding, and how the Citizen's Basic Income debate might contribute to the academic discipline.

Positionality, Critique, and Practice Ravinder Singh and sons
Since becoming formally established with an international academic society in the late 1980s, ecological economics has advanced understanding of the interactions between social and biophysical reality. It initially combined questioning of the basis of mainstream economics with a concern for environmental degradation and limits to growth, but has now advanced well beyond critique into theoretical, analytical and policy alternatives. Social ecological economics and transformation to an alternative future now form core ideas in an interdisciplinary approach combining insights from a range of disciplines including heterodox economics, political ecology, sociology, political science, social psychology, applied philosophy, environmental ethics and a range of natural sciences. This handbook, edited by a leading figure in the field, demonstrates the dynamism of ecological economics in a wide-ranging collection of state-of-the-art essays. Containing contributions from an array of international researchers who are pushing the boundaries of the field, the Routledge Handbook of Ecological Economics showcases the diversity of the field and points the way forward. A critical analytical perspective is combined with realism about how economic systems operate and their essential connection to the natural world and society. This provides a rich understanding of how biophysical reality relates to and integrates with social reality. Chapters provide succinct overviews of the literature covering a range of subject areas including: heterodox thought on the environment; society, power and politics, markets and consumption; value and ethics; science and society; methods for evaluation and policy analysis; policy challenges; and the future post-growth society. The rich contents dispel the myth of there being no alternatives to current economic thought and the political economy it supports. The Routledge Handbook of Ecological Economics provides a guide to the literature on ecological economics in an informative and easily accessible form. It is essential reading for those interested

in exploring and understanding the interactions between the social, ecological and economic and is an important resource for those interested in fields such as: human ecology, political ecology, environmental politics, human geography, environmental management, environmental evaluation, future and transition studies, environmental policy, development studies and heterodox economics.

Pettengill's Newspaper Directory and Advertisers' Handbook for 1978 Duke University Press

This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for

young people in many countries.

Pettengill's Newspaper Directory and Advertiser's Hand-book for 1878 Routledge

Research ethics and integrity are growing in importance as academics face increasing pressure to win grants and publish, and universities promote themselves in the competitive HE market. *Research Ethics in the Real World* is the first book to highlight the links between research ethics and individual, social, professional, institutional, and political ethics. Drawing on Indigenous and Euro-Western research traditions, Helen Kara considers all stages of the research process, from the formulation of a research question to aftercare for participants, data and findings. She argues that knowledge of both ethical approaches is helpful for researchers working in either paradigm. Students, academics, and research ethics experts from around the world contribute real-world perspectives on navigating and managing ethics in practice. *Research Ethics in the Real World* provides guidance for quantitative, qualitative, and mixed-methods researchers from all disciplines about how to act ethically throughout your research work. This book is invaluable in supporting teachers of research ethics to design and deliver effective courses.

The State of Food and Agriculture 2020 Jones & Bartlett Learning
The Key Indicators for Asia and the Pacific 2014, the 45th edition of this series, includes the latest available economic, financial, social, and environmental indicators for the 48 regional members of the Asian Development Bank. It presents the latest key statistics on development issues concerning the economies of Asia and the Pacific to a wide audience, including policy makers, development practitioners, government officials, researchers, students, and the general public. Part I of this issue is a special chapter---Poverty in Asia: A Deeper Look. Parts II and III are composed of brief, nontechnical analyses and statistical tables on the Millennium Development Goals and eight other themes. The publication is supplemented by the fourth edition of the Framework of Inclusive Growth Indicators. The statistical tables in this issue of the Key Indicators may also be downloaded in MS Excel format from

<http://www.adb.org/publications/key-indicators-asia-and-pacific-2014> or in user-specified format at SDBS Online.

A Multidisciplinary Approach Policy Press

This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China. It goes beyond a consideration of trade and investment flows, and discusses also the large population flows, the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level. It considers the impact of growing economic integration on society and politics, assesses how China-Taiwan economic integration is affecting the East Asian region more widely, and explores the implications for international relations, including the United States dominance in the region. Overall, the book presents a comprehensive analysis of all the issues.
